Public Works News Release

More Project A Street Trees Available

Almost 40 of the 60 trees provided by the City of Bishop Road Improvement Project A are still available to properties along the street.

Project A provided 60 trees - almost 2 trees for every property along the streets affected by the project. Property owners received coupons for the trees and have until the end of June to redeem them and pick up the trees. As of today, almost 40 trees have not been picked up. It is likely many of these remaining trees won't be picked up by the time the coupons expire 30 June. In anticipation of there being trees left over after 30 June, requests for additional trees are being accepted from owners and residents affected by the project.

Owners and residents along North Third Street and Short Street affected by Project A that would like additional trees should submit written requests to the City of Bishop Department of Public Works at 377 West Line Street or publicworks@ca-bishop.us as soon as possible. These owners and residents will have the first shot at the remaining trees. If any trees are left over after this process of offering additional trees to properties affected by the project, the trees will be made available to residents and property owners throughout the city.

For more information contact City of Bishop Public Works. Press releases posted at <http://www.ca-bishop.us/Advertisements/Releases/Releases.html>.
