Public Works News Release

First Street Drainage Work to Start

The contractor on the City of Bishop First Street Drainage project is expected to start work on Monday, 4 February. The \$30,000 City of Bishop Project will construct a curb and gutter on the west side of First Street between Short Street and Clarke Street. The construction of the project may involve lane, street, and sidewalk closures on First Street for three weeks. The contractor is V&C Construction of Minden, Nevada.

The purpose of the project is to reconstruct the curb and gutter since trees roots have raised the street and caused ponding, which can result in ice during the winter months. Reconstructing the gutter will allow the street to properly drain. The project improvements include curb, gutter, driveway, tree removal, tree replacement, and preserving most other landscaping.

Project construction will involve lane, sidewalk, and street closures, weekly parking restrictions, construction equipment, and workers in the street. One or both lanes of First Street will be closed when construction is underway. The City of Bishop requests the efforts of residents, drivers, and pedestrians to take alternative routes and would like to thank the public for their patience during this inconvenience. The contractor and City will work to minimize the possible impacts and restrictions during construction.
