Public Works News Release

Project A Puts Concrete on North Third Street

The major construction effort on the City of Bishop Project A is currently at the North Third Street location of the project. The first curb, gutter, and sidewalk is placed and the remaining concrete is expected to be placed next week at this location. Pavement removal and repaving the street will follow once concrete work is complete. Work at the Short Street location of the project is done except for striping and signing the street for one way and providing trees. The entire project is expected to be complete the first week of June.

The final weeks of project construction are often the most hectic and the most inconvenient, especially when concrete and paving work is underway. Freshly placed concrete and pavement are soft and vulnerable to damage. To protect the concrete and pavement, street and driveway closures will be more extensive and will last longer during these last two or three weeks of construction.

All efforts are being made to minimize the impacts and restrictions but still move the project rapidly to completion. Residents, drivers, and pedestrians in the project area should be cautious, take alternate routes when available, be prepared to park and walk longer distances than normal, be alert for hidden hazards, and be patient with some inconvenience and with delays.
