

City of Bishop
PLANNING COMMISSION MEETING AGENDA
City Council Chambers – 301 West Line Street
Bishop, California 93514

DATE:
January 28, 2014
7:00 P.M.

NOTICE TO THE PUBLIC

In compliance with the Americans with Disabilities Act, if you need special assistance to participate in this meeting, please contact the City Clerk (760) 873-5863. Notification 48 hours prior to the meeting will enable the City to make reasonable arrangements to ensure accessibility to this meeting. (28 CFR 35. 102-35.104 ADA Title II).

Any writing that is a public record that relates to an agenda item for open session distributed less than 72 hours prior to the meeting will be available for public inspection at City Hall, 377 West Line Street, Bishop, California.

CALL TO ORDER

PLEDGE OF ALLEGIANCE

ROLL CALL

PUBLIC COMMENT: NOTICE TO THE PUBLIC: This time is set aside to receive public comment on matters not calendared on the agenda.

APPROVAL OF MINUTES

- (1) Minutes of the Planning Commission meeting held on September 24, 2013 subject for approval.

PUBLIC HEARING

- (2) Take Citizen input on the Draft 2014 – 2019 Housing Element

NEW BUSINESS

- (3) Presentation of the Draft 2014 – 2019 Housing Element for review and comment.
- (4) Parking on the Warren Street Improvements Project.

STAFF AND COMMISSION REPORTS

ADJOURNMENT: The next regularly scheduled meeting of the Planning Commission will be February 25, 2014 at 7:00 P.M. in the Bishop City Council Chambers, 301 West Line Street, Bishop.

City of Bishop
PLANNING COMMISSION MINUTES
City Council Chambers – 301 West Line Street
Bishop, California 93514

September 24, 2013

CALL TO ORDER:

Chairman Malloy called the meeting to order at 7:05 P.M.

PLEDGE OF ALLEGIANCE:

The Pledge of Allegiance was led by Chairman Malloy.

COMMISSIONERS PRESENT:

Huntley, Lowthorp, Heckman, Garcia, and Malloy

COMMISSIONERS ABSENT:

Bhakta

OTHERS PRESENT:

Gary Schley, Public Services Officer
Keith Caldwell, City Administrator / Planning Director
Peter Tracy, City Attorney
Michele Thomas, Secretary
Tom Hardy, Inyo County District Attorney

PUBLIC COMMENT

Chairman Malloy asked if anyone wished to speak on a subject not calendared on the agenda.

Commissioner Hardy thanked the commission and staff for the experience of serving on the Planning Commission. He was recently hired as Inyo County District Attorney. Due to possible conflict of interest, Hardy has resigned from the Planning Commission effective immediately.

Caldwell thanked Hardy for his years of service.

CORRESPONDENCE

None

(1) APPROVAL OF MINUTES

MOTION

Commissioner Huntley moved to approve the minutes of the August 27, 2013 meeting as written.

Ayes: Huntley, Lowthorp, Garcia, Heckman, and Malloy

MOTION CARRIED 5-0

NEW BUSINESS

- (2) Bishop 2014 – 2019 Housing Element Update Presentation by Sandra Bauer of Bauer Environmental Services.

Sandra Bauer explained that the goal of tonight's presentation is to review with the commission the progress on the draft 2014-2019 Housing Element preparation. Also to discuss and review accomplishments in meeting goals from the current 2009-2014 Housing Element. Bauer would like to receive input from the commission and any public tonight to make any revisions before the document is sent to HCD.

Work began on the 2014 Housing Element during April 2013. State legislation requires that the update be completed by August 2014 and we are currently on schedule. Any feedback from the commission and the public this evening will be followed by refinements as needed before submittal. It is planned to send the draft Housing Element to HCD for initial review this fall.

In terms of meeting the goals of the 2009-2014 Housing Element, there has been 1 new unit constructed and 56 units rehabilitated so far. The State allows a 1:4 credit ratio for rehab units which gave us a credit for 14 housing units through rehabilitation. RHNA allocated a total of 110 newly constructed housing units in the different categories for Bishop. To date, trends for the current year indicate that the City will receive at least as many credits as in previous years, if not more for 2013 and 2014. This should enable Bishop to fully or near-fully meet the RHNA for the Low and Moderate income categories, and get closer to meeting the need in the Very Low and Above Moderate categories.

For the coming 5 year period, HCD has recognized that cities and counties have faced some unusual obstacles. The 2014-2019 RHNA incorporated a 1-time adjustment to account for the long recession, widespread foreclosures, and high unemployment. Instead of having a need for 110 units, Bishop's needs will be 65 new units, a 40% drop overall.

Each housing plan has an action plan. The Draft Action Plan outlines a total of 14 objectives. Most are goals and programs of prior years, but the current draft also contains several new: expanded mixed use residential area, expanded mixed use concept for Warren Street Improvements Project, consider Whitney Alley for mixed use, City of Los Angeles lands, and economic element update. Bauer would appreciate any feedback from the commission. These new action items relate to a new opportunity the city has in examining the Housing Element through a grant of \$100,000 that the city recently received for an Economic Development Update.

Lowthorp asked if there would be any negative ramifications for not meeting the required numbers. Bauer said that we have never met the required numbers. She added that HCD understands that there are some unique conditions in certain areas and are mostly asking for a good faith effort. Bauer shared that in addition to the grant awarded to the City of Bishop for the Economic Development Update, IMACA was awarded a million dollar grant to begin the refurbishing of the Valley Apartments. And the city is also getting an appraisal on the Silver Peaks project. With these projects, there could be real progress for the 2014-2019 update. Lowthorp then asked if there has been any movement from LADWP on land where Silver Peaks

is proposed to be built. Caldwell said that the Silver Peaks project, which is proposed to include 72-91 residential building units, is for low income residents. It will be built on the vacant land adjacent to Sunrise Mobile Home Park. DWP has surveyed the land, gave the city the approval to appraise the property, and the city is currently in the process. Caldwell explained that one of the downfalls of not meeting HCD's standards is the inability to receive grants from the state. With our housing element and good faith efforts in place, the city was able to receive the last grant. If the Valley Apartments project goes through with 19 re-build units, we would meet our goal of 15 units in the Low Income Group.

Schley pointed out that in our existing Housing Element the city has put forth effort in complying with a lot of our goals in the past four years. A few of the efforts completed from the 2009 Housing Element were the Emergency Shelter Overlay Zone and Transitional and Supportive Housing as well as Reasonable Accommodations.

Chairman Malloy asked for comments from the commission regarding the expanded mixed use zone action plan. Lowthorp commented that he feels Bishop doesn't have any formal zoning but with mixed areas throughout the city limits. Schley commented that Bishop doesn't have much buildable space. Mixed use areas would help provide housing in an obscure way. Lowthorp commented about the expanded mixed use concept for Warren Street. Lowthorp only sees the possibility of building up because of no empty space. Bauer explained that the action plan is for the commission's consideration and does not have to be completed. If having a mixed housing area in the downtown range points to value, we may want to consider the opportunity.

Garcia asked if the city has any incentives for homeowners to do upgrades and improvements to their property. Schley said that the city does not offer incentives for building improvements only water saving incentives are offered. Caldwell added that this past year, the Clean Air group had a grant for wood stove replacements. Many of our unit rehabilitations were due to owners taking advantage of the program.

Heckman brought up the idea of mixed uses on East and West Line Streets since there are already various commercial businesses and residential properties existing. Bauer agreed that it would be very logical to look at those areas and consider.

Huntley asked what happens if a residential property converts into a professional property. Schley stated that it would need to be reported and it would count as a negative for our numbers of new construction. Schley added that he only knows of this happening one time in the past 10 years. Huntley also questioned the vacant property off of Hanby and if the city could purchase the land. Tracy explained that it is a huge difficult process with the county dealing with annexing and taxes.

Huntley stated that he is opposed to the mixed use zones and wants each zone to be in their own area. Lowthorp and Malloy are opposed as well. Bauer said that the mixed use ideas can be taken out of the action plan. Schley asked if a mixed use could be put into undeveloped areas so they could be developed and improved properly. Bauer said that is a possibility although we can remove this from the action items without any issues. Bauer suggested the commission wait to hear feedback from HCD for comments regarding the proposed 2014-2019 Draft Housing Element with the mixed use concept ideas for Warren Street and Whitney Alley removed. And if necessary, we can come back and reconsider. Malloy stated that his inclination is to be guided by Bauer and staff as to what should be included in the draft and once comments come back from HCD there will be plenty of opportunity for more revision. Bauer asked the commission if the mixed use areas did not specify Warren Street and Whitney Alley and was more of a general area would they be more comfortable. Huntley said he would prefer that idea. Malloy believes it would be a good middle as long as it would still meet pursuing goals. Hardy suggested that Warren Street could be a good opportunity but is skeptical about Whitney Alley. Lowthorp added that Whitney Alley is a very small condensed area that can be dangerous if residential were

added. But adding mixed uses to the north end of Warren Street may be workable. Lowthorp said that he would be comfortable leaving Warren Street but removing Whitney Alley and the other commissioners agreed. Garcia suggested making the language more generalized.

Heckman asked what the timing is for HCD to review our update. Bauer didn't specify a time limit but said that HCD usually comes back with their comments the following summer. Bauer said in addition, that at anytime, updates that come available can be provided to the commission throughout the year until we hear back from HCD.

Bauer thanked the commission and staff for the opportunity to work together on this project.

STAFF AND COMMISSION REPORTS:

Caldwell again shared that Tom Hardy has resigned his post as a commissioner. Staff will be moving forward with advertising his position. Caldwell asked if any commissioners would be willing to volunteer to be part of the interview panel when we do interviews for the commission opening. Heckman volunteered and other all commissioners said they may be willing and to just let them know when the interviews are planned to take place. Thomas said she would put out an email when the dates have been decided.

ADJOURNMENT:

Chairman Malloy adjourned the meeting at 8:07 P.M. The next scheduled meeting will be October 29, 2013 at 7:00 P.M. in the City Council Chambers.

Chairman Malloy

Michele Thomas, Secretary

MEMORANDUM

TO: Planning Commission

FROM: Keith Caldwell, Director of Planning

SUBJECT: PUBLIC HEARING – Take Citizen Input on 2014-2019 Draft Housing Element

DATE: January 15, 2014

A Public Hearing has been scheduled to hear and consider public input on the 2014 - 2019 Draft Housing Element. The City of Bishop is currently updating its Housing Element, which is an important part of the overall General Plan. The update focuses on housing needs, an inventory of housing resources and constraints and a statement of housing goals, policies and objectives. Public outreach is an important element of the Housing Element update process. The outreach provides an opportunity to review the Housing Element goals and policies, and invite suggestions for enhancing housing opportunities for all residents.

RECOMMENDATION:

Hold Public Hearing

MEMORANDUM

Date: January 7, 2014

To: Keith Caldwell, City Administrator

From: Gary Schley, Public Services Officer

Subject: 2014-2019 Draft Housing Element Review

Background: Sandra Bauer of Bauer Environmental Services and City staff have completed the Draft 2014-2019 Housing Element. The draft housing element was submitted to the State of California Department of Housing and Community Development (HCD) for their review and comment. After several comments and revisions HCD has preliminarily determined the draft element with revisions meets the statutory requirements of State housing element law. The City's housing element will comply with State housing element law when the draft element and revisions are adopted by the City and submitted to the HCD for approval.

Public participation in the development, adoption and implementation of the housing element is essential to effective housing planning. We are presenting the draft element to the Planning Commission for review and comment. The City will be seeking a recommendation for approval of the draft housing element from the Planning Commission to the City Council. Action on the recommendation is tentatively scheduled for the February 25, 2014 Planning Commission meeting.

I. INTRODUCTION

The Housing Element is one of seven mandatory elements of the General Plan. The purpose of the Housing Element is to identify and analyze existing and projected housing needs, and to set forth the City's goals, policies and implementing actions for the preservation, improvement and development of housing in the City of Bishop. Housing Elements are required by California law to be regularly updated. The current Housing Element covers the 5-year period extending from 2014-2019.

The Government Code requires that each draft Housing Element be reviewed by the California Department of Housing and Community Development (HCD), and that the HCD's findings be incorporated prior to adoption, or that specified findings be made in response to the HCD's comments. A City of Bishop Regional Location Map is provided as Figure 1.

A. BACKGROUND

In 1967, the housing Element became the third mandated part of a General Plan in California. During the ensuing years, numerous revisions were made to the required contents of community housing elements. Article 10.6 of the Government Code was enacted in 1981 and now describes the content requirements of local housing elements. The legislation, commonly referred to as the Roos Bill, requires local housing elements to offer an assessment of housing needs, an inventory of resources and constraints, a statement of goals, policies and objectives and a 5-year housing program. The Housing Element is one of 7 required elements included in the Bishop General Plan. The Housing Element, in complying with the letter and spirit of Article 10.6, responds to the four major issues listed below:

- What are the housing needs of the City of Bishop?
- What can the City realistically do about meeting these needs?
- What are the housing goals and policies of the City?
- What specific actions can the City take to meet housing needs?

What is a Housing Element?

The State of California helps identify local housing needs and requires an action plan from the city to meet those needs.

B. PURPOSE

The purpose of the Housing Element is to identify local housing problems and to identify measures necessary to mitigate and alleviate these needs and problems for all economic segments of the community. General statewide purposes of local housing elements are influenced by the legislative policy and intent of Article 10.6. Section 65581 contains the following description of the legislative intent in enacting the most recent revisions to the housing element law:

"To assure that counties and cities will prepare and implement housing elements which, along with federal and state programs, will move toward attainment of the state housing goal."

"To recognize that each locality is best capable of determining what efforts are required by it to contribute to the attainment of the state housing goal, provided such a determination is compatible with the state housing goals and regional housing needs."

"Local and state governments have a responsibility to use the powers vested in them to facilitate the improvement and development of housing to make adequate provisions for the housing needs of all economic segments of the community."

"The legislature recognizes that in carrying out this responsibility, each local government also has the responsibility to consider economic, environmental, and fiscal factors and community goals set forth in the general plan and to cooperate with other local governments and the state in addressing regional housing needs."

The Housing Element is organized to present information according to the **four** principal topics listed below:

- **Housing Needs Assessment**
- **Inventory of Resources and Constraints**
- **Statement of Goals and Policies**
- **Actions - Five Year Housing Program**

C. AUTHORIZATION

As noted above, housing elements were mandated by legislation enacted in 1967. In 1977, "Housing Element Guidelines" (the "Guidelines") were published by the Dept. of Housing and Community Development (HCD). The Guidelines spelled out the content requirements of housing elements, and also gave the HCD a "review and approval" function over this element of the

General Plan. Passage of the Roos Bill in 1981 enacted Article 10.6 of the Government Code. This bill placed the guidelines into statutory language and changed HCD's role from "review and approval" to one of "review and comment" on local housing elements, and also required an update of the housing element every five years.

Senate Bill 2, which was signed into law on October 15, 2007, amended Government Code Sections 65582, 65583, and 65589.5 of State Housing Element Law. This legislation required local jurisdictions to strengthen provisions for addressing the housing needs of the homeless, including the identification of a zone or zones where emergency shelters are allowed as a permitted use without a conditional use permit.

In 2008, the California legislature adopted Senate Bill 375 which built upon foundations set in California's 2006 climate change law (AB 32). SB 375 regional transportation agencies to develop a "Sustainable Communities Strategy" (SCS) for reducing greenhouse gas emissions, and modified Housing Element Law to achieve consistency between the land use pattern outlined in the SCS and Regional Housing Needs Assessment allocation. The legislation also increased local agencies' accountability for carrying out their housing element plans. With adoption of SB 375, communities that covered by an adopted Regional Transportation Plan became eligible for an extended housing element planning period of 8 years (instead of 5 years). The City of Bishop is not part of a region with an adopted Regional Transportation Plan, and is therefore not subject to the requirements of SB 375.

D. CONSISTENCY WITH OTHER GENERAL PLAN ELEMENTS

State law requires the Housing Element to be consistent with other elements of the General Plan. Residential land uses identified in the Land Use Element provide a basis for identification of adequate residential sites in the Housing Element. The City's recently updated 2012 Mobility Element describes circulation improvements for future development. The Noise Element sets standards to protect areas designated for housing use from inappropriate noise levels. The Safety Element addresses a range of environmental issues. And the Conservation & Open Space Element provides open space and recreational areas for community use. No internal inconsistencies have been identified between the goals of this Housing Element and the goals and policies contained in the remaining elements of the General Plan. In order to maintain compliance and consistency between elements, City conducts an annual review of the General Plan and reports to the City Council on the findings of the review. The City is also currently in the very early stages of a process that will eventually update the General Plan Land Use Element, the Conservation and Open Space Element, and the address Economic Development Element.

E. HOUSING ELEMENT CREATION AND PUBLIC PARTICIPATION

E. HOUSING ELEMENT CREATION AND PUBLIC PARTICIPATION

The 2014 Housing Element Update was prepared by City staff and the Bishop City Council with planning consultant assistance. It is based on guidelines originally set forth as part of the overall Bishop General Plan Update, during which the City Council held a series of public workshops.

Public outreach and participation during the current Housing Element update has encompassed several elements, beginning with a workshop and open house held on 8 February 2011 (between the hours of 4 and 6 pm) to present to the public a proposed zoning amendment that would create an overlay zone in northeastern Bishop where emergency shelters would be allowed by right. Notice of the workshop was advertised in the Inyo Register, provided on the City website, and posted at City Hall and various City locations. The meeting was well attended, with an estimated 25-30 residents stopping by at some point (mostly in the first hour), and generated a wide range of comments and suggestions including a recommendation that the western boundary be shifted slightly eastward to create a more uniform setback, clarification as to how background checks may be conducted, discussion about how to accurately estimate need, confirmation that emergency shelters would be subject to all applicable provisions of the California Environmental Quality Act (CEQA). A public hearing was subsequently held by the Bishop Planning Commission on March 29, 2011 to adopt the zoning amendment.

The most recent public outreach occurred on September 22, 2013, when the Planning Commission held a Public Hearing/Workshop to review and consider the Action Plan recommended with the Draft 2014-2019 Housing Element. Attendance was limited (only 1 member of the public was present), but the discussion (including input from the public participant) was extensive and focused on action items to support the 2014-2019 Housing Element RHNA goals. Notice of this workshop was advertised in the Inyo Register and posted at City Hall (note that all public hearings and workshops are

posted at City Hall and advertised in the Inyo Register, which is the local newspaper most widely circulated in the project area).

Two additional public hearings were held prior to final approval of the 2014-2019 Housing Element. The Planning Commission held a second public review meeting on January 28, 2014, and a third Public Workshop and Hearing on February 25, 2014 [[verify date when final]], that was attended by approximately [[to be completed when final]] members of the public and characterized by discussion and input that included [[to be completed when final]]. The City Council held one additional Public Hearing, on 10 March 2014 [[verify date when final]], to consider a first reading approval of the environmental document and the Housing Element update, and a second reading was held on 24 March [[verify when final]]. Public comment at this hearing included [[complete when final]]. The Planning Commission and the City Council have reaffirmed their commitment to public outreach and participation in tandem with the Housing Element Action Plan that will occur over the next 5-year Housing Element update period.

The draft Housing Element was submitted to HCD for a first review on October 17, 2013. After comments and recommendations were received, the Housing Element was revised and resubmitted to HCD in early November. Following additional revisions, the draft revised Housing Element was submitted to the Planning Commission for a second review on [[to be completed when final]]. The Housing Element was submitted to City Council on [[to be completed when final]] for public hearings and final action, along with approval of environmental documentation that had been prepared by the City in accordance with CEQA Guidelines.

F. COMMUNITY PROFILE

Provided below is an overview of demographic trends in the City of Bishop, drawn from results of the 2010 Census. The profile includes summary information about population growth and trends, household characteristics, special needs populations, and housing stock characteristics in the City of Bishop.

