Public Works News Release

North Second Street Water Line Construction Update

Good progress is being made on the City of Bishop North Second Street Water Improvements project. The \$70,000 project will replace small and deteriorated water line with new larger pipe on North Second Street south of Willow Street and on Willow Street between Hanby and North Second. The project will also replace water services and add a fire hydrant. The contractor on the project is Rivers Edge of Kernville, California. The project is funded from city water funds.

So far new water line has been placed along Willow Street. Later this week new water line is expected to be placed on North Second Street south of Willow Street. Once the new water line is in place, it will be tested for leaks, flushed, and tested for quality. Once the line passes the tests, properties along the streets will be connected to the new water line. Short water shut offs will be required occasionally during construction and when properties are connected to the new lines. Construction is expected to be complete on the project in mid-July

Parking will be restricted during the day Monday through Thursday while work is underway and at other times when necessary. Construction materials, equipment, workers, and trenches in the street will require attention and will impact pedestrian and vehicle traffic. There will be ongoing lane and street closures and vehicle access to properties will be restricted at times. All efforts will be made to minimize the impacts and restrictions, but residents, drivers, and pedestrians should be cautious, take alternate routes when available, be alert for hidden hazards, and be patient with some inconvenience and with short delays.
