## **Public Works News Release**

### **Warren Street Environmental Review**

In addition to a public workshop 12 January, formal public review is underway on the environmental document for the City of Bishop Warren Street Improvements project. Comments on the document are due 28 January and a public hearing is tentatively planned for the City Council meeting 11 February.

The Warren Street project is generally planned to improve the full length of Warren Street with new pavement, curb, sidewalk, street trees, street lights, and other improvements. If there is enough money, the blocks of the side streets between Warren and Main streets will also be improved. The side streets are South, Lagoon, Church, Academy, Pine, and Elm. The money for the project comes from state and federal gas taxes.

The project may include pocket parks, seating areas, colored concrete with designs, landscaping, banners, improved utility poles, bike racks, restrooms, and shade trees. A more complete description of the project is included in the environmental document and is shown on project drawings. The environmental document and project drawings are available at City Hall and on the city website. To find the environmental document on the city website, look for the Environmental Documents on the left side of the main page. All comments are welcome.