- **Between 2000 and 2010, Bishop's population grew by 8.5%**, which was much faster than the rate of growth in Inyo County as a whole (3.3%), but lower than the growth rate in California (10%).
- **Bishop has become more racially diverse in the past decade** but is still more homogenous than California as a whole (73.9% white v. 57.6% statewide; 0.6% black v. 6.2% in California; 18.6% 'some other race' v. 17.0%; 30.9% Hispanic v. 37.6% statewide; and 2.9% some other race v. 4.9%).
- **The proportion of males to females has increased in Bishop in recent years** (from 47.9% in 2000 to 50% in 2010). Bishop residents are still older than California residents as a whole (median age of 38.9 years for Bishop residents versus 35.2 years statewide), but the City has become more youthful in recent years (with the percentage of persons over 65 falling from 19.2% in 2000 to 15.7% in 2011 (v. 11.5% statewide), and the percentage of persons under 5 years of age increasing from 6.1% to 7.2% (v. 6.8% statewide).
- **Bishop households are smaller than in California** generally (2.37 persons per owner household in Bishop versus 2.97 in the state, and 1.79 persons per rental household in Bishop versus 2.82 generally).
- **Bishop has more renters than the state as a whole (61.3% in Bishop v. 44.1%)**, and rents in Bishop are lower than in California (\$845/month v. \$1,185) as are home values (median value of \$306,000 in Bishop v. \$421,600). Still, Bishop has a higher percentage of households paying more than 30% of income toward housing costs than residents statewide (72/9% in Bishop v. 55/7% statewide).
- **Bishop residents have a lower poverty rate than California residents generally (13.2% v. 14.4% statewide)**, even though Bishop has a median household income less than half of California residents as a whole (\$34,258 v. \$70,231). 65% of Bishop residents are employed (compared to 58.1% statewide), and Bishop workers are more likely to work in management and business (37.9% v. 36.5%), and be employed by the government (21.4% v. 14.7%) and less likely to work in sales (19.1% v. 25% statewide) and be self-employed (7/4% in Bishop v. 8.6% statewide).

G. PROGRESS UNDER PREVIOUS GENERAL PLAN HOUSING ELEMENT

Unlike most other General Plan elements, the Housing Element is required to summarize the progress achieved under the previous Element. The 2009 City of Bishop Housing Element contained a number of goals and policies related to the provision of adequate housing for all segments of the population. The 2009 Housing Element also contained specific quantified objectives. The policy goals and the quantified objectives were organized according to eleven primary categories of action as identified below:

G.1-CITY OF LOS ANGELES LANDS: Continue to work with City of Los Angeles towards purchase, transfer or long-term lease of vacant City of Los Angeles DWP land to the City of Bishop for residential development, including affordable housing. Anticipated number of units: 75-100.

Outcome: Communication and cooperation with the City of Los Angeles is an ongoing responsibility for both agencies. The City of Los Angeles has not yet released the parcel which the City of Bishop previously identified for residential development. However, the City of Bishop anticipates that this parcel may become available during the period of the current housing element update (2014-2018). When the parcel does become available, the City of Bishop intends that it will be developed for residential use, including affordable housing to meet the needs of City residents. The City of Los Angeles has recently elected a new mayor, and Bishop plans to establish communication with the new administration in service of this objective.

G.2-EMERGENCY SHELTERS, TRANSITIONAL AND SUPPORTIVE HOUSING: Revise Zoning Ordinance to permit emergency shelters, in one or more commercial and/or R-3 residential zoning districts without discretionary approval. The zoning ordinance amendment for emergency shelters shall be completed within one year of approval of this Housing Element. Transitional and supportive housing are considered residential uses and must be subject only to the same restrictions that apply to other residential uses in the same zone. Development standards for emergency shelters will encourage and facilitate the use and only subject shelters to the same development and management standards that apply to other allowed uses within in the identified zone.

Outcome: The City Council adopted Ordinance 535 on April 25, 2011 approving the ES emergency shelter combining district (the district includes C-1, R-3 R-3-P zoning) to permit a specified area in which emergency shelters are allowed by right. This ES combining district was selected because it reflects a close association with, provides convenience access to, and is compatible with a range of complementary services including the availability of public transportation, basic goods and grocery stores, and social welfare facilities. On April 22, 2013, the Bishop City Council adopted Ordinance 544 which expanded the ES emergency shelter combining district to incorporate supportive housing and transitional housing developments as uses that are permitted by right. As with the ES district generally, this location provides a range of services that complement and support transitional and supportive housing. A Copy of Ordinance No. 535 is provided in Appendix A and a copy of Ordinance No. 544 is provided in Appendix B.

G.3-REASONABLE ACCOMMODATION PROCEDURES: Create and adopt in a timely manner a formal reasonable accommodation procedure for zoning, land use, permit processing and building codes to ensure that local land use regulations facilitate modifications that would allow disabled persons to remain in their homes as long as possible, and do not unnecessarily constrain the development, maintenance and improvement of housing for persons with disabilities.

Outcome: The City of Bishop City Council adopted Ordinance 543 on 26 March 2013 to ensure that individuals with disabilities receive reasonable accommodation in rules, policies, practices and procedures to ensure equal access to housing and facilitate the development of housing for individuals with disabilities. The ordinance established a procedure for making requests for reasonable accommodation in land use, zoning and building regulations, policies, practices and procedures of the jurisdiction to comply fully with the intent and purpose of fair housing laws. A copy of Ordinance 543 is provided in Appendix C.

G.4-DENSITY BONUSES: Give density bonuses to developers who construct infill projects to generate the maximum number of dwelling units in a limited space and to guarantee the set-aside of affordable/senior/disabled units.

Outcome: The City has received only one application for residential development since the 2009 Housing Element was completed; the one application was for an affordable single family unit. There has been no opportunity to grant density bonuses for infill development. However, it is the policy of the City of Bishop to comply with state laws governing density bonuses, and the City will readily provide such bonuses when the opportunity arises to do so. In order to stimulate job growth for its youth, the City is actively seeking to invite out-of-town businesses to relocate in Bishop and is simultaneously working with the community, the Council and local builders to identify ways to expand housing opportunities and meet future needs if the business expansion efforts are successful.

G.5-MOBILE HOME PARK RESIDENT OWNERSHIP PROGRAM (MPROP): Facilitate MPROP by advertising its availability to mobile home park residents and by serving as co-applicant for resident organizations applying for HCD funding.

Outcome: The City continues to own the mobile home park that serves a predominantly very-low and low income population, and in which fully 60% of the residents have successfully purchased their units with the City's assistance. Additionally, there are a number of privately-owned mobile home parks in Bishop, and the residents in these private parks are also encouraged to purchase their units. Residents are assisted in their efforts by Mammoth Lakes Housing, which the City supports with funding. Mammoth Lakes Housing offers guidance in the application process, serves as co-applicant where needed, and also provides funding assistance.

G.6-COMMERCIAL/RESIDENTIAL MIXED USE: Encourage encroachment of residential uses into selected commercial zones.

Outcome: The City has actively encouraged the encroachment of residential units into the downtown area through creation of the ES emergency shelter combining district which includes C-1, R-3 and R-3-P zoning in an area with good access to services, social welfare facilities and public transportation. The City is also pursuing the Warren Street Improvement Project. This corridor is parallel to and west of Main Street, and already allows a mix of residential, commercial and business uses. Planned improvements will include pedestrian friendly sidewalks, seating and benches, areas for street performances, decorative planters and shade trees, banners, pocket parks, restrooms and other elements to expand and enhance the downtown area for wider community participation and activities.

G.7-MONITOR HOUSING STOCK: The City will monitor the housing stock to ensure that properties in the minor and moderate categories do not slip into lower categories.

Outcome: The City's Public Services Officer makes weekly drives around the City to check on the condition of housing and to check on the condition of street drainage facilities and the condition of street lighting, curbs and gutters, and similar municipal improvements, and also offers assistance and public education as needed for residents who have problems with code compliance. To maintain the affordability of housing, the City has very low building permit fees. These activities are designed to ensure that low and moderate income residential areas remain available to meet the housing needs of local residents, more than 53% of which fall within the low to moderate income category.

G.8-HCD COORDINATION: City will work with HCD to seek a case-by-case waiver that would allow HCD funding on property leased for 40 years (which is the maximum allowed by the City of Los Angeles) instead of 55 years (which is the current minimum period set by HCD) and to seek assistance in resolution of incompatible loan terms wherein federal and state agencies will consummate a grant only after the other agency makes the first loan commitment. The City will also seek HCD assistance in establishing program terms that allow the City of Los Angeles and the City of Bishop to share affordable housing credits in cases where LADWP lands are sold or leased through the aegis of the City of Bishop for the purpose of providing affordable housing opportunities. Finally, the City and IMACA will continue to pursue all applicable grant and funding opportunities to assist in the development of housing for extremely-low, very low, low and moderate income households. The timing of such applications will be shaped by the notification of dates for the filing of applications.

Outcome: Since the 2009 Housing Element, the City's long-term City Manager (Rick Pucci) retired from office and the position was filled by a temporary City Manager who was succeeded in January 2012 by a new permanent City Manager, Keith Caldwell. This task is a priority objective for the City of Bishop due to the importance of HCD and the City of Los Angeles to meeting the City's housing goals. The new City Manager is familiar with the difficulties posed by incompatible loan terms for HCD project efforts, and has already spoken with HCD about the City's goal to resolve this issue. The City Manager plans to meet with HCD and with the City of Los Angeles in coming months to identify ways in which the conflict might be resolved to facilitate a successful outcome for future efforts.

G.9-PUBLIC EDUCATION: Assist IMACA in the preparation and distribution of literature that describes equal housing opportunities and promotes public access to this resource. Provide information about weatherization programs and drought-tolerant plant materials.

Outcome: The City has actively assisted IMACA in public education and outreach during the term of the 2009 Housing Element and plans to continue such efforts through the entirety of the current 2014 Housing Element. These efforts have been wide ranging and highly successful, including the rehabilitation by IMACA of 10 dwelling units to provide for weatherization, insulated windows, energy efficient heating, and repairs to electrical and plumbing systems. The City also provides free information handouts and literature both at City Hall and through IMACA, and routinely drives informally around residential areas to talk with homeowners about the range of information and assistance available to help Bishop residents access housing assistance, resources and information.

G.10-COMPREHENSIVE INVENTORY: In preparation for the 2014 Housing Element update, the City will work with IMACA to develop a more thorough inventory of trailer parks, mobile home parks and apartments provide housing for disadvantaged populations, as well as programs that provide housing assistance to disadvantaged populations, in the City of Bishop.

Outcome: The City and IMACA have monitored the status of affordable apartments, trailer and mobile home units throughout the prior 2009-2014 Housing Element. During that time, four trailer park units were replaced by two modular units at a facility that had been rated as 'dilapidated' during the 2003 housing survey and is now rated as good under all criteria; the 2013 survey indicates that there have been improvements at several additional facilities as well (as has been true for permanent housing), but no further inventory reductions. Economic conditions have restrained housing values during the past 4 years, and the City anticipates that prices may

begin to rise as the economy strengthens over the coming months. Over the next four years, the City and IMACA will continue to monitor the inventory of apartments, trailer and mobile home units to ensure that this pool of affordable units remains available to residents of Bishop.

G.11-AFFORDABLE HOUSING ASSISTANCE PROGRAM: The City will formalize a program within 2 years of Housing Element approval to assist with the development of affordable housing with a particular focus on the needs of low income and extremely low income residents of Bishop. Emphasis will be placed on provision of family housing as well as non-traditional housing (such as single room occupancy and transitional housing). At a minimum, this program will include (a) continued support to IMACA in identifying grant opportunities and in preparing grant applications for low- and extremely low-income housing projects, (b) priority processing and a waiver or deferral of building and remodel permit fees for projects that provide affordable housing assistance to assist extremely-low, very low, low and moderate income households, and (c) outreach to developers to incentivize the development of housing for households earning 30% or less of Inyo County median family income.

Outcome: *The City of Bishop has continued to provide support to IMACA in identifying grant opportunities and assisting in the preparation of grant applications for low and extremely-low income housing projects. The most recent application for a Community Development Block Grant, submitted in April 2013, was successful and will be used to fund rehabilitation of the Valley Apartments, a multi-family housing facility that serves low income residents of Bishop. The City was also awarded CDBG funds to support preparation of an update to its Economic Development Element. The City policy remains in effect to support affordable housing projects with priority assistance and low building permit fees. The City also has maintained communication with local builders about the (albeit limited) availability of parcels for development as well as lands that may become available through the purchase, transfer or long-term lease of vacant City of Los Angeles DWP land. Only one new housing unit (an affordable unit) has been developed in Bishop since the 2009 Housing Element was approved, but with completion in 2014 of the Fiber Optic Cable that will provide hi-speed internet access throughout Owens Valley, the City is now actively encouraging out-of-town businesses to consider Bishop for training sessions and relocation, and is simultaneously working with the community, the Council and local builders to consider ways to meet future housing needs if the business expansion efforts are successful.*

G.12-SUMMARY OF PROGRESS UNDER 2009-2014 HOUSING ELEMENT

The objectives contained in the current City of Bishop *Housing Element Update* reflect the guidelines set forth by HCD in the most recent Regional Housing Allocation Model. Thus, the overall goal for new housing construction between 2014 and 2019 is set at 65 units, which would call for about 13 new units each year. This Housing Element Update generally maintains the objectives set forth in 2009 for housing conservation and housing rehabilitation, reflecting the City's expectation that the forthcoming Housing Element compliance period will see continued strength in the number of permits issued by the City for home improvements at all income levels. Table 1 shows the 2009-2014 and the 2014-2019 objectives for new housing construction by income group.

Table 1
SUMMARY OF BISHOP 5-YEAR ACTION PLAN GOALS
FOR 2009-2014, 2014-2019

RECOMMENDED ACTION	TOTAL NEED 2009-2014	TOTAL NEED 2014-2019
New Housing Construction	110	65
Very Low & Extremely Low Income Units	26	15
Low & other Lower Income Units	15	10
Moderate Income Units	19	12
Above-Moderate Income Units	50	28

The current update reviews the City's progress in achieving goals set forth in 2004. Table 2 summarizes the extent to which the numeric objectives were accomplished for each of the primary categories during the period from 2008-2014.

Table 2
CITY OF BISHOP 2009-2014 HOUSING ELEMENT
SUMMARY OF 5-YEAR ACTION PLAN ACHIEVEMENTS FOR 2009-2014

RECOMMENDED ACTION	TOTAL NEED (2009-2014)	COMPLIANCE TOTAL	SURPLUS (SHORTFALL)
Very Low Income Units	26	1 ¹	(25)
Low and Other Lower Income Units	15	11.5	(3.5)
Moderate Income Units	19	13.5	(5.5)
Above-Moderate Income Units	50	45	(45)
TOTALS	110	31	(79)

[[TABLE 2 & TEXT BELOW TO BE FINALIZED WHEN 2013 BISHOP HOUSING DATA IS AVAILABLE]]

The City did/did not meet RHNA goals for any income category during the 2009-2014 planning period. Only one home was constructed in Bishop during this 5-year period. That one home did fall within the Very Low Income category. Additionally, 121 units were rehabilitated over this period, all of which fell within the very low, low, moderate and above moderate income levels. The HCD allows cities to take a 1:4 ratio credit for rehabilitation projects, in terms of meeting the Regional Housing Need Analysis numbers that have been incorporated into the Housing Element. The 121 units rehabilitated during 2009-2014 therefore qualify for 30 credits. IMACA provided additional rehabilitation during this period, but because these efforts focused on non-eligible improvements (weatherization, insulated window replacements, energy efficient appliances and electrical and plumbing repairs) none were included in the 1:4 ratio represented in Table 2.

Although rehabilitation activities allowed the City of Bishop to achieve substantial progress toward compliance, it is evident in Table 2 above that the City continues to experience a shortfall in housing opportunities at all income levels. The lack of available privately owned land and the reluctance of the City of Los Angeles to sell or lease land on a long-term basis continue to be primary obstacles to new housing development. Additionally, as discussed in §IV.D.1 of this Housing Element, Bishop has been significantly impacted by economic conditions over the past 5 years which has further constrained new housing development.

Implementation tasks to be undertaken by the City for the 2014-2019 Housing Element update will focus on continuing efforts to buy or lease parcels from the City of Los Angeles, and the potential to expand the downtown mixed-use overlay zone to permit a wider range of housing opportunities. The City has seen signs of economic revival in recent months, and anticipates that conditions will continue to improve along with expanded affordable housing opportunities over the next 5-year period.

Key goals identified in the prior Housing Element included continued work with the City of Los Angeles, zoning code revisions to incorporate provisions for emergency shelters and transitional and supportive housing, adoption of a procedure for reasonable accommodation, density bonuses for affordable housing developers, strengthening the mobile home park resident ownership program, mixed land use areas the permit residential and commercial uses, continued monitoring of the housing stock, a strengthened relationship with HCD to resolve conflicting lease provisions and enhance grant opportunities for IMACA, Mammoth Housing and the City, continuing public education, development of a more thorough inventory of affordable housing, and formalized efforts to assist IMACA with grants, prioritize the processing of affordable housing projects, and outreach to incentivize development of affordable housing. Although economic constraints have dampened the success of many efforts, the past 5 years have nonetheless been very productive in creating conditions that will foster affordable housing in the future.

The following summary describes the programs available to residents of Bishop, as well as the goals and objectives that have been achieved since the 2009 Housing Element Update was prepared. Please see §III.F for a discussion of programs that will facilitate achievement of the goals for 2014-2019.

¹ Note that only one housing unit (of any price) has been constructed in Bishop since the 2009 Housing Element was approved. That one unit was in the 'very low income' price range, as shown in Table 2.

Housing Choice Voucher (HCV) Assistance Program

The HCV Assistance program (formerly Section 8) provides vouchers that eligible families can apply to rental costs at the housing units of their choice. The vouchers are issued for the County, and not specifically to the City. In 2004 there were 29 vouchers allocated to Inyo County residents as a whole. Of these, 15 vouchers were issued to City of Bishop residents. Currently, there are 29 vouchers allocated to Inyo County, 10 of which were issued to residents in the City of Bishop.

- Project - As of July 2013, 10 vouchers have been issued to qualified residents in Bishop. There are no available vouchers as of July 2013, and the waiting list includes 28 residents throughout Inyo County. IMACA now considers the Program to be closed, at least temporarily, and Stanislaus Housing Authority is not accepting any new applications at this time.
- Status – Vouchers have been distributed to eligible families
- Timing – Ongoing as of 2009
- Lead Agency -Inyo-Mono Advocates for Community Action (IMACA)
- Funding – U.S. Department of Housing and Urban Development, §8 existing Housing Rental Assistance through Stanislaus Housing Authority

Land Banking-Pre-development Acquisition

- Objective -Provide housing options for low to moderate income households
- Timing – Ongoing through the Eastern Sierra Land Trust
- Responsibility – IMACA
- Funding -The HCD Rural Land Purchase Funds
- Status –The executive director of IMACA monitors and responds promptly to statewide programs and funding opportunities that may benefit Bishop and other IMACA service areas.

Elderly /Disabled Housing Assistance Programs

- Objective -To provide housing opportunities to special needs households
- Timing -Ongoing
- Responsibility – Varies depending on program (could include the City, IMACA, Salvation Army, and/or Inyo County)
- Status – During the term of the 2009-2014 Housing Element, IMACA received funding for the Silver Peaks project with 72 senior/disabled apartment units. The grants could not be utilized due to various property lease issues. However, IMACA in 2013 sought \$1 million in funding through the Community Development Block Grant program to reconstruct the Valley Apartments. This application was successful, and IMACA plans to initiate this effort late in 2013, seeking supplemental funding as needed to complete this project opportunities during the term of the current Housing Element. In addition, the City of Bishop has commissioned an appraisal of the Silver Peaks project site, with the goal of submitting a purchase offer (if feasible) during the term of the 2014-2019 Housing Element and proceeding with this senior/disabled housing project if feasible.

The Homeless Prevention Program is a new IMACA resource funded through a grant from the Dept. of Community Services & Development.

