## **Public Works News Release**

### **Bishop Water Work on Clarke and Third to Start**

Work is expected to start Monday, 15 April on the project to construct new water line on Clarke Street and on Third Street in Bishop. The \$300,000 City of Bishop project will replace almost a half mile of deteriorated water line that is prone to leaks.

The project is on Clarke Street between Main Street and South Third Street and on Third Street from Clarke Street to near Willow Street. The project includes a new hydrant and new services to each property along the streets affected by the project. The project is funded from city water funds and the contractor is Conspec from Lee Vining.

To construct the new and replacement pipes, extensive trenching in the street will be necessary. Parking will be restricted during the day Monday through Friday while work is underway and at other times when necessary. Construction materials, equipment, workers, and trenches in the street will require attention and will impact pedestrian and vehicle traffic. There will be ongoing lane and street closures and vehicle access to properties will be restricted at times. All efforts will be made to minimize the impacts and restrictions, but residents, drivers, and pedestrians should be cautious, take alternate routes when available, be alert for hidden hazards, and be patient with some inconvenience and with short delays. Short water shutoffs will be required during construction. Residents will be advised in advance of these shutoffs and their planning, cooperation, and patience will be greatly appreciated. Construction is expected to be complete in June.
