## **Public Works News Release**

### **Final Mac Iver Street Paving Scheduled**

#### **Construction Update 12**

Sierra Nevada Construction (SNC) plans to repave the old section of Mac Iver Street on Monday, 30 June 2008. In preparation for paving Monday, SNC plans to grind portions of the existing pavement on Friday, 27 June. There will be no parking on the old section of Mac Iver Street on both Friday and Monday to allow for this work.

Repaving the old street is the last major work to be done on the Mac Iver Street Improvements project. Some minor work such as raising manholes and placing covers will still have to be done after paving. This minor work should be completed a few days after the paving.

The grinding and paving operations will have a major impact to traffic on Mac Iver Street and will even affect traffic on Main Street. Some of the minor work following the paving will also affect traffic on Mac Iver Street. All efforts will be made to minimize the impacts and restrictions, but drivers and pedestrians should be cautious, take alternate routes when available, be alert for hidden hazards, and be patient with some inconvenience and with short delays.