Housing Rehabilitation -HCD/CDBG/RECD

- Objective -To preserve the supply & quality of housing in the planning area and rehabilitate as many homes as possible
- Timing -1985 to present
- Responsibility – Varies (could include Bishop, IMACA, or the County of Inyo)
- Status - Funding has been pursued as projects become available; no projects have been completed since the 2004 Housing Element.

Energy Crisis Assistance / Weatherization Program

- Objective -Provide weatherization and emergency energy assistance to low income Bishop households
- Timing -Continuous Responsibility -IMACA
- Status – IMACA administers both Weatherization and Energy Assistance Programs in Inyo and Mono Counties. IMACA does not currently have a contract with Inyo County to provide these services. Most of the funding for the IMACA programs is provided through the State Department of Community Services and Development (CSD). Additionally, both IMACA and SCE programs assist Bishop households each year with energy efficient refrigerators.

Emergency Crisis Assistance

- Objective -Provide emergency housing assistance to low income Bishop households
- Timing -Continuous Responsibility - IMACA with assistance from other agencies (e.g., Salvation Army)
- Status -Assistance as needed for eviction prevention, temporary housing, homeless assistance, first month rental and utility deposits funded through FEMA and TFAP, vouchers for 1-2 night stays at local hotels (The Trees and El Rancho), as well as assistance to programs available at the County-run Wellness Center at the Elm Tree trailer park. IMACA recently received a \$100,000 grant through the State CSBG Program for Homeless Services to provide emergency shelter vouchers, and rental and deposit assistance for one year (from June 1, 2013 to May 31, 2014). The grant is also to establish a Continuum of Care coalition of homelessness prevention stakeholders in the Eastern Sierra to continue funding for these services.

Program to Assist in Development of Low-Moderate Housing

- Objective – Facilitate the development of housing affordable to lower-and moderate-income households by establishing and maintaining a list of developers with the capacity to do so. Developers are apprised of the City's efforts to identify parcels for affordable housing, funding sources that can subsidize construction of affordable housing, and any incentives/concessions associated with the application for such funding.
- Timing -Ongoing
- Responsibility – City of Bishop with assistance from IMACA and other agencies
- Status –The City regularly consults with developers and IMACA to ensure that affordable housing opportunities are included in new projects.

Governmental Constraints Program: SB 520 (Persons with Disabilities)

- Objective – To ensure that local land use regulations do not unnecessarily constrain the development, maintenance and improvements of housing for persons with disabilities.
- Program Description – The City will provide a formal reasonable accommodation procedure for its zoning, land use, permit processing and building codes to ensure local land use regulations do not unnecessarily constrain the development, maintenance and improvement of housing for persons with disabilities.
- Timing – Ongoing.
- Responsibility – Bishop Planning Department.
- Status – The City has updated and streamlined codes and the permit process to facilitate development, maintenance and improvement of housing for persons with disabilities.

Homeless Prevention Program

- Objective – To assist Inyo and Mono County residents who are facing homelessness to move toward greater independence through emergency shelter vouchers (for 1-3 night stays), rental deposit assistance (for 1-3 months' rent) and related services.
- Timing – Initiated in July 2013.
- Responsibility – IMACA.
- Status—The Homeless Prevention Program is a new IMACA resource funded through a recently-awarded \$100,000 grant from the California Department of Community Services and Development.²

Fair Housing Program

- Objective – Refer Fair Housing complaints to IMACA for resolution including landlord/tenant mediation & fair housing investigations. The City will assist IMACA in distributing materials from the Dept. of Fair Housing & Employment throughout the community including public locations such as City Hall, the post office and library, and shopping areas.
- Timing – Ongoing.
- Responsibility – Bishop Planning Department.
- Status—Ongoing

Results of this analysis have been used to reassess and strengthen the Goals, Policies and Actions of the 2014-2019 City of Bishop Housing Element. The Goals, Policies and Actions of this updated Housing Element will support prior

² IMACA Website, 8 July 2013, and The Inyo Register, 5 July 2013, *IMACA Working to Prevent Homelessness*.

accomplishments and form the basis for meeting future housing needs of the residents of the City of Bishop.

H. NEW COMPONENTS: SB 812

Pursuant to SB 812, the current Housing Element addresses the housing needs of the City's developmentally disabled residents in accordance with requirements of SB 812. This analysis includes an estimate of the number of persons with developmental disabilities, an assessment of the housing need, and a discussion of potential resources. A "developmental disability" is in turn defined as a disability that originates before an individual becomes 18 years old, continues (or can be expected to continue) indefinitely, and constitutes a substantial disability for that individual, including mental retardation, cerebral palsy, epilepsy, and autism. Section IV.C.5 provides a discussion and analysis of the developmentally disabled.

I DATA SOURCES

The Department of Housing and Community Development provided census data, along with additional demographic data sources including American Factfinder, City Facts, and American Towns. Other sources included staff at the City of Bishop; Larry Emerson (Executive Director of IMACA) and Cathy Keesler (IMACA Housing Program Specialist); Jennifer Halferty (Executive Director of Mammoth Lakes Housing) and Pam Hennity (former Executive Director of Mammoth Lakes Housing), Randi Pritchard (Eastern Sierra Realty); Denelle Carrington, Eastern Sierra Area Agency on Aging;

II. SUMMARY OF OPPORTUNITIES & CONSTRAINTS

A. LAND AVAILABILITY ISSUES

As of 2014, the vast majority of vacant buildable parcels within the city limits continue to be owned by the City of Los Angeles. Over the years the City has conducted ongoing negotiations with the City of Los Angeles to acquire parcels for use in building affordable/senior/disabled housing projects. At times the City of Los Angeles has issued letters of intent to sell parcels; negotiations have been derailed for various reasons, including change of management at Los Angeles DWP. The City will continue to work with the City of Los Angeles DWP in an effort to secure sale or long-term lease of parcels. Additionally, the City will more proactively seek HCD assistance to reconcile incompatible lease terms (wherein the City of Los Angeles will lease for a maximum of 40 years³ but affordable housing funding agencies require a minimum 55-year lease), and incompatible grant terms (where federal and state agencies will consummate a grant only after the other agency makes the first loan commitment). The City will also seek HCD assistance to establish provisions where the City of Los Angeles and the City of Bishop can share affordable housing credits in cases where LADWP lands are sold or leased through the aegis of the City of Bishop for the purposes of providing affordable housing opportunities. Preliminary contact with HCD has already been initiated, and the City will follow up in coming months to seek HCD guidance in resolving these high priority issues.

B. LAND USE POLICY ISSUES

The City has considered how the General Plan and Zoning policies can be strengthened to encourage adequate and safe housing opportunities for all residents, and has determined that these goals can best be served through five measures. The measures are outlined below along with a brief discussion of steps that have been taken to implement the measures and thereby achieve the underlying goals:

- 1. Identify one or two neighborhoods of increased densities in existing residential neighborhoods or redesignation of other land uses to residential uses in order to meet affordable housing needs in Bishop:** Since the 2009-2014 Housing Element was adopted, the City has identified a downtown neighborhood and established an overlay zone that permits mixed uses and densities in a location proximate to transportation and services. For the 2014-2019 Housing Element, the City will consider expanding this overlay zone to take in lands west of Main Street along the evolving Warren Street corridor.
- 2. Ease restrictions on mixed residential/commercial use of commercial land:** The adopted overlay zone accomplishes this goal, and the City plans to consider expanding the area in which mixed uses are allowed, during the current Housing Element term (2014-2019), to include lands west of Main Street.
- 3. Monitor conversion of duplex/triplex/quadruplex/mobile units to single family units:** in concern with IMACA, the City has continued to monitor its inventory of multiplex and mobile home units to ensure that this affordable housing resource remains available to Bishop residents. Since the prior Housing Element was adopted, four trailer park units

³There is a single pending exception for a 50-year lease for a potential City Park property.

were replaced by two modular units at a facility that had been rated as ‘dilapidated’ during the 2003 housing survey and is now rated as good under all criteria; the 2013 survey indicates that there have been improvements at several additional facilities as well (as has been true for permanent housing), but no further inventory reductions.

4. Consider Interface Zoning Overlay that allows a CUP for nonconforming residential uses: This measure continues to be evaluated by the City, particularly in connection with use of CUPs for onsite housing at employment sites. Additionally, the City has continued to support and experience widespread development of second units. These units have provided a continued supply of affordable housing options and helped to somewhat overcome the limitations on available land as well as the inventory of housing options for residents of Bishop.

5. Change the Zoning policies to permit construction of emergency shelters without a CUP in one or more zones: This measure was accomplished during the term of the 2009-2014 Housing Element, and has helped to pave the way for the upcoming focus on expanding the mixed use zoning overlay as described in Items 1 and 2 above.

C. OPPORTUNITIES

In addition to opportunities associated with the land use policy issues above, the City has various tools at its disposal to support development of affordable housing:

- **Density Bonuses:** The City continues to support the use of density bonuses to optimize affordable housing development, and has continued to expand infrastructure and public facilities since the 2009 Housing Element was adopted. The City is currently embarking on a project to identify standards for curbside drainage on local routes throughout the City.
- **Employment Housing:** Continue to evaluate opportunities to issue conditional use permits for on-site housing at employment sites. Local employers have occasionally expressed interest in assisting with housing development activities as a means to attract and retain employees, and this tool may also support future efforts to attract technology firms in light of the new fiber optic cable serving Owens Valley.
- **HCD Assistance:** Seek HCD assistance to reconcile incompatible lease terms wherein the City of Los Angeles will lease for up to 40 years but affordable housing funding agencies require a minimum of 55-year leases)
- **Shared Credits:** Explore with the City of Los Angeles the possibility of sharing affordable housing credits in cases where LADWP lands are sold or leased through the aegis of the City of Bishop to provide affordable housing opportunities.

Only 2% of the land in Inyo County is privately owned—the rest is owned by governmental or tribal entities.

D. CONSTRAINTS

Lack of available land is the single largest constraint to development in the City of Bishop. Less than one half acre of privately-owned developable land is located inside the Bishop City limits; the remaining undeveloped properties are owned by the City of Los Angeles. Only 2% of the land area County-wide is privately owned; the remainder is owned by governmental or tribal entities. The limits on land availability have not substantively changed since the 2009 Housing Element was adopted.

III. EXISTING CONDITIONS - HOUSING NEEDS ASSESSMENT

Housing element law requires a quantification and analysis of existing housing needs. The Housing Needs Assessment provided in this section is based on a *Housing Element Data Package* provided by HCD. The package addresses the statutory requirements for the quantification of existing housing needs, including:

- Identification of population and employment trends;
- Household characteristics (i.e., existing households, existing extremely low income households, lower and extremely low income households overpaying, overcrowded households);
- Special needs (i.e., number of persons with disabilities, persons with developmental disabilities, female headed households);
- Projected housing needs; and
- Inventory of at-risk units

Agencies that use the HCD-prepared *Data Package* are not be subject to further HCD review as part of the housing element update process. As required, however, this section of the Housing Element offers an analysis of the *Housing Element Data Package* data as appropriate.

A. EXISTING POPULATION AND HOUSING STATISTICS

A.1 Population

After increasing by less than 3% between 1990-2000 (increasing from 3,475 to 3,575), the population experienced a more robust 8% growth rate over the decade between 2000 and 2010 (increasing from 3,575 to 3,879). The City’s population as of January 2013 (3,877) is essentially unchanged from the 2010 Census. As before, the City’s growth has continued to parallel that of Inyo County as a whole, comprising 20.9% of the County total (compared with just under 20% in 2008).

TABLE 3⁴

Population Growth Trends 2010 -2013							
COUNTY/CITY	Population 4/1/2000	Population 4/1/2010	Population 1/1/2011	Population 1/1/2012	Population 1/1/2013	Avg. Ann Change	
						Number #	Percent %
Inyo County							
Bishop		3,879	3,859	3,876	3,877	-1	0.0%
Balance Of County		14,667	14,630	14,671	14,696	8	0.1%
County Total		18,546	18,489	18,547	18,573	8	0.0%

The number of housing units increased by a much smaller share, increasing from 1,867 to 1,926 (a 3% increase overall) in the decade between 2000 and 2010. Vacancy rates declined from 9.8% to 9.24% during this time, while occupancy rates increased from 2.077 persons per household to 2.157 persons per household. As shown in Table 4, the housing unit increase was most pronounced for multifamily housing (a 20.9% increase) while the number of single family homes declined by 7.6%. *These data suggest that the City has continued to provide affordable housing options to its residents despite the many constraints listed in §II above.*

TABLE 4

E-8 City/County/State Population and Housing Estimates, 2000 and 2010										
County / City	Date	HOUSING UNITS							Vacancy Rate	Persons Per Household
		Total	Single	Multiple	Mobile Homes	Households	Vacant Units

A.2 Employment Trends

A total of 1,955 civilian residents of Bishop were employed as of 2011; this reflects a relatively significant increase over the 2000 employment total of 1,635. Table 5 summarizes 2011 employment by sector for Inyo County and Bishop. One measure of the balance between employment opportunities and residents’ needs is a “jobs-housing balance” test. Generally, a balanced community would have a ratio of one job for every housing unit, theoretically enabling most residents to also work in the community. As of 2011, there were 1,684 occupied households in Bishop, and 1,955 employed individuals. This yields a ratio of 1.16 jobs per household for the City as a whole (compared with 1.05 jobs per household in 2008). These data indicating a continuing improvement from the 2000 Census results of 0.97 jobs per household. As noted in prior Housing Elements, the findings are not surprising given the distance from most Inyo County towns to workplaces outside the County. *In whole, the data reflect a satisfactory “jobs-housing balance” in Bishop and the greater Bishop community.*

A.3 Overcrowding and Household Size

Overcrowding and household size are important housing indicators. Household size is defined as the number of people per dwelling, and overcrowding exists when there are more than 1.01 persons per room (the 1.01 factor is established by the federal government as a standard or measure of overcrowding). Both factors indicate whether the existing housing stock meets occupant space needs.

Overcrowding appears to be a function of household size, income and tenure. Information from the 1970 Census indicated that 5% of Bishop planning area households encountered overcrowded conditions. Census data for 1980 put the percentage at 4.4%, the 1980 Census at 5.5%, the 1990 Census at 5.5%, and both the 2000 and 2010 Census at 5.0%. As shown in Table 6, there is no severe overcrowding in Bishop (including both owner-occupied and renter-occupied units). *These data indicate that overcrowding is a relatively stable and minor problem for area households.*

TABLE 6

Overcrowded Households (2011)

A.4 Overpayment

In addition to statistical data on total households and vacancy rates, it is useful to analyze data on housing overpayment to understand the housing situation in Bishop, particularly for lower income households. Table 7 compares housing costs as a percentage of income for Owner and Renter households, as well as total households, as of 2011 for Inyo County as a whole,

Bishop, and the unincorporated lands. Note that HCD considers housing costs over 25% of income to be “overpayment.”

As shown in Table 7 (following page) 73.8% of all Bishop renter households met the HCD criteria for overpayment for housing costs, compared with 37.7% of owner households. Both of these measures show a significant increase over 2000 Census data, when 54% of renter households and 25.8% of owner households were overpaying. The decade between 2000-2010 was particularly volatile for housing, which has undoubtedly contributed to the worsening overpayment problem. However, as discussed above, *the increased supply of multifamily and mobile home housing opportunities has outstripped the increase in population of Bishop, which may point to a reduced overpayment problem in the years ahead.*

A.5 Housing Tenure

As shown in Table 8, the estimated number of owner-occupied units in Bishop as of 2011 was 730 units (an increase over the 701 owner-occupied units in 2000), with 1,146 renter-occupied units as of 2011 compared with 958 renter-occupied units in 2000.

TABLE 8

Source: ACS 2011, 5-year

Bishop household size varies between owner- and renter-occupied units, with an average of 2.37 occupants in owner-occupied dwelling types (2000 Census) and an average of 1.79 occupants per rental unit. This represents a continuation of a long-standing trend towards smaller household sizes in the City as evidenced by the fact that the average Bishop household size in 1960 was 3.0 persons. The Bishop population in 2000 was younger overall (with 22.4% of residents age 60 or older) than in 2008, when 25.8% of residents were age 60 or older. As shown in Table 9, this trend has continued with 30% of Bishop residents now in the 60+ year age bracket. Almost 40% of owner-occupied units fall into this group, whereas renters are a comparatively younger proportion of the overall Bishop population (18.6% age 60 or older).

Some localities have established density bonus programs for developers who build units that can accommodate large families (i.e., households with 5 or more persons). Other jurisdictions have reduced parking requirements, waived fees or expedited processing of permits for projects providing some additional units with three or more bedrooms. *This does not appear warranted for Bishop. As shown in Table 10, there were no rental households in Bishop with 5 or more persons as of 2011, and there were only 47 owner-occupied units with 5 or more persons (none with 6 or more).* Overall, household sizes continue to reflect societal changes, including reduced family size and lower birth rates. These factors result in continued need for new housing formation since smaller households require a greater number of dwelling units to house an equivalent size population.

A.6 Housing Stock

There are differences between housing stock condition and housing improvement needs. The term "condition" refers to the physical quality of the housing stock. The quality of the individual housing units or structures may be defined as sound, deteriorating or dilapidated. Housing improvements, on the other hand, refer to the nature of the "remedial" actions necessary to correct defects in the housing condition such as demolition, minor repairs, major repairs, and rehabilitation. As of the 2010 Census (see Summary Table 20)-, the City of Bishop had a housing stock comprised of 2,041 total dwelling units, compared to 1,894 total units in January 2008. As shown in Table 11, single family dwellings continue to represent a majority of the City's housing units

As shown in Table 20 (Summary of Selected Census Data), there are 10 residences in the City of Bishop that lack complete plumbing facilities, 100 residences that lack complete kitchen facilities, and 113 residences that have no telephone service. These are the units with a critical need for rehabilitation. The Bishop Code Enforcement and Public Safety Officer would have knowledge of these conditions only if a complaint is filed, and when complaints are received the City takes prompt action. To date, however, no such complaints have been received by the City nor is the City aware of any such units. As a result, the current Housing Element does not contain any action items pertaining to these units.

A.7 Vacancy Rates

Table 10 presents housing stock data by type of vacancy as of the 2010 Census. As shown, the 2010 vacancy rate in Bishop was estimated at 9.24% of households (178 units). This represents a reduction from the 9.7% vacancy rate in 2000 (183

units).the vacancy rate overall was 9.2%. As noted in the 2004 and 2009 Bishop Housing Element updates, the U.S. Department of Housing and Urban Development considers a housing market with a vacancy rate of three percent or less to have a "shortage" of housing. Some households in a housing market with a vacancy rate of three percent or less for a sustained period of time can be expected to experience an "overpayment problem." An overall vacancy rate of about five percent is considered desirable to assure an adequate selection of reasonably priced housing without discouraging investment in housing. More specifically, a minimum vacancy rate of 2% for dwellings for sale is desirable while a minimum vacancy rate for rental units is 6%.

The homeowner vacancy rate in Bishop has been tight for a long period (1.8% as of 2007 and 1.0% as of 2004), but has recently worsened with only 0.3% of homeowner units vacant as of the 2010 Census. The rental vacancy rate has long been below the 6% minimum level deemed desirable by HCD, but has improved in recent years to 5.8%.

