Public Works News Release

Trees for Bishop

The City of Bishop has about 30 trees available to city residents that request them. These trees are suitable for planting in yards or along the city streets.

Road Improvement Project A provided 60 trees - almost 2 trees for every property along the streets affected by the project. It appears those properties are only going to take about half of the 60 trees, which makes the rest available to others in the city. Street trees can improve the aesthetics of a street, reduce summer heat, and improve property values. This is an excellent opportunity to get a tree to plant in your yard or along the street.

If you are a resident or property owner in the City of Bishop and would like a tree, contact the City of Bishop Department of Public Works. You will be responsible for picking up the trees, planting, and caring for them. The trees are suitable for planting along city streets. Some of the trees are selected to be compatible with overhead power lines, so think ahead about where you will plant the trees and be sure to get the right type.

For more information contact City of Bishop Public Works. Press releases posted at <http://www.ca-bishop.us/Advertisements/Releases/Releases.html>.
