## **Public Works News Release**

### **Mac Iver Street Construction Update 6**

Curb, gutter, and sidewalk will be constructed on the Mac Iver Street extension during the week of 26 November 2007. The following week, the first week of December, the extension will be paved and trenches and gravel sections on the existing street will be patched, weather permitting. Once the extension is paved and the existing street patched, major work will stop until the spring of 2008.

Sierra Nevada Construction is the contractor on the first phase of the \$1.1 million City of Bishop Mac Iver Street Improvements project. The project is funded from gas tax revenues provided through the Inyo Local Transportation Commission and the California Transportation Commission and administered by Caltrans. The street extension is constructed on property owned by the Los Angeles Department of Water and Power. The contract is administered by City of Bishop Public Works staff with technical assistance from Eastern Sierra Engineering, Bear Engineering, and Mactec. The project is only possible with the support these agencies and the hard work of these companies and staff.

The second phase of the project that will construct curb, gutter, and sidewalk on the existing street and allow repaving the existing street is not yet approved by Caltrans. Approval is expected soon and the second phase of work should be completed in the spring along with the remaining work from the first phase.

For more information contact City of Bishop Public Works at publicworks@ca-bishop.us or 760-873-8458. Press releases posted at <http://www.ca-bishop.us/Advertisements/Releases/Releases.htm>