A.7 Special Households

The HCD has explained how special housing needs differ from other housing needs in the following terms: "Special housing needs are those associated with relatively unusual occupational or demographic groups, such as farm workers, or large families, or those which call for unusual program responses, such as preservation of residential hotels or the development of four bedroom apartments."⁵

- **Disabled Persons and Households including persons with Developmental Disabilities**

Households with one or more members with some physical disabilities may require special housing design features and may

⁵HCD, Housing Element Questions and Answers, March, 1984.

also have housing assistance needs. The primary focus of disabled residents as a special need segment is on their number and economic situation. The major housing problems of disabled people are the lack of affordable accommodations and inadequate accessibility. These basic problems are caused by a variety of factors: a) subtle, or not so subtle, discrimination; b) lack of financial resources and incentives available to those who want to make their buildings accessible; and d) lack of knowledge as to how accessibility can be improved. General solutions include: a) public recognition and commitment to correcting the problems; b) education and dissemination of information to the public and building owners; c) modifications to existing codes and regulations; d) enforcement of existing laws and regulations; and e) increased financial assistance for housing programs.⁶

As shown in Tables 13 and 14, results of the American Community Survey (ACS) for 2011 indicate that the proportion of disabled persons in Bishop has decreased in recent years. Whereas the 2000 Census indicated that 18.6% of the Bishop population over age 5 was disabled,⁷ data from the 2011 ACS indicate that persons with disability now comprise 11% of the total Bishop population. Employment disability comprises the largest share of disability type (17.85%) for persons 16-64 years old, and physical disability comprises the largest share (17.35%) for persons 65 years and older. The City's zoning code does not define 'family' or identify special concentration or permitting requirements for this type of use, and will not constitute a hindrance to the provision of housing for disabled persons.

As of January 2011, housing elements must include an analysis of the special housing needs of disabled persons including persons with developmental disabilities. This requirement stems from the fact that special needs groups encounter significant challenges in obtaining secure and decent housing and are disproportionately subject to discrimination. SB 812 amended State housing element law to require that an evaluation of the special housing needs of persons with developmental disabilities must be included in the assessment of the housing needs of the disabled, including estimates of the number of persons with developmental disabilities and their housing need with a discussion of potential resources. A "developmental disability" is defined as a disability that originates before an individual becomes 18 years old, continues, or can be expected to continue, indefinitely, and constitutes a substantial disability for that individual. This includes Mental Retardation, Cerebral Palsy, Epilepsy, and Autism.

The US Census does not compile information regarding persons with developmental disabilities, but this information is available through each nonprofit regional center operating under contract with the California Dept. of Developmental Services (DDS). Table 15D, 15E and 15F summarize housing needs of people with developmental disabilities per SB 812 by zip code, by age and by status. As shown, the City of Bishop (zip code 93514) has a total of 57 persons with developmental disabilities including 1 person in the 3-5 year age, 4 individuals aged 6-9 years, 5 individuals aged 10-13 years, 8 individuals aged 14-17, 2 individuals aged 18-21, 13 individuals aged 22-31, 7 individuals aged 32-41, 10 individuals aged 42-51, 4 individuals aged 52-61 and 3 individuals aged 61 or older. Of this population, twenty are in independent living situations, 36 are living at home with a parent or guardian, and 1 has other living arrangements.

- Farm Workers**

Farm workers represent 1 of 7 special needs groups referenced in state law. Data developed for prior Housing Elements indicated that the majority of persons within the category of "agriculture, forestry, fishing and hunting" occupations were actually employed in the fields of veterinary medicine, horticulture, and landscaping—not farming. This broad-based group of agriculture-related workers constituted 3.1% of all employed residents of Bishop in 2000, but has since fallen. As shown in Tables 16 and 17, the City of Bishop has no farming, forestry or fishing businesses are known to operate in the City as of 2007. The City’s Zoning Ordinance complies with the Employee Housing Act, specifically Health and Safety Code §§17021.5 and 17021.6. Section 17021.5 requires that employee housing for six or fewer employees to be treated as a single family structure and permitted in the same manner as other single family structures of the same type in the same zone. Section 17021.6 requires employee housing consisting of no more than 12 units or 36 beds to be permitted in the same manner as other agricultural uses in the same zone.

- **Homeless Residents**

Although there are no accurate homeless statistics available for the Bishop area (and no data on homelessness was included with the *Housing Element Data Package* provided by HCD, as shown in Tables 18 and 19), IMACA estimates that the population is growing. Statewide statistics indicate approximately 36 homeless per 10,000 residents; this would indicate roughly 36 homeless in Inyo and Mono Counties combined, and approximately 13 homeless individuals in the Bishop City limits. These numbers are higher than estimates from 2009, when the Inyo County Mental Health Director estimated a total of 25 homeless individuals in Inyo County, five (5) of whom were thought to reside in the City. The prolonged economic downturn has played a key role in this trend, and IMACA notes that daily calls and referrals for assistance have increased noticeably over the past year or so.

During 2013, IMACA received a \$100,000 grant from the California Department of Community Services and Development to fund its new Homeless Prevention Program. The funds will be used for emergency shelter vouchers, rental deposit assistance and relative services designed to assist homeless individuals in Inyo and Mono Counties. In addition, the program can issue camping equipment and pay campground fees. The program is funded for the July 2013/June 2014 fiscal year, during which IMACA will keep records with the goal of expanded state and federal funding if the program succeeds in its goal of creating a ‘continuum of care’ by which provider agencies (counseling, healthcare, rental and employee assistance) unit to provide an effective and responsive range of services to populations in need.

Additionally, IMACA has played a key role in the recent formation of a Continuum of Care program to answer the unmet needs of the homeless population in Inyo, Mono and Alpine counties. Stakeholders in this multi-agency effort include Inyo and Mono County Social Services and Health and Human Services, the Salvation Army, Northern Inyo Hospital, Inyo County veteran services, Mammoth Lakes Housing and several churches. The Continuum of Care program will serve as a collaborative way to provide integrated services to the homeless population. The program will also establish eligibility for state and federal funding sources that would not be available to the individual stakeholders. Through this avenue, the Continuum of Care aims to obtain funding for shelters and housing for homeless individuals as well as essential services and homelessness prevention programs.⁸

- **Female Heads of Household**

2000 Census data identified that 327 households were headed by females in Bishop, compared with 152 female-headed households in 1990. Data from the 2010 Census indicate that this number has decreased to 234 households (27.8% of all households). Female heads of household comprise the majority of households under the poverty line, representing 64% of the total 108 families living under the poverty level. However, the proportion of female headed households below the poverty line is slightly under 30%. These statistics reflect improvements since the 1990 Census, when Bishop was home to 114 female-headed households with children, half with incomes below the poverty level. Nearly a third of female-headed households were under the federal poverty level, compared with nearly a quarter of all households in Bishop. Affordable housing for female heads of households in the City has been provided through existing programs. The rental rate structure and rental assistance programs available in Bishop continue to adequately address housing needs of this group. A majority of female heads of household are without children, though 42% of the total live with children.

TABLE 18

Female Headed Households (2010)						
Householder Type	Bishop Number	Percent	Inyo County Number	Percent	Unincorporated Number	Percent
Female Headed Householders	234	27.8%	875	18.9%	641	16.9%

A.8 At-Risk Units

HCD has identified one housing project in the City of Bishop that is at risk of converting to Non-Low Income Uses: the Willow Plaza, located at 324 Willow Street (see Table 20). This project was placed in service in 2007, and HCD indicates that there are more than 20-years of affordability remaining. This new-construction project provides a total of 12 low income housing units (100% of the units at this site) and is designed for large families.

A.9 Census Summary

Table 20 on the following page provides an overall summary of selected data from the 2010 Census for the City of Bishop and, for comparison, for the State of California as a whole.

A.9 Energy and Water Conservation

Energy used for space heating, air conditioning, and water heating is the major utility cost faced by renters and homeowners. Electricity, propane, firewood and oil are the main sources of energy used. The surrounding national forest lands allow wood cutting for home use for a small fee. Firewood also may be purchased from local suppliers. However, many households rely on other forms of energy for a number of reasons. These include personal preference, lack of wood cutting/gathering equipment, lack of wood-burning stoves, no wood storage areas, ash disposal problems, etc. Many rely on electricity for water heating, water heating being second only to space heating/air conditioning in total household use. Water heating by electricity is the most expensive water heating energy source and can run well over \$100 per month.

The large number of older homes in Bishop adds to cost of energy for heating and cooling. Insulating poorly insulated homes could markedly decrease energy costs given the cold winters and hot summers in this area. Weatherization of homes is the most effective way to reduce energy costs. The most effective weatherization activities include caulking, weather stripping of windows and doors, installing gaskets behind switch-plates, replacing broken window panes, rehabilitating window frames and sashes, building and installing storm windows, installation of proper siding, and adding wall or ceiling insulation. Potential savings due to reduced heating costs may range from 25% to 50% or more depending upon the extent of weatherization activities.

IMACA administers the Low Income Home Energy Assistance Program (LIHEAP) on behalf of the State of California. Eligibility is 80% of state median income. Approximately half of Inyo County’s funds are expended in serving an average of 350 Bishop households in the Energy Crisis Intervention Program (ECIP) and an additional 20 in weatherization. ECIP is available each year as either \$300 for electricity or 2 cords of wood, or \$700 in propane or \$700 in wood pellets. The LIHEAP Weatherization Program assists an average of 20 Bishop households each year with up to \$3,000 in energy conservation/home repairs. The SCE programs assist some 30 households in Bishop each year with energy efficient refrigerators.

Use of solar energy, such as solar water heating systems, can conservatively save 50% or more on annual hot water costs when properly designed and installed. Another affordable energy saving program involves the enclosure of south facing porches during winter with thermo-pane glass or other similar material. Such installations can prove cost effective in reducing overall energy costs.

⁹ Explanation of Symbols:

- An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
- An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
- An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
- An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
- An '*****' entry in the margin of error column indicates the estimate is controlled. A statistical test for sampling variability is not appropriate.
- An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
- An '(X)' means that the estimate is not applicable or not available.

To remain current with evolving energy conservation standards, the City of Bishop utilizes the most current California Energy Building Code during plan check review for new building construction and remodel of existing structures. Replacement of older wood burning stoves with new and efficient models is among the energy standards addressed and recommended during applications to remodel older homes. In addition, Southern California Edison offers free online energy audits, summer discounts for air conditioner cycling, and a direct install program that includes free energy conserving equipment in some areas.¹⁰ The City of Los Angeles Department of Water and Power also provides a comprehensive Energy Efficiency Program that includes a refrigerator exchange program and free lighting upgrades to qualifying companies,¹¹ and the City encourages residents to take advantage of these programs.

As noted earlier in the discussion of progress Section F (progress under the previous Housing Element), 121 housing units (fully 6% of the entire housing stock) were rehabilitated over the past 5-years, all of which fell within the very low, low, moderate and above moderate income levels. Many of the rehabilitation efforts involved significant activities including reroofs, mechanical upgrades, and plumbing repairs. An even larger number of rehabilitation activities (many of which were not eligible for Housing Element credit) involved resource and energy efficiency improvements including weatherization, insulated window replacements, energy efficient appliances and electrical repairs. It is anticipated that energy and conservation activities will continue to represent a significant percentage of home improvements in the City of Bishop over the coming 5 years.

B. PROJECTED HOUSING NEEDS

This section of the Housing Element discusses various factors that influence housing demand. The factors include a review of population and employment trends as well as the City's housing assistance need, also known as "share of regional housing need." The Bishop population has held fairly steady over the past 40 years. Between January 1970 and January 2008, the City's population increased by 52 persons. Concurrently, the housing stock had a net positive change of 444 dwelling units between 1970 and 2008. Table 21 on the following page summarizes population and housing stock changes from 1970 to 2008. These data indicate that housing formation has met or outstripped population growth (assuming an average of 2.1 occupants per unit) for every decade over that nearly 40-year period.

Table 21 ¹²				
BISHOP POPULATION & HOUSING TRENDS 1970 TO 2008				
YEAR	POPULATION	INCREMENTAL CHANGE	HOUSING INVENTORY	INCREMENTAL CHANGE
1970	3,499	--	1,450	--
1980	3,333	-165	1,712	+262
1990	3,475	+142	1,779	+67
2000	3,575	+100	1,867	+98
2008 ¹³	3,551	-24	1,894	+27 ¹⁴
2013 ¹⁵	3,877	+9.2%	1,926 (2010)	+1.7%

B.1 Housing Needs

Consistent with Government Code §65584.06, HCD prepares a determination of the Regional Housing Need for counties not represented by councils of governments (COGs), including Inyo County, as part of each Housing Element update cycle. The purpose of the needs determination is to ensure that each local government is allocated a proportional share of responsibility for meeting the housing needs of very-low, low, moderate and above-moderate income residents. The assessments are guided by four statewide objectives that include:

- **Supply:** increasing the housing supply and mix of housing types
- **Infill:** promoting infill and socioeconomic equity, environmental protection and efficient development
- **Balance:** promoting an improved intraregional balance of jobs and housing
- **Proportionality:** allocating a lower proportion of housing need to a category when the jurisdiction already has a disproportionately large share of households in that category.

¹⁴Note that the State's data do not appear to include the 32 new assisted living units.

¹⁵Source: HCD Data Package Tables 1 and 1a.

The 2014-2019 assessment incorporated a one-time adjustment to account for the prolonged recessionary conditions, high unemployment and unprecedented foreclosures in California and elsewhere. The assessment also reflects specified assumptions regarding household growth and population increases, household size, rate of household formation, vacancy rates, population composition, the relationship between jobs and housing, and projected absorption of vacant sale and rental units. Based on these assumptions, HCD identified a need for 72 new housing units in Bishop between 2003-2008 and an additional 111 units between 2007 and 2014. Table 22 compares the 2014-2019 needs assessment for Bishop and Inyo County with the needs assessments prepared for the prior two Housing Element update cycles.

Income Group	Bishop 2002	Bishop 2007	Bishop 2012	Inyo Co. 2002	Inyo Co. 2007	Inyo Co. 2012	TOTAL 2002	TOTAL 2007	TOTAL 2012
Very Low	9	28	15	43	57	35	47	71	50
Low	8	17	10	54	68	25	62	85	35
Moderate	12	20	12	51	82	28	63	102	40
Above Moderate	43	46	28	115	192	72	158	238	100
TOTAL	72	111	65	306	456		378	567	225

Primarily as a result of the one-time adjustment for unprecedented economic conditions, Inyo County’s projected housing need allocation as a whole was less than half the allocation in 2007, and lower by a third than the 2002 allocation. The City’s 2012 allocation was also significantly reduced although by a much smaller factor than the County overall (the City’s current total allocation is 59% of the share allocated in 2007 and 90% of the share allocated in 2002). The City’s adjustment was most pronounced for the very low income group, where the 2012 allocation is 54% of the allocation in 2007. Overall, HCD’s Regional Housing Allocation Model for 2008 allocates fewer housing needs to Bishop and to Inyo County in all categories than did the allocation plan developed in 2007.

B.2 Quantified Objectives

The objectives developed in the current City of Bishop *Housing Element Update* reflect the guidelines set forth by HCD in the most recent Regional Housing Allocation Model. Thus, the overall goal for new housing construction between 2014 and 2019 is set at 65 units, which would call for about 13 new units each year. This Housing Element Update maintains the key objectives set forth in 2004 and in 2009 for conservation and rehabilitation of housing; these are two areas where Bishop has been most successful in meeting Housing Element objectives and ensuring a continued supply of affordable housing. The current Housing Element identifies a goal for replacement or substantial rehabilitation of 6 housing units, based on findings obtained during the June 2013 updated housing survey. The City’s goals for rehabilitation are allocated across income groups in the same proportion shown by HCD in the Regional Housing Allocation for new construction, and it is again noted that rehabilitation credits for the past 5 year period are all for housing in the very low, low, moderate and above moderate income levels. Table 23 shows the objectives for new construction and/or rehabilitation by income group over the coming 5-year cycle.

**Table 23
BISHOP QUANTIFIED HOUSING OBJECTIVES BY INCOME GROUP 2014-2019**

Income Group	New Construction	(and/or) Rehabilitation
Extremely Low	7	30
Very Low	8	30
Low	10	40
Moderate	12	48
Above Moderate	28	112
TOTAL	65	260

The objectives shown in Table 23 represent goals through 2014. On an annual basis, these goals would average new construction of 3 “very low” income units (or rehabilitation of 12 units), 2 new units (or rehabilitation of 10 units) in the “low” income category,

¹⁶Estimates of extremely low-income housing are based on 50% of the very low income category, per §65585(a)(1) of the Govt. Code.

4.4 new units (or rehab of 9 units) in the "moderate" category, and 5.6 new units (or rehab of 22 units) in the "above moderate" income category.

AB 1233 (Jones), Chapter 614, Statutes of 2005, requires local governments to zone or rezone adequate sites, within the first year of the new planning period, to address any portion of the RHNA for which the jurisdiction failed to identify or make available sites in the prior planning period. As described in §II.A above, the City is stymied in its attempts to acquire or annex land for construction of housing. Intense good-faith efforts to acquire land from the City of Los Angeles have not yet borne fruit, but the City has proactive plans to work with the new mayor of Los Angeles as well as HCD to seek opportunities for affordable housing development in the coming 5-year period. The City's efforts will be supported by the fact that roughly half of the 456-acres of residential land in Bishop is zoned for development at 16 units per acre or higher.

[[TABLE 24 & PARAGRAPH BELOW TO BE UPDATED WHEN THE FULL SET OF ANNUAL REPORTS IS AVAILABLE]]

The City did/did not meet RHNA goals for any income category during the 2009-2014 planning period. ___ home was constructed in Bishop during this 5-year period. That one home did fall within the Very Low Income category. Additionally, ___ units were rehabilitated over this period, all of which fell within the very low, low, moderate and above moderate income levels. The HCD allows cities to take a 1:4 ratio credit for rehabilitation projects, in terms of meeting the Regional Housing Need Analysis numbers that have been incorporated into the Housing Element. The ___ units rehabilitated during 2009-2014 therefore qualify for ___ credits. (IMACA provided additional rehabilitation during this period, but because their efforts focused on non-eligible improvements such as weatherization, insulated window replacements, high efficiency appliances and electrical/plumbing repairs) none were included in the 1:4 ratio.

**Table 24

Low and Other Lower Income Units	15	11.5	(3.5)
Moderate Income Units	19	13.5	(5.5)
Above-Moderate Income Units	50	45	(45)
TOTALS	110	31	(79)

IV. HOUSING RESOURCES AND CONSTRAINTS

This section provides an inventory of resources and constraints relevant to residential land supply and development in the City of Bishop. Under present law, the Element must include an inventory of resources and constraints, including land suitable for residential development, vacant sites and sites having potential for redevelopment. It also should analyze the relationship of zoning and public services to potential residential sites.

A. LAND USE

The Land Use Element of the Bishop General Plan contains goals and policies that describe the nature, location, extent, and intensity of land uses within the incorporated areas of the City. The focal point of the Land Use Element is the Land Use Map. This Map indicates where specific types of land uses will be permitted, thus guiding future development in Bishop. Residential land uses comprise approximately 40 percent of Bishop land area. Of the ten land use designations identified in the Land Use Element, four deal primarily with residential development. These four are described below.

- **Low Density Residential (LDR, 2.0 to 5.0 Dwelling Units / Acre)**
This residential category typically consists of single family dwelling situated on individual land parcels ranging in size from 8,700 to 22,000 square feet. The Land Use Element designates 50± acres for low density residential uses.
- **Medium Density Residential (MDR, 5.1 to 9.9 Dwelling Units / Acre)**
This residential category consists of single-family dwellings situated on individual land parcels, two single or attached dwellings (such as duplexes or triplexes) on individual parcels, and mobile home subdivisions. Overall land use

¹⁷ Note that only one housing unit (of any price) has been constructed in Bishop since the 2009 Housing Element was approved. That one unit was in the 'very low income' price range, as shown in Table 2.

requirements average from 4,400 to 8,000 square feet of land per dwelling unit. The Land Use Element designates 211 acres for Medium Density Residential uses.

- Medium-High Density Residential (MHDR, 10 to 22 Dwelling Units/Acre)**
 This residential land use category is characterized by single-family town houses, patio homes, duplexes, triplexes, garden apartments and mobile home parks. Gross site area per unit ranges between 2,000 and 3,500 square feet per dwelling unit. The Land Use Element designates 52 acres for Medium-High Density Residential uses.
- High Density Residential (HDR, 22.1 to 35.0 Dwelling Units/Acre)**
 This residential category is characterized by cluster-dwelling accommodations including multistory apartment houses and condominium developments with 1,250 to 2,000 feet of gross area per dwelling unit. The Land Use Element designates approximately 143 acres for High Density Residential uses.

