

Survey:

The one page survey asked six questions, or more precisely asked for six responses, plus gave an opportunity for the person surveyed to make additional comments. Each survey was uniquely numbered and provided with a stamped envelope addressed to the District 9 Office. Survey responses were compiled in a Microsoft Excel spreadsheet.

The six questions were:

1. Where does the driver live?
2. Was the trip business or pleasure?
3. Did the trip emphasize speed or enjoyment?
4. Which is more important, getting to the trip's destination more quickly or slowing down to enjoy through towns?
5. Should more highway tax money be spent on making highways safe or beautifying them in towns so people will want to stop?
6. Comments.

Results:

Twenty seven of the 100 surveys were returned and a summary of the responses is below:

1. Driver lives in:	Count	Total	E. Sierra	So Cal	Calif	USA	World
	Percent	27	5	11	3	8	0
		100%	19%	41%	11%	30%	0%
2. Trip is:	Count	Total	Bus	Pleas			
	Percent	25	6	19			
		100%	24%	76%			
3. Trip emphasizes:	Count	Total	Speed	Enjoy			
	Percent	25	17	8			
		100%	68%	32%			
4. We would rather:	Count	Total	Fast	Slow			
	Percent	26	15	11			
		100%	58%	42%			
5. Spend taxes for:	Count	Total	Safe	Beauty			
	Percent	25	21	4			
		100%	84%	16%
