Public Works News Release

Drainage Work on First Street in February

The City of Bishop hopes to construct a drainage improvement project on First Street in February 2013.

The First Street Drainage project will improve drainage on the west side of First Street between Clarke Street and Short Street. Drainage will be improved by removing the existing curb and replacing it with new concrete curb. This replacement will eliminate a raised portion of the street that traps water and causes persistent ponding in the area. The improvement is expected to cost about \$30,000 and take about 3 weeks to construct. No sidewalk is included. Two mature trees will be removed as part of the work and three new trees will be provided.

Keep an eye on the local press and the city website for project updates as construction gets closer. Contact City of Bishop Department of Public Works if you would like more information on the project or would like to provide comment.