The City is currently in the very early stages of a process that will eventually update the General Plan Land Use Element, the Conservation and Open Space Element, and the Economic Development Element. It is anticipated that the updated Land Use Element will provide an additional residential designation for mixed uses similar to the range of land uses currently permitted in the downtown overlay zone.

B. VACANT LAND INVENTORY

- Land Currently Available**
 As shown in Table 25, Bishop has a total 440.55 acres of undeveloped land within city limits. Of this, 95.5% is owned by the City of Los Angeles Department of Water and Power. There are currently only 2.72 acres of undeveloped, utility serviceable, residentially designated land in Bishop. Applying current zoning and assuming 80% of maximum allowed density, the realistic capacity of these 2.72 acres is approximately 45 units. The remaining undeveloped acreage is either designated for non-residential uses (such as commercial or industrial) or is not serviceable with utilities.

TOTAL VACANT LAND AREA: 440.55 ACRES 424.07				
TOTAL OWNED BY LADWP: 420.89 ACRES 405.25				
TOTAL PRIVATELY OWNED: 19.66 ACRES 18.82				

The information provided in Table 24 underscores the importance of goals that focus on working with LADWP to acquire land for affordable housing, and the importance of HCD assistance in reconciling lease terms and loan terms and exploring the feasibility of sharing affordable housing credits with the City of Los Angeles,

- ***Additional Vacant Land that May Become Available to the City (City of Los Angeles-Owned Properties)***

Historically, the land held by the City of Los Angeles has not been available for development of residential uses and this continues to be the case at present. Taken in whole, it is estimated that the City of Los Angeles-owned lands within the City could support 3,000 dwelling units.¹⁹ In 2004, , the City was in negotiation with the City of Los Angeles for two specific

¹⁹City of Bishop 2004 Housing Element Update.

properties: a 15-acre parcel which would have provided 75-100 housing units, and the McIver Street/Pacifica (now McIver/IMACA) project which would have provided 55 senior housing units. If this land is released by the City of Los Angeles for development, the additional housing would be more than adequate to meet the City's fair share allocation of regional housing needs. However, the City is constrained in planning for their future use because these lands are owned by another public entity. There are no negotiations pending as of July 2013, and no opportunities in the foreseeable future. However, the City continues to closely monitor the availability of City of Los Angeles lands for purchase or long-term lease as a cornerstone of their efforts toward constructing affordable housing.

Another project area that could become available in the future involves two parcels in the vicinity of Spruce Street and E. Yaney Street. Efforts during 2007-2008 to acquire the parcel on the south failed when State and Federal funding commitments were withdrawn because each agency wanted the other agency to make the first commitment, but the City anticipates that one of these parcels may again become available in the future. The northern parcel may be more suitable for a future effort because recent surveys have revealed the presence of cultural resources on the southern site.

Table 25 presents information about the three parcels noted above, as well as the currently occupied sites discussed in the following section. Potential capacity for all parcels is estimated at 80% of the maximum density shown in Table 25. Development capacities may be even higher than shown, since the City allows developers to mitigate for impacts to sensitive resources (including biological and cultural resources) by obtaining approvals from the appropriate state and federal permitting agencies. None of the sites shown in Table 25 is known to have unavoidable environmental impacts that would preclude development, and only a small part of the DWP site is located in the 100-year flood plain. The City anticipates that any future environmental constraints on these sites, all of which are shown in Figure 2 (Bishop Zoning Map) can be mitigated to a level that would permit development to occur within the current planning period.

Development of all three parcels at the maximum allowed densities would yield affordable housing far exceeding the 2014 RHNA allocation for the City of Bishop (110 units total). As in the prior Housing Element, the projects described in Table 26 below are considered to represent the City's best opportunity for meeting RHNA goals through 2019. The City will place a priority on realization of these projects, and considers it possible though by no means certain that at least one of the projects will be achieved during the current planning period. Because of the recognized challenge in obtaining development rights for these properties, the City during the prior planning period implemented zoning changes to allow affordable housing as a discretionary use in the mixed use overlay zone, and the City plans to consider an expansion of the mixed use area as part of the current Housing Element planning period as outlined in Table 35 (at the conclusion of this Housing Element).

**Table 26
POTENTIALLY AVAILABLE LAND INVENTORY SUMMARY**

LOCATION/ APN	Zone	Allowable Density	GP Designation	Estimated Unconstrained/ Constrained Acreage	Realistic Capacity or Range (based on zoning)	Existing Use	Infra- structure Capacity	On-site Constraints
15-acre DWP parcel/ APN	RMH (county)	7.6 to 15.0 du/ac	Residential Medium- High Density	9 Unconstrained 6 Constrained (15 acres total)	108 units	Vacant	Yes	Estimated 3 acres of wetlands and 3 acres of flood plain
McIver/ IMACA/ APN 08-010-41	R-3	35 du/ac	Residential High Density	6.5 Unconstrained 1.0 Constrained (7.5 acres total)	182 units	Vacant	Yes	Est. 1-ac open-space zoning (possible endangered plant)
Spruce & Yaney APN 08-010-41	R-1	9 du/ac	Residential Low Density	3.0 Unconstrained 0.5 Constrained (3.5 acres total)	21 units	Vacant	Yes	Estimated 0.5-ac of land (possible endangered plant)
TOTAL				18.5 Unconstrained	311 units			

				7.5 Constrained				
				26.0 Total				

- **Currently Occupied Sites that May Become Available to the City (Private Parcels)**

The City and IMACA have had a long-term interest in the potential acquisition of an existing motel (the Elm Street Motel) located on East Elm Street. IMACA previously bid to acquire this site in 1998 and had the funds available to proceed, but the deal failed due to problems in the real estate transaction. The owner has not since 1998 shown an interest in selling, but IMACA continues to keep an eye on this site for possible future purchase.

Another property that has approached IMACA with an offer to sell is the Starlight Motel located at Short and Sneden. The offer was not accepted previously due to the absence of sufficient funds, but the site is well suited for conversion as an affordable living unit and IMACA has continued interest in future acquisition when a suitable funding opportunity is identified. The City estimates that the Elm Street Motel and the Starlight Motel parcels have a combined potential capacity for 41 units, based on the existing number of units. Both parcels are fully served by utilities and infrastructure, and neither parcel is subject to development constraints. As noted previously, however, neither of these properties is current available for purchase and therefore neither project is under active consideration at this time.

- **Infrastructure and Public Service Considerations**

The City of Bishop Department of Public Works provides water service to the entire city and sewer service to most of the city. The Eastern Sierra Community Services District (ESCSA) provides sewer service in the northeast part of the city. The city has adequate water production, treatment, and distribution capacity to serve the entire city, including parcels that are currently undeveloped. Through flow exchange agreements with ESCSD, the city has adequate sewer treatment, disposal, and collection facilities to serve the same area.

The city periodically reviews its water and sewer infrastructure and their operation, maintenance, and improvement needs. Funding for these needs are built into yearly rates assessed to water and sewer customers. These reviews, in addition to In addition to the Water and Sewer Master Plans prepared in 2008, indicate there is adequate capacity to serve the 2019 RHNA development outlined in this Housing Element.

Other essential services such as public safety (police and fire) would also be provided by the City, with possible modification to staffing levels depending on the rate and intensity of development. Neither of the privately owned vacant properties is constrained by earthquake faults or by flooding potential. A determination as to whether a parcel would pose “wetland” issues would require site specific studies at the time of development review.

C. EVALUATION OF GOVERNMENT CONSTRAINTS

According to state law, local housing elements must analyze existing and potential governmental constraints on the maintenance, improvement or development of housing for all income levels. The potential and actual constraints included and required in the scope of analysis are listed below:

- Fees and Site Improvement Costs
- Processing and Permit Procedures
- Building Codes
- Land Use Controls
- Applicable State Laws

The law does not imply that the above factors constrain all jurisdictions. However, Article 10.6 requires that these factors be analyzed to determine if any constrain the maintenance, improvement or development of housing in a community. As described in the discussion below, the procedures and fees and controls adopted by the City of Bishop pose no substantive obstacles to development in comparison with other agencies in California because (a) site improvement costs and municipal fees remain at or below the level of comparable jurisdictions, (b) the City is efficient in its processing of various applications and handles such applications in a single department, (c) residential zoning categories are permissive (allowing all densities up to the category limit), and (d) zoning restrictions contain no unusual or prohibitive requirements. There are no governmental policies or requirements that impede the development, maintenance and improvement of housing for persons with disabilities, and the City has outlined a process to enhance housing opportunities for its disabled population.

The City of Bishop maintains an open-ended regulatory process. The process provides access to all persons including those concerned about issues involving persons with disabilities or special needs, as well as advocates and opponents of special projects. The City has found that open-ended access is more responsive than attempting to codify every issue that arises as a city ordinance, particularly for a jurisdiction as small as Bishop. With a planning staff of one person, the City is able to give full and individual attention to each person facing constraints on housing for persons with disabilities or and other special needs. These cases are considered individually and decisions are contingent upon the full range of circumstances found to affect each case.

As discussed throughout this Housing Element, constraints on the availability of private land sharply limit the number of new development projects in the City of Bishop. However, no restrictions apply to new developments and all proposals are handled individually, often by a request for special use permits. In 2001, the City of Bishop adopted a Building Code based on the Universal Building Code. In August 2008, the Municipal Code was amended to adopt by ordinance the California Code of Regulations, Title 24, parts 1 through 10 and 12, which are the California Administrative, Building, Electrical, Mechanical, Plumbing, Energy, Elevator Safety, Construction, Historical Building, Fire, Existing Building and Referenced Standard Codes.

The City addresses permits, policies and processing with regard to group homes strictly on a discretionary basis, with community input and all extenuating circumstances taken into account. The R2000 zone is used as a guide for policies regarding group housing and often requires conditional use permits. Changes in policies are also considered on a case by case basis and standards (such as residential parking requirements) do not differ for persons with disabilities. The City's affirmative implementation program for housing to meet the needs of persons with disabilities is outlined in the 5-Year Action Plan, §V.C.

C.1 Fees and Site Improvement Costs

The City of Bishop assesses fees for the processing of building permits and land use approvals. As was true in the 2009-2014 Housing Element, the City uses a permit fee schedule to determine the cost of a building permit; it is based on the valuation of the project at hand. As an example, a \$65,000 valued project would be charged a building permit fee of \$749. A project valued at \$100,000 would be charged \$994. Plan check fees are charged at 65% of the building permit fee. These fees apply equally to all types of residential construction (single family, multi-family etc.), and are similar to fees charged in other jurisdictions and do not significantly constrain housing; the fees help offset the costs of inspection. The building permit fee schedule is periodically updated and readily available to the public at City offices.

Processing costs for a general plan amendment, zone change and/or use permit are minimal. For example, the fee for a general plan amendment or a zone change is based on the actual cost for staff time, while a use permit costs \$1500, as does a negative declaration. Environmental Impact Reports are contracted out at cost, and there are no parkland dedication fees or requirements. The City adjusts these fees periodically; the last increase occurred in July of 2013. As is evident, processing costs do not pose serious limitation on the production of housing in Bishop.

The City of Bishop owns and operates the sewer and water system. Unlike many jurisdictions in the state, Bishop does not charge a hook-up fee for these services. There is a labor cost (averaging about \$1,200 per hookup as of 2013) to offset the costs of the physical connection to the sewer line and/or water line, and builders are required to fund the cost of any other needed sewer and water system improvements. Common trenching for utilities is encouraged where allowed by state health codes. The City has adequate total capacity in its sewer and water systems to accommodate its 65-unit share of the regional housing need over the coming 5-year planning period (2014-2019). On-site improvements are the responsibility of the developer of housing projects. These include sidewalks, curb, gutter, street lights and roadway improvements as needed to meet City standards. The standards are typical of small communities. Fees are otherwise not charged

The City has no special requirements such as landscaping, fencing and sprinkler systems. Similarly, there are no fees for offsite improvements such as traffic signals, light standards or other roadway improvements. Again, there is very limited impact on housing costs from City-imposed regulations. Again, the low fees do not pose any obstacle for development of housing.

School impact fees are charged by the respective school districts. The districts charge the maximum fees allowed by state law. This is the only locally imposed fee that might be considered a constraint on the production of housing. The City does not have authority to change or reduce the fees established by local school districts.

To encourage construction of low-moderate housing, the City offers assistance with the preparation and filing of building and permit applications if requested. In sum, the availability of adequate capacity, coupled with reasonable fees and charges, indicate that fees and site improvement costs do not pose an obstacle to affordable housing development in the City of Bishop. Again, all fees are applied equally regardless of housing type; a typical 1,500 square foot new single family attached housing unit in Bishop would require total fee payments of approximately \$6,882.69 including \$1,273.75 for the building permit fee, \$827.94 for the plan

check fee, and \$4,800 for the school impact fee (charged at a rate of \$3.20/sf). In addition, the City passes on certain state fees based on the value of the permit; for the example given, these state fees would amount to \$21.

C.2 Processing and Permit Procedures

When residential projects are initiated in the City, specific approvals are required that can involve Planning Commission action, City Council action, permits and inspections. Table 27 indicates average processing times for the various processes; as shown, the City maintains a relatively fast processing time for all categories. Although there is no officially designated "one stop" processing of permits, there is in fact only one stop for applicants since the planning, building and public works departments are all housed at the same location and utilize at the same staff and front counter. Table 28 summarizes the range of housing types permitted in residential zones. Note that most of these process elements can be conducted concurrently (for example, the review and approval for a general plan amendment, zone change, EIR and TT Map are all processed in parallel), and projects that conform to all applicable standards receive ministerial approval. The typical processing time for a new single family attached housing unit in a conforming zone would be approximately 1 month (longer if the plan submittal is incomplete). The typical processing time for a conforming multi-family development would also be about one month (provided the submittal documents are complete).

<u>Process²⁰</u>	<u>Time (days)</u>
General Plan Amendment	120
Zone Change	Twice Yearly
EIR	120
Tentative Tract Map	90
Site Plan Review	10
Variance	90
Use Permit	90
Building Permit / Plan Check	15

Housing Types Permitted	R 1	R 2	R 2000	R 3	R M ²¹	OVERLAY
Single Family Attached		X	X			
Single Family Detached	X	X				
Duplexes to Fourplexes		X	X			
Multifamily (5+ Units)			X	X		X ²²
Mobile Homes					X	C ²³
Manufactured Homes	X	X	X			X
Second Units ²⁴	X	X	X	X		X
Emergency Shelters ²⁵	C	C	C	C	C	X
Transitional & Supportive Housing ²⁶	*	*	*	*	*	*

²⁰Processing times begin when complete applications are received by the City. Zone changes are reviewed in March and September each year, generally concurrently with General Plan amendment applications.

²¹The R-M category (residential mobile home district) is strictly for mobile home housing.

²² Multifamily (5+ units) is a permitted use only in the residential portion of the overlay zone.

²³ A CUP is required for mobile home development in the mixed use overlay zone.

²⁴Second units are not governed by specific ordinance, but are permitted in all zones in keeping with state law.

²⁵Emergency shelters are permitted in all residential zones with a CUP. The Bishop Zoning Code does not address single room occupancy as a specific type of housing but, as described in this Element, there are 2 single-room occupancy projects in Bishop. One is located in R-3 (MHDR) and the other is in a C-1 zone. Similar requirements would apply to transitional housing.

²⁶ The City during 2011 adopted the formal terminology for Transitional and Supportive Housing, and will consider adoption of the new revised terminology as part of the 2014-2019 Housing Element Action Plan.

Group Homes for Persons with Disabilities (up to 6 residents) ²⁷	X	X	X	X	X	C ²⁸
Group Homes for Persons with Disabilities (7+ people)	C	C	C	C	C	C ²⁹
Single Room Occupancy	C	C	C	C	C	NO
X=permitted use; C=conditionally permitted use; *=See Footnote 26						

Emergency Shelters provide housing with minimal supportive services for homeless persons that is limited to occupancy of six months or less by a homeless person. Transitional housing is designed to facilitate the movement of homeless individuals and families into permanent housing. Supportive housing is permanent rental housing linked to a range of support services designed to enable residents to maintain stable housing and lead fuller lives. As a result of ordinances adopted during the 2009-2014 Housing Element cycle, all three types of housing are now permitted by right in the mixed use overlay zone and subject only to the same development and management standards that apply to other allowed uses in the identified zone. As part of the current Housing Element Action Plan, the City plans to consider expanding the boundaries and range of uses allowed in the mixed use zone to provide for a wider range of affordable housing opportunities. The overlay zone was selected for these uses because of its proximity to a wide range of complementary services including public transit facilities, basic goods and grocery stores, and social welfare services. Because the Municipal Code does not define 'family' or set minimum separation requirements for these uses, it will not impede the implementation of these goals.

C.3 Building Codes

The City of Bishop has adopted the California Code of Regulations, Title 24, Parts 1 through 12, which establishes standards for new construction. The City could establish more stringent standards but has not done so. Relative to other jurisdiction in the state, there are no special building code constraints present that would inhibit housing construction. Further, the City conducts its code enforcement on a complaint basis or as needed through normal field visits.

C.4 Land Use Controls and Other Considerations

In some jurisdictions, the land use element, zoning code and/or subdivision ordinance impose potential constraints on housing, especially affordable housing. In Bishop, these regulations contain no unusual or stringent provisions that would unduly inhibit housing production. The Land Use Element contains a wide range of residential densities including single family, duplex, triplex, apartments, condominiums, mobile home subdivisions, mobile home parks, and "granny units" on single-family properties.

The City of Bishop has no unusual or prohibitive lot coverage requirements. Unit size is controlled only through the lot coverage requirement; there are no minimums or maximum unit sizes required by the City except through the CBC. Height requirements are also not unduly restrictive; there is a two-story maximum for single-family units and a two-story maximum for multifamily units. Similarly, the standards set for the overlay zone, where emergency shelters are allowed, were reviewed by Inyo County staff as well as IMACA and Salvation Army during the public review process and not found to be unduly restrictive.

	R 1	R 2	R 2000	R 3	R M	OVERLAY
Density Range	2-5 units/ac.	5-10 units/ac.	10-22 units/ac.	22-36 units/ac.	Up to 11 units/ac.	Up to 10 occupants/unit
Setbacks-front/ rear	15 feet	15 feet	10 feet	10 feet	10 feet	Per underlying district
Setbacks-side	5 feet	5 feet	5 feet	5 feet	5 feet	Per underlying

²⁷ The City adopted Ord. 543 in March 2013 (see App. C) to ensure that individuals with disabilities receive reasonable accommodation to ensure equal access to housing and facilitate the development of housing for individuals with disabilities. The ordinance was patterned after the Model Fair Housing Ordinance developed by HCD to assist cities in preparing their own ordinances.

²⁸ A CUP is required for Group Homes up to 6 residents in the overlay zone.

²⁹ A CUP is required for Group Homes of 7 or more people in the overlay zone.

³⁰Source: City of Bishop Zoning Code. Please note: Lot coverage is embodied in the setbacks and parking requirements, but there are no separate standards. Similarly, open space is embodied in the required setbacks, but there are no separate standards.

Minimum Lot Size	5,000 sf	5,000 sf	5,000 sf	5,000 sf	4,000 sf	district Per underlying district
Parking	2 spaces/du	2 spaces/du	2 spaces/du	2 spaces/du	2 spaces/unit	1 space/2 client beds
Height Maximum	26 feet	26 feet				

There are neither open space dedication requirements nor design review requirements in Bishop; the free marketplace dictates open space and design. The City allows manufactured housing meeting the CBC requirements. Density bonuses are allowed in the City in accordance with state law. Small lot developments are allowed but few have been proposed. Code enforcement is complaint-driven. Overall, the City imposes no unusual requirements or regulations that would impose constraints on housing production. In fact, compared to most other cities in the state, the City of Bishop has very few constraints either through fees, regulations or land use requirements. Table 29 summarized relevant zoning and development standards for the City of Bishop, and Table 30 summarizes street widths, curb and gutter standards, sidewalk requirements and other applicable requirements.

	Collectors	Minor Arterials	Principal Arterials
Required Street Widths	40-feet	40 feet	55-70 feet
Minimum number of lanes	2	2	2-4
Curb and Gutter	Required	Required	Required
Sidewalk Improvements	Required	Required	Required

The State of California has imposed potential constraints on housing through the requirement for a Comprehensive Land Use Plan (CLUP) in relation to airports. Inyo County has adopted the Bishop CLUP which deals with noise and safety issues from the Bishop Airport. Due to the proximity to airport operations, proposed residential development in the vicinity of the designated safety/noise zones in the CLUP would have to be reviewed by the Airport Land Use Commission. The area in question is in the northeast corner of the City limits where the majority of land has been designated for commercial or industrial development. These land uses tend to be more compatible with airport operations than residential uses.³²

In most respects, the City is well suited to meet the needs of its lower-income and disabled population. Mobility is enhanced by numerous factors (including the City’s compact size, the availability of transit services, and relatively uniform and flat topography throughout the City limits) and the cost of municipal services and utilities is relatively low. Moreover, housing costs have declined substantially from the inflated values that were reflected in the City’s 2008 cost of living index of 106.1 (above the national average³³). Again, it is the lack of available and developable land that represents the most significant constraint to ensuring an adequate supply of affordable housing.

C.5 Applicable State and Local Laws

During 2002 the State Legislature adopted Assembly Bill 1866, with the intent to provide affordable housing through development of second-units. To achieve this goal, AB 1866 amended 2 sections of the existing Government Code:

- **Section 65852.2 (Second-unit law)**
This amendment requires local governments with a second unit ordinance to ministerially review second-unit applications as of July 2003. Local governments without a second-unit ordinance, or with an ordinance that conflicts with this law, should ministerially consider second-unit applications in accordance with State standards.
- **Section 65583.1 (A portion of State Housing Element Law)**
This amendment clarifies existing housing element law to allow identification of realistic capacity for second units in addressing a locality’s share of regional housing need. The amendment encourages identification of potential capacity based on development trends of second-units. This amendment took effect on January 2003.

The City of Bishop has not formally adopted a second unit ordinance, although this has been a subject of discussion and review

³¹Some special street standards apply to condos & condo conversions regardless of adjacent street category. No other special requirements apply.

³²Note that LADWP during 2011 granted to Inyo County an easement in perpetuity for airport-related uses at the Eastern Sierra Regional Airport in Bishop. The new easement will enable the County to obtain funding from FAA for aviation development.

³³ City data website: www.City-data.com/city/Bishop-California.html

by the City Council. As a key outgrowth of this discussion, the City Council adopted Ordinance 506³⁴ to provide relief to homeowners living in nonconforming structures that have been subject to damage or destruction. The ordinance affirms the City's goal that land uses should reflect approved designations, but allows the repair or reconstruction of otherwise legal non-conforming structures that have been damaged or destroyed through natural or intentional destruction. The City intends to further explore the options for permitting second-units within the context of adopted planning policy and zoning designations.

- **Senate Bill 812 and Senate Bill 520 (Persons with Disabilities)**

In January 2011, SB 812 took effect and amended California housing element law. The new law requires an analysis of the special housing needs of persons with disabilities, including an estimate of the number of persons with developmental disabilities, an assessment of their housing needs, and discussion of potential resources. SB 812 defines a "developmental disability" as a continuing disability that originates before an individual becomes 18 years old, and includes Mental Retardation, Cerebral Palsy, Epilepsy, and Autism.

The US Census does not compile detailed local information regarding persons with developmental disabilities, but does conduct a regular Survey of Income and Program Participation (SIPP) survey about the income of Americans and their participation in income transfer programs that support social welfare. Based on surveys conducted in 2005 and 2010, the Census Bureau has determined that about 56.7 million people living in the United States (18.7% of the civilian non-institutionalized population) had some kind of disability as of 2010, and about 38.3 million people (12.6% of total population, and 67.5% of all disabled persons) had a severe disability. The overall percentage did not change between 2005 and 2010, although the percentage of persons with a severe disability increased as did the percentage of persons needing assistance with daily living. Disability rates (including severe disabilities) were found to increase with age (people 80-years and older are about 8 times more likely to have a disability than persons under 15-years of age). Forty percent of disabled persons 21-years or older were employed, and persons with severe disabilities are substantially more likely to experience persistent poverty than those with non-severe or no disabilities.³⁵

The U.S. Census also collects limited information at the state level (and for geographic areas with more than 65,000 residents) through the American Community Survey (ACS), a nationwide survey designed to provide communities with annual demographic data (based on a sample size of about 3 million addresses). Based on results of the 2009 and 2009 ACS, a total of 1,898,118 persons with disabilities lived in California as of 2009 (7.9% of the total population), which reflected a very slight decrease of -0.1% over the 1,920,577 persons with disabilities living in the state as of 2008. West Virginia had the highest disability rate for people aged 16 to 64 years (16.8%), while Hawaii had the lowest rate (not statistically different from California, Colorado, Illinois, Minnesota, New Jersey, and Utah).³⁶

Applying these data to the City of Bishop, it can be estimated that approximately 35 residents have disabilities (7.9% of the population, as per the California average), and that 24 of these residents have severe disabilities. As discussed throughout this Housing Element, the Bishop housing stock includes a substantial number of affordable and accessible homes, both of which are critical to enable persons with developmental disabilities to live in integrated community settings, and a wide range of social services and specialized housing are also available. This Housing Element contains a new goal wherein the City will work with IMACA to develop an outreach program so that residents are aware of the housing resources available to persons with disabilities.

SB 520, approved in October 2001, prohibits housing discrimination on the basis of familial status or disability, and recasts earlier provisions pertaining to handicapped persons in terms of disabled persons. The law essentially clarified existing state requirements, including specifications for assessing housing needs, developing an inventory of housing constraints and resources (including land availability to meet needs), analyzing population and employment characteristics, identifying means to conserve existing affordable housing resources, a statement of applicable goals and policies, and development of a 5-year program to achieve those goals consistent with state requirements and regional housing allocations.

This Housing Element provides an assessment of disabled residents, establishes goals and policies that give priority to the housing needs of disabled, elderly, single-parent and homeless residents with limited incomes, and identifies programs specifically designed to address the housing needs of this segment of the population. The programs include Community Development Block Grant funding, Housing Assistance Program rental assistance vouchers, use of density bonuses, rental

³⁴City of Bishop, Ordinance 506, *An Ordinance of the City of Bishop, State of California, Amending Ordinance No. 424 and §§17.04.080 & 17.80.010 of Title 17 of the City of Bishop Municipal Code Respecting Nonconforming Uses*. Passed and approved by the Bishop City Council, 28 July 2003.

³⁵ U.S. Census Bureau, P70-131, *Americans With Disabilities: 2010*, Matthew W. Brault, issued July 2012.

³⁶Census Bureau, ACSBR/09-12, *Disability Among the Working Age Population: 2008 & 2009, American Community Survey Briefs*, Matthew W. Brault, September 2010.

housing construction program funds, the energy crisis intervention program, enforcement of existing state laws, and enforcement of the Bishop Land Use Element guidelines pertaining to density limits. Additionally, the 5-year action program includes specific goals for working with IMACA to develop an outreach program to inform Bishop residents of housing and services available for persons with disabilities.

- **Section 65584.09**

AB 1233 (Jones), Chapter 614, Statutes of 2005, requires local governments to zone or rezone adequate sites, within the first year of the new planning period, to address any portion of the RHNA for which the jurisdiction failed to identify or make available sites in the prior planning period. As described in §IIA above, the City has been stymied in its attempts to acquire or annex land for construction of housing. Intense good-faith efforts to acquire land from the City of Los Angeles were unsuccessful. As discussed in §IV.A above, however, of the roughly 456 acres zoned for residential development in the City, approximately 195 acres, or 43%, are already zoned at 16 dwelling units per acre or higher. Although the 2004 RHNA for above-moderate housing was not met, the City did remove obstacles to high-density, affordable housing and has continued to work closely with IMACA and other groups to develop senior and low-cost housing whenever possible.

- **Section 65583**

Chapter 633, Statutes of 2007 (SB 2) strengthens housing element law to ensure zoning facilitates emergency shelters and limits the denial of emergency shelters and transitional and supportive housing under the Housing Accountability Act. The law will facilitate efforts to address the critical needs of homeless populations and persons with special needs throughout all communities in California. Generally, SB 2 amends housing element law regarding planning and approval for emergency shelters and transitional and supportive housing as follows:

- At least one zone shall permit emergency shelters without a conditional use permit or other discretionary action.
- Sufficient capacity must be identified to accommodate the need for emergency shelters and at least one year-round emergency shelter.
- Existing or proposed permit procedures, development and management standards must be objective and encourage and facilitate the development of or conversion to emergency shelters.
- Emergency shelters shall be subject only to development and management standards that apply to residential or commercial uses within the same zone.
- Written and objective standards may be applied as specified in statute, including maximum number of beds, provision of onsite management, length of stay and security.
- Includes flexibility for jurisdictions to meet zoning requirements with existing ordinances or demonstrate that the need for emergency shelters can be met in existing shelters or through a multi-jurisdictional agreement.
- Transitional and supportive housing shall be considered a residential use and subject only to those restrictions that apply to other residential uses of the same type in the same zone.

*The City permits
second units in most
residential zones.*

As discussed in Section III.A.7 (Special Needs), IMACA estimates that the homeless population in Bishop has grown in recent years. Although there are no accurate homeless statistics available for the Bishop area, IMACA estimates that the population is growing. Statewide statistics indicate approximately 36 homeless per 10,000 residents, which would indicate roughly 36 homeless in Inyo and Momo Counties combined, and approximately 13 homeless individuals in the Bishop City limits. These estimates are higher than in 2009, when the Inyo County Mental Health Director estimated a total of 25 homeless individuals in Inyo County, 5 of whom were thought to reside in the City. The prolonged economic downturn has played a key role in this trend, and IMACA notes that daily calls and referrals for assistance have increased noticeably over the past year or so.

The County of Inyo Full Service Partnership (FSP), operated under the Mental Health Services Act (MHSA), provides services to children, Transition Age Youth (TAY), adults, and older adults. Through provision of a nurse to meet the needs of older adults, the program has successfully integrated physical health care with mental health care to help elders to stay in their homes and manage their health and mental health needs. The FSP works with local churches to offer free lunches to community members three days a week with staffing from a number of the TAY and adult clients who volunteer their time to help cook and serve the meals. The FSP also facilitates coordination and access to medications, clinical services, substance abuse services, vocational rehabilitation, benefits advocacy, and medical care, as well as assistance with finding housing, housing vouchers, and programs to foster the skills necessary to promote the most independent, least restrictive housing possible in the community. Community-based locations for the adult program will be obtained to help integrate these services into the community and help improve access. The MHSA operates two wellness centers in Inyo County, including

one in Bishop and a second in Lone Pine. The wellness centers offer outreach by mental health staff, referrals for homeless individuals in need of mental health services, and other similar recovery and support programs.

Housing and employment services are a critical component of the FSP. A ‘housing first’ model is used, in conjunction with developing a number of different housing options. Supportive housing services are provided. An array of support services are available that are intended to promote housing stability, recovery, and wellness. Participation in these support services is voluntary and not a requirement for eligibility for any rent subsidy or housing voucher.³⁷

D. NONGOVERNMENTAL AND MARKET CONSTRAINTS AND OPPORTUNITIES

The very limited acreage of private land is by far the most significant constraint to achieving Housing Element objectives. Fees and site improvement costs, processing and permit procedures, building codes, land use controls, availability of public services and environmental considerations are important but do not impose significant constraints to development in Bishop. Moreover, the cost of housing in Bishop has been substantially reduced since the 2009 Housing Element was adopted, primarily as a result of the recent economic downturn; as of July 2013, the City’s housing inventory is notably affordable in comparison with California housing generally. The discussion below focuses on the non-governmental and market constraints to housing development.

D.1 Limited Land Resources

The City of Los Angeles is a significant land owner in the City of Bishop as well as the entire Owens Valley. As noted in previous sections, the total area of serviceable and residentially designated City of Los Angeles-owned land in the city limits of Bishop could accommodate over 3,000 dwelling units. This is almost twice the number of dwelling units in the City of Bishop in the 1990 Census. However, Los Angeles DWP has gradually reduced the housing stock in Bishop through the demolition of older dwellings on DWP-owned land. As in prior years, the purpose of Los Angeles DWP in the Owens Valley is to procure water for southland uses. The City of Los Angeles has secured land and water rights throughout the Bishop region and generally has not released land for residential development. Where the City of Los Angeles has released land for development, it primarily has been for non-residential uses. This policy has severely restricted housing development in Bishop and the Owens Valley. It remains the number one housing growth constraint in Bishop.

Although City of Los Angeles lands surround most of Bishop, the western boundary adjoins the Piute-Shoshone Indian Reservation. The tribe is a self-directed and nearly autonomous nation that is not subject to City regulations (Bishop cannot develop or govern the development of tribal lands) or to state mandates such as housing elements. It is tribal policy to use tribal lands for tribal purposes. This constraint adds to the limited land resource available to the City in meeting housing requirements. The remaining acreage of privately held, developable property in the City of Bishop is very limited; as shown previously in Table 23, less than 20 acres of privately-owned vacant land remains in Bishop, most in small parcels scattered throughout the City. The zoning density overlays permit a considerable increase in density when land is redeveloped.

D.2 Affordability (based on Current Trends in Housing Costs)

The Bishop housing market has undergone wide fluctuations over the past decade. To provide an updated snapshot of housing trends, several real estate sources were reviewed including the *Market Activity Report* (for the period from January 2010 through 19 July 2013), the *Real Estate Inventory-Supply and Demand Report Market Indicator* (for the period from January 2010 through 19 July 2013), July 2012 through 18 July 2013), an *Inventory Comparison* (for the period from July 2012 through June 2013), and to provide a basis for comparison the *Current Market Statistics* (from January 2007 through December 2010). A good overview of regional trends is provided in Table 31 below, which summarizes total sales for the 4 year period from 2007 through 2013. These data show a continuous and continuing decline in values (a 34.2% drop over the 6.5-year period), coupled with continuous increases in sale volume and associated reductions in days on the market. For the 2- square mile Bishop area, the median price of homes reached a high of \$413,980 in 2007; values have been falling since then, with a current average value of \$272,447 as of July 2013.

**Table 31
BISHOP RESIDENTIAL MARKET ACTIVITY 2007-2010**

	2007	2008	2009	2010	2011	2012	2013
Homes Sold/Month	NA	7.9	7.9	8.7	9.3	11.1	10.7
Days on Market	NA	140	129	75	89	96	76
Average Sales Price	\$413,982	\$359,409	\$327,055	\$289,834	\$268,562	\$271,174	\$272,447
Current Supply	4.3 months	3.7 months	NA	6.3 months	5 months	4.2 months	4 months

³⁷ Inyo County Behavioral Health, Mental Health Services, Mental Health Services Act (MHSA), Annual Update Fiscal Year 2011/2012.

Table 32 summarizes total residential sales for the entire Bishop multiple listing service for the past 3 and one-half years.

Table 32-MARKET ACTIVITY SUMMARY JANUARY 2010 – JULY 2013					
HOUSING TYPE	NUMBER SOLD	DAYS ON MARKET	AVERAGE LIST PRICE	AVERAGE SALE PRICE/ % OF LIST PRICE	# CURRENTLY PENDING
Single Family	504	145	\$323,468	\$272,031 / 84%	481
Condominium	29	189	\$208,677	\$205,452 / 98.5%	30
Mobile Home	198	143	\$33,325	\$29,131 / 87%	184
Multi-Family Bldg	16	162	\$286,606	\$206,639 / 72%	14

These data show that all housing types in Bishop are today significantly lower in price than when the prior Housing Element was completed in 2009. Nonetheless, rental and mobile homes remain an important affordable housing option in Bishop, available to a wider range of potential buyers than single-family units. Table 33a summarizes rental values for the first quarter of 2013 and Table 33b summarizes mobile home sales in the larger Bishop area for each of the four quarters between July 2012 and July 2013. The data suggest that rental and mobile homes in Bishop have remained affordable to even very low income residents, though the available supply has been limited through this period.

Table 33a
RENTAL VALUES FIRST QUARTER 2013

RENTAL CATEGORY	RENTAL RATES
Single Family Home	\$1,100-\$1,400/month
2-bedroom apartment	\$600-\$900/month
1-bedroom/studio apartment	\$400-\$600/month

Table 33b

Average Sales Price	\$13,500	\$46,900	0	\$31,450
Average List/Sale %	85%	100%	NA	95%
Sold Listings	1	1	0	4

D.3 Land Prices

Land costs are a major contributor to overall housing production prices. The very small amount of privately owned vacant land appears to contribute to land costs, at least as compared to a similar community without the constraints noted previously. As a result the "filtering down" process, which can enable lower income or first-time buyers to enter the housing market, is affected. Although no data was available for the City proper, data for the 20 square mile Bishop area indicates that there were 4 commercial lots and 188-acres of vacant land lots sold between January 2010 and July 2013.

D.4 Construction Costs

Construction costs include materials, labor, financing charges and builder profit. These costs will vary depending on structural requirements (such as snow, wind and seismic conditions) and by the quality of the construction (such as roofing materials, carpeting, cabinets, bathroom fixtures and other amenities). Because of these factors, it is hard to establish an absolute measure of construction cost. According to data obtained from Eastern Sierra Realty, residential properties are currently averaging about \$153 per square foot in the Bishop City limits for active listings, compared with \$164 for recent sales in the City limits³⁸; by comparison, homes were averaging about \$200 per square foot in 2009, \$135 in 2001 and \$50 per square foot in 1995. Custom homes and units with extra structural requirements or amenities can run much higher.

³⁸ Eastern Sierra Realty, *Listing Statistics*, January 1, 2013.

D.5 Conclusions

The data presented above indicate that Bishop housing costs have declined considerably since the 2009 Housing Element was completed, as is true elsewhere in California and beyond. The National Association of Realtors (NAR) notes that the housing market is now strengthening nationwide. As of May 2013, NAR records show a 4.4% increase in existing-home sales and a 2.9% increase in prices in the Northeast (compared with the first quarter of 2012); in the Midwest, sales increased by 15% and prices by 8.2% in the same period, and in the South sales increased by 13.3% along with price increases averaging 9.3%. In contrast, housing supplies in the west have remained sharply limited: existing home sales increased only 0.6% since the first quarter 2012, while prices have increased by 24.4%.³⁹

Despite the short supply, price increases have not been reflected in the Bishop housing market to date. Bishop continues to offer a range of affordable housing opportunities such as HUD's Housing Choice Voucher housing assistance, assistance offered by the California Housing Finance Agency, privately owned mobile home parks, and various programs available through IMACA and Mammoth Housing. If and as housing costs increase, however, the City may again face challenges associated with a comparatively low income job base and high housing costs. An increase in the supply of rental units could help to alleviate this concern as the City continues to work with the City of Los Angeles to obtain lands (through lease or purchase) for the construction of affordable housing projects. Both approaches are reflected in the 5-Year Plan below. Mammoth Housing Authority offers down-payment assistance programs to assist families and individuals without sufficient incomes or equity to enter the housing market. Finally, it remains a very high priority to continue to encourage the City of Los Angeles to release residential land within the present urban boundary that can be used to meet long term housing opportunities in the City of Bishop. Other programs are described under Item F (Affordable Housing Resources).

E. RHNA COMPLIANCE

HCD's 2012 *Regional Housing Need Allocation Plan* for Inyo County Local Governments reflects a number of changes from the allocation prepared by HCD in 2009. The projected 2014-2019 0.45% annual household growth rate is now less than half the 1.3% rate used in 2008, vacancy rates are now higher (2% for owners versus 1.8% in 2007; the renter vacancy rate was held steady at 5%); and the 'Rural County' 150% increase adjustment used in 2008 has been replaced by a one-time reduction in projected need to reflect unprecedented economic conditions over the planning period. Although Bishop did not meet the numeric goals for the prior housing element compliance period (2009-2014), the City has striven to comply with the underlying RHNA objectives (per §65584(d), as discussed below:

Despite the short supply of housing, price increases have not been reflect in the Bishop housing market to date.

- 1. RHNA GOAL 1 - Increase the housing supply and the mix of housing types, tenure and affordability in an equitable manner.** Since housing prices in Bishop have abated substantially in recent years, the housing inventory is now affordable to an increased number of residents. HUD lists a total of 4 affordable rental housing facilities in Inyo County as a whole. Three of these facilities are located in the City of Bishop: the Sunrise Mobile Home Park on McIver, the Valley Apartments on East Clarke, and Willow Plaza Apartments on Willow Street. HUD lists only one other affordable rental facility in Inyo County – the Mt. Whitney Apartments, located in Lone Pine (about 60 miles south of Bishop).⁴⁰ Bishop has continued to work closely with IMACA to preserve these affordable facilities, and has also worked with Mammoth Housing and local mobile home park owners to ensure that every possible affordable housing resource is preserved and expanded where possible.
- 2. RHNA GOAL 2 – Promote infill development and socioeconomic equity, environmental protection and efficient development patterns.** During 2012, Bishop applied for funding through the Sustainable Communities Grant Program, missing the scoring cutoff by less than 1% (Bishop plans to reapply for the 3rd and final funding cycle in 2014). As noted in that application, Bishop has invested \$5 million in downtown improvements and planning has focused on consolidating uses in the city rather than expanding into surrounding unincorporated lands. By focusing on infill, the Bishop General Plan has avoided encroachment onto the open space areas immediately surrounding the city. Creation and later expansion of the downtown mixed use overlay zone (since the 2009 Housing Element was adopted) has established an area of Bishop where infill residential development is permitted by right and encouraged. The overlay

³⁹ National Association of Realtors, *Metro Area Home Price Growth Trend Continues in First Quarter*, News Release, May 9, 2013. www.realtor.org/topics/housing-affordability-index.

⁴⁰ Housing and Urban Development Department (HUD), www.hcd.ca.gov/fa/docs/affrdble-housing/ARHD_Inyo_01-10-13.pdf

zone, in combination with the nearby Warren Street Improvement Project, will also update the downtown core area and may contribute to the City's parallel efforts to balance jobs and housing (see below).

3. **RHNA GOAL 3 – Promote an improved intraregional relationship between jobs and housing.** The City of Bishop is in the very early stages of a targeted General Plan Update and Code Revisions that will include policies and regulations supporting housing in close proximity to commercial and public services, and economic development that maximizes efficient use of infrastructure (including the new fiber optic cable serving the length of Owens Valley). The programs will include a sustainable economic strategy that examines existing and future land use and housing demand in the context of job growth and policies, programs and codes to encourage public and private investment in the community.
4. **RHNA GOAL 4 – Allocate housing need in proportion to the availability of supply in a given category.** The 2012 need allocation for Bishop is similar (in terms of the proportion of need at the very low, low, moderate and above moderate income levels) to the allocation in 2008. HCD made very a slight decrease in the City's proportion of very low income units (from 23.6% to 23.4% now), and a somewhat larger decrease in the City's proportion of above-moderate income units (from 45% to 43.7% now); the proportion of low income units was increased from 13.6% to 14.9% now, and the proportion of moderate income units increased from 17.3% to 18.1%. These adjustments suggest that Bishop income levels may have slipped very slightly in relation to Inyo County incomes as a whole, but the proportions are generally unchanged overall. Bishop is in the early stages of developing an economic development strategy to diversify job opportunities, and associated household income, by capitalizing on the new fiber optic cable. (Note too that HUD lists 3 affordable rental housing facilities in Bishop: the Sunrise Mobile Home Park on McIver, the Valley Apartments on East Clarke, and Willow Plaza Apartments on Willow. Beyond the 3 Bishop facilities noted above, HUD lists only one other affordable rental facility in Inyo County – the Mt. Whitney Apartments, located in Lone Pine (see RHNA Goal 1, above).

F. AFFORDABLE HOUSING RESOURCES

Provided below is an outline of the wide range of programs designed to facilitate the construction, acquisition, rehabilitation and/or preservation of affordable rental and ownership housing, homeless shelters and transitional housing, public facilities and infrastructure, and the development of jobs for lower income workers.⁴¹ Several state and federal programs are also designed to assist in the provision of these services. Note that the state Legislature in 2011 approved the dissolution of all California redevelopment agencies, and the agencies were officially dissolved as of February 2012; as a result, the Redevelopment Set-Aside programs are no longer applicable and have been deleted from the 2014-2019 Housing Element discussion of potential affordable housing resources.

F.1 Development Block Grant (CDBG)

CDBG funds represent another resource to improve the quality of life for residents of Bishop. CDBG monies have in the past been used for a variety of projects benefiting low and moderate income households, including fund for the low-moderate senior housing facility at Sunrise Park. Block grant monies can also be used for rehabilitation, repair and loan programs. In recent years, the City's applications for CDBG funding have not been successful. In recent communications with HCD staff, the City has gained added insight into how future applications might be structured to compete more successfully for the available CDBG programs, and was able to utilize the information in a recent successful CDBG application, part of which will fund IMACA improvements to the Valley Apartments, and part of which will preparation of an update to the Economic Development Element of the Bishop General Plan. HCD has awarded funding for both of these projects. IMACA plans to use its \$1 million in funding to refurbish the Valley Apartments (which represent an important component of the affordable housing stock), and the City plans to use the Economic Development Element update to create an expanded base of long-term professional employment opportunities to benefit residents (particularly young residents) in Bishop and surrounding communities. HCD administers the federal CDBG program for non-entitlement cities and counties (including Bishop). CDBG funding could be pursued through the following programs:

- **Housing rehabilitation:** Eligible activities are health and safety and complementary improvements made to units occupied by low-income households. Such improvements may include repair or replacement of foundations, roofs, siding, flooring, plumbing, and electrical systems. Rehabilitation may also include repair or installation of water or sewer laterals on private property, and complementary rehabilitation activities such as repainting and recarpeting.
- **Activities in support of housing new construction** may include: land acquisition; water and/or sewer improvements (to provide increased capacity needed); site improvements; clearing of site; construction of directly-related streets, curbs/gutters and sidewalks, parks, and recreation facilities; pre-construction studies, plans and funding applications; acquisition, rehabilitation or cost write-down of existing housing; and down-payment assistance and closing costs
- **Community facilities:** Eligible activities include acquisition, rehabilitation, or new construction of buildings and grounds for public purposes such as training, health, education, recreation, nutrition, emergency shelter, day care, or fire

⁴¹Department of Housing and Community Development website, <http://www.hcd.ca.gov/fa/>

protection, or the removal of architectural barriers from public buildings.

- **Public services:** CDBG funds may be spent for labor, supplies and materials used to provide or improve services (such as employment, crime prevention, child care, health, drug/alcohol abuse prevention, and/or recreation).
- **Public works:** activities to correct health and safety hazards include acquisition, construction, rehabilitation and installation.

F.2 Housing Choice Voucher (HCV) Program

The Housing Choice Voucher Program (formerly Section 8) rental assistance vouchers extend rental assistance to low income families and elderly or disabled which spend more than 30% of their income on housing. The subsidy represents the difference between the excess of 30% of the monthly income and the actual housing cost. Vouchers permit tenants to locate their own housing and, unlike prior programs, participants are permitted to rent units beyond the federally determined fair market rent in and area provided the tenant pays the extra rent increment (vouchers are limited to the standard payment versus fair market rent; standard payment is usually lower than fair market rent). IMACA is the designated agency in Inyo County to administer the HCV vouchers. In 2004 there were 29 vouchers allocated to Inyo County residents (15 vouchers to Bishop residents), and currently, there are 29 vouchers allocated to Inyo County, 10 of which were issued to residents in the City of Bishop. However, there are no available vouchers as of July 2013, and the waiting list includes 28 residents throughout Inyo County. The Program is currently closed, and Stanislaus Housing Authority is not accepting any new applications, but may reopen in the future.

F.3 Mobile Home Park Resident Ownership Program (MPROP)

This program, offered by HCD, provides financial and technical assistance to mobile home park residents who wish to purchase their mobile home parks and convert the park to resident ownership. Loans are made to low income mobile home park residents or public organizations to control housing costs. Low interest short and long term loans are offered to cover the costs of:

- **Purchase (conversion) of a mobile home park** by a resident organization, nonprofit entity or local public agency;
- **Rehabilitation or relocation** of a purchased park;
- **Purchase by a low income resident** of a share or space in a converted park.

With nearly 20% of Bishop's housing stock comprised of mobile home units, this is an important program to allow tenants to control their housing costs. Where the present owner is a willing seller, the City can facilitate use of this program by advertising its availability to mobile home park residents and by serving as co-applicant for resident organizations applying to HCD for funding. The City also provides information to residents about MPROP units that have become available (usually through vacancy) and assists in the sale of MPROP units. As of July 2013, there are three units available with a long list of potential buyers. The City collaborates with a real estate agent in assisting potential buyers submit offers and obtain loans. All of the MPROP units in Bishop fall within the low or very low income categories.

F.4 Senior Shared Housing

The Senior Shared Housing Program is no longer operating in Bishop or Inyo County. The 2009 Housing Element described this as a program operated by the Inyo Mono Area Agency on Aging (IMAAA) to help seniors locate roommates to share housing, thereby generating additional income to support the household. IMAAA has been replaced by the Eastern Sierra Area Agency on Aging (ESAAA), and although ESAAA continues to provide a range of services to senior citizens in Inyo and Mono Counties, the services no longer including housing assistance.

F.4 Single Room Occupancy (SRO)

The closure of a motel can open up opportunities for conversion of existing units into transitional housing units called SROs. SROs are like apartments with the exception that common kitchen facilities may be used when separate facilities are not available in each unit. SROs are less costly to rent and maintain than full service units. With support from the City of Bishop, IMACA converted a motel into affordable apartments for senior housing; however, in this instance, separate kitchen facilities were provided. This housing is still owned and operated by IMACA. In addition, as noted in §IV.B, the City and IMACA have had a long-term interest in the potential acquisition of two additional motel sites that may be suitable for SRO or other similar affordable housing conversion projects. These sites include the existing Elm Street Motel located at the corner of West Elm and North Warren Street, and the existing Starlight Motel located at Short and Sneden. With respect to the Elm Street Motel, IMACA had previously made a bid to acquire this site in 1998 and had the funds available to proceed, but the deal fell through due to problems in the real estate transaction. Since 1998, the owner has not shown an interest in selling, but IMACA has continued to keep an eye on this site for possible future purchase. With respect to the Starlight Motel, IMACA has received prior offers to but has not accepted previously due to the absence of sufficient funds. However, the site is well suited for conversion as an affordable living unit and IMACA has maintained continued interest in future acquisition when a suitable funding opportunity is identified. There has been no change in status for either the Elm Street Motel or the Starlight Motel.

F.5 Building Equity and Growth in Neighborhoods Program (BEGIN)

This HCD program is designed to reduce local regulatory barriers to affordable ownership housing, and provide down-payment assistance loans to qualifying first-time low- and moderate-income buyers of homes in BEGIN projects. It offers grants to cities, counties, or cities and counties to make deferred-payment second mortgage loans to qualified buyers of new homes, including manufactured homes on permanent foundations, in projects with affordability enhanced by local regulatory incentives or barrier reductions. It also offers loans by grant recipients at simple interest to qualifying homebuyers, not to exceed 20 percent of home sales price or \$30,000, whichever is less. As of July 2013, IMACA has three grants in the BEGIN program through Mammoth Housing, but none of the grants are for projects in Bishop.

F.6 CalHome Program

The CalHome program was established to enable low and very-low income households to become or remain homeowners. Program funds are available for public agencies or nonprofit corporations in the form of:

- **Grants** for first-time homebuyer down payment assistance, home rehabilitation, including manufactured homes not on permanent foundations, acquisition and rehabilitation, homebuyer counseling, self-help mortgage assistance programs, or technical assistance for self-help homeownership.
- **Loans** for real property acquisition, site development, predevelopment, construction period expenses of homeownership development projects, or permanent financing for mutual housing and cooperative developments. Project loans to developers may be forgiven as developers make deferred payment loans to individual homeowners.
- **Assistance** to individual households in the form of deferred-payment loans, payable on sale or transfer of the homes, or when they cease to be owner-occupied, or at maturity.

F.7 HOME Program

The HOME Program was created under the National Housing Affordability Act of 1990. Under HOME, HUD awards funds to localities on the basis of a formula that considers the "tightness" of the local housing market, inadequate housing, poverty, and housing production. HOME funding is provided to jurisdictions to assist either rental housing or home ownership through acquisition, construction, reconstruction, and/or rehabilitation of affordable housing. Also possible is tenant-based rental assistance, property acquisition, site improvements, and other expenses related to the provision of affordable housing. Assistance is also available for projects that serve a group identified as having special needs related to housing. The local jurisdiction must make matching contributions to affordable housing under HOME. The State administers the HOME program for non-entitlement jurisdictions like Bishop, and has \$44 million in funding to distribute state-wide during each fiscal year. The City of Bishop will be notified of funding availability by HCD, and IMACA has indicated an interest in pursuing this program to apply for funding in support of the Silver Peaks project (as noted earlier, the City is current obtaining an appraisal with the goal of submitting a purchase offer, if feasible, in support of this project). Mammoth Lakes Housing has also participated in Home Program funding opportunities and will assist with future applications as the opportunities arise.

F.8 Density Bonus Law

State Government Code §65915, amended by SB 1818, provides for density bonus or similar incentives when a housing developer agrees to construct at least one of the following:

- 10% of total units in a housing development for persons/families of lower income as per Health & Safety Code §50079.5
- 5% of the total units of a housing development for very low income HH as defined in Health and Safety Code §50105.
- Thirty-five units of a housing development for qualifying senior residents as defined in §51.2 of the Civil Code.

HCD has significantly reduced these goals since the 2004 Housing Element was adopted in response to feedback from builders and developers. The Density Bonus Law is intended to provide an incentive to developers to provide low income housing, senior housing or both to provide a balance of housing opportunities in the City. As part of the density bonus program, the City may consider granting a density bonus or, in lieu of granting a density bonus, the City may grant an incentive of direct financial assistance programs. In order to assure the long-term affordability of housing units, the developer may be required to enter into a development agreement or other binding contract with the City, and bonus programs are be subject to compliance with adopted urban water management plans and other service constraints and programs. The City continued to support the use of density bonuses but has not had an opportunity due to the lack of development in Bishop over the past 5 years,

F.9 Non-Profit Housing Development Corporations (HDC)

The non-profit Housing Development Corporations promote, assist or sponsor housing for low and moderate income persons. An HDC does not build "public housing;" rather, it builds or rehabilitates housing for people who cannot afford market rate housing but whose incomes are generally above the poverty level and acts as the applying agency for grants and loans. To keep rents within affordable limits, government assistance of some kind is usually necessary. Thus, such housing is often referred to as "assisted housing." An HDC may build rental housing or sponsor housing developments intended for ownership. IMACA has

managed and owned some affordable housing projects county-wide and is currently pursuing several HCD housing programs in the City of Bishop, particularly the 72-unit Silver Peaks affordable housing project (as a joint endeavor with the City of Bishop). IMACA has sought and will continue to seek additional affordable housing opportunities such as this program affords.

F.10 Hope for Homeowners (H4H) Program The federal Housing and Urban Development Dept. (HUD) offers a wide range of programs to assist homeowners modify and/or refinance their home loans. The range of available programs and assistance has been expanded over recent years to respond to the economic recession. Included are programs to modify or refinance loan payments, programs specifically designed to help homeowners with ‘underwater’ mortgages, assistance for unemployed homeowners, and managed exit programs for borrowers who cannot afford their mortgage or are dealing with foreclosure.

F.11 Weatherization Program

The Department of Energy, Weatherization Assistance Program (DOE WAP) has long served as the core program for delivering energy conservation services to low-income Californians. Through IMACA, the Weatherization Assistance Program reduces the heating and cooling costs for low-income families by improving the energy efficiency of their homes and ensuring their health and safety. Among low-income households, the program focuses on those with elderly residents, individuals with disabilities, and families with children.

IMACA also administers the Low Income Home Energy Assistance Program (LIHEAP) on behalf of the State of California. Residents who meet income guidelines are eligible for roof, furnace or water heater repairs and replacements when funding is available. Eligibility is 80% of state median income.

F.12 Energy Crisis Intervention Program (ECIP)

The ECIP is another very active program in Bishop, and approximately half of Inyo County’s funds are expended in serving Bishop households enrolled in the Energy Crisis Intervention Program (ECIP) and the weatherization program. ECIP is available each year as *either* \$300 for electricity *or* 2 cords of wood, *or* \$700 in propane *or* \$700 in wood pellets. The LIHEAP Weatherization Program assists about 20 eligible low-income Bishop families and individuals each year with up to \$3,000 in energy conservation, home repairs and heating and cooling assistance in the form of propane, pellets, kerosene, oil or electricity support to

F.13 Homeless and Emergency Shelter Programs

HCD administers several programs for the funding of homeless and emergency shelters. Included are:

- **Emergency Housing and Assistance Program Operating Facility Grants (EHAP)** provide facility operating grants for emergency shelters, transitional housing projects, and supportive services for homeless individuals and families. Each county receives a formula grant allocation; 20% of the total allocation is available to non-urban counties to provide direct client housing, including facility operations and administration, residential rent assistance, leasing or renting rooms for provision of temporary shelter, capital development activities of up to \$20,000 per site, and administration of the award (limited to 5 percent).
- **Emergency Housing and Assistance Program Capital Development (EHAPCD)** funds capital development activities for emergency shelters, transitional housing, and safe havens that provide shelter and supportive services for homeless individuals and families through deferred payment loans at 3 percent simple interest, forgiven when loan term is complete. Term ranges from 5 to 10 years based on the development activity. Again, 80% of the total allocation is available to urban counties, and 20% to non-urban counties.
- **Governor’s Homeless Initiative** is an interagency effort aimed at reducing homelessness. The funding program component of the Governor’s Homeless Initiative assists with the development of permanent supportive housing for persons with severe mental illness who are chronically homeless. It is a joint project of HCD, the California Housing Finance Agency (CalHFA), and the Department of Mental Health (DMH). The program provides deferred payment permanent loans under HCD’s Multifamily Housing Program (MHP); construction, bridge and permanent loans from CalHFA; and limited grant funds for rental assistance from DMH. These loans may be used for new construction, rehabilitation, or acquisition and rehabilitation of permanent rental housing, and the conversion of nonresidential structures to rental housing. Projects must have commitments of Mental Health Services Act funds for supportive services, and typically require rent subsidies as well.

F.14 Other Affordable Housing Resources

The City of Bishop operates a code enforcement program that is focused on the elimination of housing conditions that violate public health, safety and welfare codes. The following are additional programs currently undertaken by the City to provide new housing and improvement of existing housing stock:

- Continue streamlining all planning procedures to assist developers.
- Encourage use of the Title 1 Loan Program to provide low interest loans to low and moderate income home owners who

need to borrow for rehabilitation work.

- Permit mobile and modular housing on residential lots.
- Enforce energy regulations to provide better housing and lower maintenance costs.
- Take advantage of ongoing programs to assist developers in site selection and utilization of existing federal and state programs to construct or rehabilitate units for low and moderate income housing.
- Use state/federal loans & grants for public improvements; retain tax dollars for infrastructure development & maintenance.
- Allow construction of second units on residentially zoned lots consistent with state law.
- Continue to support equal opportunity actions.
- Enforce State regulations for disabled residents (Title 24 and SB 520).
- Encourage the maintenance of all residential units even if nonconforming as a means of conserving the housing stock.
- Promote the establishment of programs that are aimed at maintaining existing housing units that are in need of repair.

The City works closely with IMACA, Wild Iris, Mammoth Housing and the County Department of Mental Health Services to obtain available grants and loans to assist at-risk populations, including the homeless, disabled, elderly, low-income and those with mental health problems. The lack of availability of developable sites hampers the City's ability to acquire and construct projects under some of these programs.

A. GOALS

The City of Bishop General Plan Land Use Element establishes the following housing goal: *"To provide for quality residential life by maintaining and improving the existing housing stock and by insuring that the housing needs of the entire community are being met. This goal includes the provision of housing for the special housing needs of the elderly, low income families, handicapped, and individuals requiring group residential care."* Other housing goals described in the Land Use Element of the General Plan include:

- *"The City will encourage the Los Angeles DWP to coordinate a long-term land development plan in the Bishop planning area that will allow needed commercial, residential, and industrial development to take place."*
- *"To encourage the balance and diversity of housing types to more closely reflect the needs of various income groups in the City of Bishop."*
- *"To encourage development of higher density development within walking or bicycling distance to the City's business and commercial areas."*
- *"To provide adequate housing opportunities for low and moderate income households as required by the State of California."*

B. ASSOCIATED HOUSING POLICIES

The City's residential goals are supported by a number of specific policies. Relevant residential policies contained in the *General Plan Land Use Element* are outlined below.

- *"The City will encourage the Los Angeles DWP to coordinate a phased release of residentially zoned areas of Bishop."*
- *"The City of Bishop, in conjunction with the City of Los Angeles and Inyo County, should identify all lands which are not directly related to the provision of water or power and to provide an appropriate means of conveying these lands to private citizens or the City for implementation in accord with the policies of this plan."*
- *"As a high priority for residential development, the City will encourage in-fill and redevelopment of existing private land into residential densities specified on the land use map."*

Additional policies and programs supported by the City are outlined below:

- The City supports legislation aimed at providing adequate housing for all economic segments of the community.
- The City will continue to work with IMACA, Mammoth Housing, and Inyo County to improve the supply and quality of the regional housing stock.
- The City supports construction of subsidized housing, rehabilitation and rental assistance for very low, low and moderate incomes, and special needs households.
- The City encourages modular, prefabricated and other innovative housing designs that reduce housing costs.
- The City encourages maintenance of all residential uses, even if new or non-conforming, and upgrades to new, existing and proposed residential units
- In all housing programs, priority should be given to local groups or individuals with demonstrated housing needs including the elderly, disabled, homeless, households headed by a single parent and income limited households.
- Local financial institutions are encouraged to become involved with programs which expand home ownership and rehabilitations opportunities.
- The City supports state and federal law on non-discrimination in housing.
- The City supports efforts of IMACA and Mammoth Housing to provide housing in Bishop and throughout Inyo County.
- The City supports granting a density bonus to developers of projects agreeing to comply with requirements of Government Code § 65915 as modified by SB 1818.

- In conjunction with Inyo County, the City of Bishop encourages the City of Los Angeles to do the following:
 - Consider developing an action plan with short-term (i.e., 5-year) and long-term (i.e., 15 or 20-year) goals for enabling the City of Bishop to acquire and annex City of Los Angeles lands, including criteria for selecting identified parcels and steps to comply with Los Angeles DWP requirements.
 - Explore a program allowing Bishop to acquire City of Los Angeles lands by direct purchase rather than auction.
 - Develop an inventory of City of Los Angeles land and dwellings in Bishop, and convey to private entities those lands that are not essential to the City of Los Angeles DWP operations.
 - Revise the residential lease/rental policy to permit the long term lease of City of Los Angeles-owned residential units to private persons.
 - Adopt a policy of not demolishing older dwellings until a rehabilitation assessment can be made; where feasible, permit the concurrent long term lease and rehabilitation by private persons.
- The City of Bishop will maintain the R-3 and R-2 zones for multiple dwelling units.
- In compliance with SB 1960, the City shall consider a mobile home constructed to the 1974 HUD standards and affixed to a permanent foundation to be a single family dwelling for the purposes of zoning and land use regulations. The definition of a single family dwelling has been revised to include such mobile homes. Design criteria permitted under the law relating to appearance may be applied.
- The City shall comply with AB 1866 and all other relevant state and local laws and ordinances. In reviewing housing projects designed to meet the elderly, disabled and other special needs groups, the City will consider lifestyle issues, particularly as it relates to the density limits established in the Land Use Element.
- Bishop supports County Veterans Service Office assistance to veterans on state and federal veterans housing programs.
- The City encourages in-fill & redevelopment of existing private land for residential use consistent with the land use map.
- The City assists developers to construct affordable housing within the city limits.
- The City encourages maintenance of units and properties in need of repairs in order to reduce the number of units in need of complete replacement in the future.
- The City will continue to work with local employers who have expressed interest in assisting with housing development activities in order to attract and retain employees. Discussions will touch on the following issues:
 - Consider conditional use permits for on-site housing at employment sites
 - Explore ways in which local employers can assist IMACA
 - Investigate tax incentives that support affordable housing development
- The City will consider increasing the range of residential uses permitted in the mixed use overlay zone.
- As part of the economic development strategy, Bishop will explore ways in which the Warren Street Improvement Project can facilitate housing opportunities in the overlay zone to help meet the housing needs of an increased job base.

C. ACTIONS – FIVE YEAR HOUSING PROGRAM

The Bishop Housing Element policies and actions were developed as a result of an analysis of existing and future housing needs contained in the Planning Analysis. The Analysis concluded that, in general, the housing needs of the community will continue to be met by the private sector. However, the Analysis also indicated that the private sector will not be able to meet the needs of all present and future residents. In particular, many of the City’s elderly, younger and single parent households will have considerable difficulty in obtaining and maintaining housing. These difficulties include excessive payment for rents due to an undersupply of affordable rental units, a market closed to many first time buyers, and displacement and loss of repairable units resulting from commercial development and higher intensity residential uses.

While the causes of these problems are varied, several are inherent in Inyo County. A shortage of available land due to extensive public ownership, a relatively high proportion of senior citizens and service industry employed households, an absence of governmental housing funding capability, obstacles and constraints on the private sector, and a community preference for single family ownership units all contribute in varying degrees to the existing problem.

The Five-Year Housing Program below identifies specific programs aimed at these particular housing-related problems. The Housing Program encompasses actions considered most likely to be effective in meeting community housing needs. The financial resources needed to provide "adequate housing for all economic segments" are largely available from state and federal housing agencies in the form of grants, loans and other forms of assistance. The Bishop-based IMACA was created for this purpose and will continue to assume the major responsibility for achievement of the housing objectives contained in this Housing Element.

In addition, the City will continue to maintain corporate and police powers for meeting the City’s housing and economic development objectives including zoning and assistance with grant applications in conjunction with the specific program components of the overall Housing Action Program. The City also will support IMACA (and Mammoth Housing) in providing

non-market rental housing opportunities for low, moderate and special needs households and individual through the construction of assisted housing, rental assistance, rehabilitation and other direct housing assistance.

This Housing Program as shown in Tables 34 and 35 sets forth a five-year schedule of actions for the City of Bishop to implement housing policies and achieve identified housing goals. The City will strive to review and adopt feasible policy goals as soon as possible, and will continue to work diligently to purchase or lease land from the City of Los Angeles.

Table 34
CITY OF BISHOP HOUSING PROGRAM GOALS FOR 2014-2019
OVERALL 5-YEAR HOUSING PROGRAM GOALS

1. **CITY OF LOS ANGELES LANDS:** Continue to work with City of Los Angeles towards purchase, transfer or long-term lease of vacant City of Los Angeles DWP land to the City of Bishop for residential development, including affordable housing. Establish a dialogue with the new Los Angeles Mayor and administration to facilitate renewed opportunities for this key housing element goal. Timeline: Ongoing.
2. **HCD LEASE TERMS:** Work with HCD to seek a case-by-case waiver that would allow HCD funding on property leased for 40 years (which is the maximum allowed by the City of Los Angeles) instead of 55 years (which is the current minimum period set by HCD) and to seek assistance in resolution of incompatible loan terms wherein federal and state agencies will consummate a grant only after the other agency makes the first loan commitment. Seek HCD assistance in establishing program terms that allow the City of Los Angeles and the City of Bishop to share affordable housing credits in cases where LADWP lands are sold or leased through the aegis of the City of Bishop for the purpose of providing affordable housing opportunities. Timeline: Ongoing.
3. **GRANT FUNDING:** Maximize value of 2013 CDBG funds for rehab of Valley Apartments and for updating the Economic Development Element, and continue to pursue all applicable grant and funding opportunities to assist in the further development of affordable housing and employment opportunities for current and future Bishop residents. Timeline: Grant monies to be expended within 3 years; grant review process to be annual and ongoing with goal of submitting at least one application during the planning period.
4. **UPDATES TO THE GENERAL PLAN LAND USE & ECONOMIC DEVELOPMENT ELEMENTS.** The City is currently in the very early stages of a process that will eventually update the General Plan Land Use Element and Economic Development Element. It is anticipated that the updated Land Use and Economic Development Elements will explore the value and feasibility of establishing an expanded range of residential designations compatible with mixed land uses, similar to the range of land uses currently permitted in the downtown overlay zone. Timeline: General Plan updates to be completed within 3 years (contingent on funding availability).
5. **WARREN STREET IMPROVEMENT PROJECT.** In tandem with the General Plan updates above, the City will consider whether the Warren Street Improvement Project may be expanded to support and extend the uses (particularly residential uses) of the downtown mixed use overlay zone. Timeline: Expanded uses within the Warren Street Improvement project area will be considered as part of the General Plan update process, over a period of 3 years (contingent on funding availability).
6. **MUNICIPAL CODE UPDATE:** Toward completion of the General Plan updates above, the City will evaluate an update to the Bishop Municipal Code to incorporate (as appropriate) the land use planning modifications developed through the General Plan process. As part of this update, the City will also consider ways in which the zoning regulations can be modified to encourage higher density housing to support goals of the land use and economic development strategies. Timeline: Municipal Code update to be completed within 4 years, following the General Plan updates (contingent on funding availability).
7. **PERSONS WITH DISABILITIES:** Continue working with IMACA to strengthen programs that inform families in the City of Bishop about housing and services available for persons with developmental disabilities. Timeline: General Plan updates to be completed within 3 years (contingent on funding availability).
8. **DENSITY BONUSES:** Continue to offer density bonuses to developers who construct infill projects as a means to optimize the availability of housing (despite significant limitations on available land) and facilitate the set-aside of affordable/senior/disabled housing units. Timeline: Ongoing.
9. **MOBILE HOME PARK RESIDENT OWNERSHIP PROGRAM (MPROP):** Facilitate this program by advertising its availability to mobile home park residents and by serving as co-applicant for resident organizations applying to HCD for funding in support of MPROP objectives. Timeline: Ongoing.

10. **MONITOR HOUSING STOCK:** Continue to maintain an inventory of trailer parks, mobile home parks and apartments provide housing for disadvantaged populations, and monitor this housing stock to ensure that it remains affordable for low income and disadvantaged residents. Timeline: Ongoing.

11. **AFFORDABLE HOUSING ASSISTANCE PROGRAM:** Continue to (a) support IMACA and Mammoth Housing Authority in identifying grant opportunities and in preparing grant applications for low- and extremely low-income housing projects, (b) provide priority processing and a waiver or deferral of building and remodel permit fees for projects that provide affordable housing assistance to assist extremely-low, very low, low and moderate income households, and (c) maintain outreach to developers to incentivize the development of housing for households earning 30% or less of Inyo County median family income. Timeline: Ongoing; grant review process to be annual and ongoing with goal of assisting IMACA and Mammoth Housing in the submittal of at least two applications during the planning period.

12. **PUBLIC EDUCATION:** Continue to assist IMACA in preparing and distributing literature about equal housing opportunities. Provide information about weatherization assistance and utility cost reduction programs. Timeline: Ongoing.

13. **TRANSITIONAL AND SUPPORTIVE HOUSING:** Consider amending Ordinance 544 (Transitional and Supportive Housing) to reflect the revised definitions and requirements for Transitional Housing and Supportive Housing as adopted by the state in SB 745, and the requirements pursuant to SB 2. Timeline: Within 2 years of 2014 Housing Element adoption.

**Table 35
PROGRESS TOWARD GOALS BY YEAR 2014-2019**

YEAR	GOAL	STEPS
2014	CITY OF LOS ANGELES LANDS	Continue to negotiate with the City of Los Angeles for purchase, transfer or long-term lease of vacant lands within the city limits. Work with state and federal elected officials to develop support if appropriate.
	HCD LEASE TERMS	Work with HCD to (a) obtain case-by-case waivers for HCD funding on the 55-year lease requirement; (b) reconcile incompatible loan terms; and (c) share affordable housing credits with the City of Los Angeles on LADWP-owned properties that are used for affordable housing in Bishop.
	GRANT FUNDING	Maximize value of 2013 CDBG grant awards and seek additional funding for affordable housing and employment opportunities for Bishop residents.
	GENERAL PLAN UPDATES	Complete the Economic Development Element update (initiated in late 2013) per CDBG grant funding schedule requirements. Initiate work on the General Plan Land Use Element drawing on land use recommendations identified in the Economic Development Element update.
	PERSONS WITH DIABILITIES	Continue working with IMACA to strengthen programs that inform families in the City of Bishop about housing and services available for persons with developmental disabilities.
	DENSITY BONUSES	Continue to offer density bonuses to developers who construct infill projects, to optimize the availability of housing (despite significant limitations on available land) and facilitate the set-aside of affordable/senior/disabled housing units.
	MPROP	Continue to advertise the availability of this program to mobile home park residents, and continue to serve as co-applicant for resident organizations applying to HCD for funding in support of program objectives.
	MONITOR HOUSING STOCK	Continue to maintain an inventory of trailer parks, mobile home parks and apartments provide housing for disadvantaged populations, and monitor this housing stock to ensure that it remains affordable to residents in need.
	AFFORDABLE HOUSING ASSISTANCE PROGRAM	Continue to (a) support IMACA and Mammoth Housing Authority in identifying grant opportunities and in preparing grant applications for low- and extremely low-income housing projects, (b) provide priority processing and a waiver or deferral of building and remodel permit fees for projects that assist extremely-low, very low, low and moderate income households, and (c) maintain outreach to developers to incentivize the development of housing for households earning 30% or less of Inyo County median family income.
	PUBLIC EDUCATION	Continue to assist IMACA in preparing and distributing literature about equal housing opportunities. Provide information about weatherization assistance and

		utility cost reduction programs.
2015	CITY OF LOS ANGELES LANDS	Continue to negotiate with the City of Los Angeles for purchase, transfer or long-term lease of vacant lands within the city limits. Work with state and federal elected officials to develop support if appropriate.
	HCD	Work with HCD to (a) obtain case-by-case waivers for HCD funding on the 55-year lease requirement; (b) reconcile incompatible loan terms; and (c) share affordable housing credits with the City of Los Angeles on LADWP-owned properties that are used for affordable housing in Bishop.
	GRANT FUNDING	Maximize value of 2013 CDBG grant awards and seek additional funding for affordable housing and employment opportunities for Bishop residents.
	GENERAL PLAN UPDATES	Continue work on the General Plan Land Use Element drawing on land use recommendations identified in the Economic Development Element update.
	WARREN STREET IMPROVEMENT PROJECT	In tandem with the General Plan updates above, the City will consider expanding the Warren Street Improvement Project to support and extend the mix of residential uses in the downtown mixed use overlay zone.
	PERSONS WITH DIABILITIES	Continue working with IMACA to strengthen programs that inform families in the City of Bishop about housing and services available for persons with developmental disabilities.
	DENSITY BONUSES	Continue to offer density bonuses to developers who construct infill projects, to optimize the availability of housing (despite significant limitations on available land) and facilitate the set-aside of affordable/senior/disabled housing units.
	MPROP	Continue to advertise the availability of this program to mobile home park residents, and continue to serve as co-applicant for resident organizations applying to HCD for funding in support of program objectives
	MONITOR HOUSING STOCK	Continue to maintain an inventory of trailer parks, mobile home parks and apartments provide housing for disadvantaged populations, and monitor this housing stock to ensure that it remains affordable to residents in need.
	AFFORDABLE HOUSING ASSISTANCE PROGRAM	Continue to (a) support IMACA and Mammoth Housing Authority in identifying grant opportunities and in preparing grant applications for low- and extremely low-income housing projects, (b) provide priority processing and a waiver or deferral of building and remodel permit fees for projects that assist extremely-low, very low, low and moderate income households, and (c) maintain outreach to developers to incentivize the development of housing for households earning 30% or less of Inyo County median family income.
	PUBLIC EDUCATION	Continue to assist IMACA in preparing and distributing literature about equal housing opportunities. Provide information about weatherization assistance and utility cost reduction programs.
TRANSITIONAL & SUPPORTIVE HOUSING	Consider amending Ordinance 544 to reflect the revised definitions and requirements for Transitional Housing and Supportive Housing as adopted by the state in SB 745, and the requirements pursuant to SB 2.	
2016	CITY OF LOS ANGELES LANDS	Continue to negotiate with the City of Los Angeles for purchase, transfer or long-term lease of vacant lands within the city limits. Work with state and federal elected officials to develop support if appropriate.
	HCD	Work with HCD to (a) obtain case-by-case waivers for HCD funding on the 55-year lease requirement; (b) reconcile incompatible loan terms; and (c) share affordable housing credits with the City of Los Angeles on LADWP-owned properties that are used for affordable housing in Bishop.
	GRANT FUNDING	Maximize value of 2013 CDBG grant awards and seek additional funding for affordable housing and employment opportunities for Bishop residents.
	GENERAL PLAN UPDATES	During 2016, the City will complete its General Plan update process.
	WARREN STREET IMPROVEMENT PROJECT	During 2016, the City will complete its General Plan update process including any modifications to the Warren Street Improvement Project.
	MUNICIPAL CODE UPDATE	As the General Plan process comes to a close, the City will consider updating the Bishop Municipal Code to incorporate (as appropriate) land use planning

		modifications developed through the General Plan process. The City will also consider ways in which zoning regulations can be modified to encourage higher density housing in support of land use and economic development strategies.
	PERSONS WITH DIABILITIES	Continue working with IMACA to strengthen programs that inform families in the City of Bishop about housing and services available for persons with developmental disabilities.
	DENSITY BONUSES	Continue to offer density bonuses to developers who construct infill projects, to optimize the availability of housing (despite significant limitations on available land) and facilitate the set-aside of affordable/senior/disabled housing units.
	MPROP	Continue to advertise the availability of this program to mobile home park residents, and continue to serve as co-applicant for resident organizations applying to HCD for funding in support of program objectives
	MONITOR HOUSING STOCK	Continue to maintain an inventory of trailer parks, mobile home parks and apartments provide housing for disadvantaged populations, and monitor this housing stock to ensure that it remains affordable to residents in need.
	AFFORDABLE HOUSING ASSISTANCE PROGRAM	Continue to (a) support IMACA and Mammoth Housing Authority in identifying grant opportunities and preparing grant applications for low- and extremely low-income housing projects, (b) provide priority processing and waive or defer building and remodel permit fees for projects that assist extremely-low, very low, low & moderate income households, and (c) maintain outreach to developers to incentivize the development of housing for households earning 30% or less of Inyo County median family income.
	PUBLIC EDUCATION	Continue to assist IMACA in preparing and distributing literature about equal housing opportunities. Provide information about weatherization assistance and utility cost reduction programs.
	TRANSITIONAL & SUPPORTIVE HOUSING	Consider amending Ordinance 544 to reflect the revised definitions and requirements for Transitional Housing and Supportive Housing as adopted by the state in SB 745, and the requirements pursuant to SB 2.
2017	CITY OF LOS ANGELES LANDS	Continue to negotiate with the City of Los Angeles for purchase, transfer or long-term lease of vacant lands within the city limits. Work with state and federal elected officials to develop support if appropriate.
	HCD	Work with HCD to (a) obtain case-by-case waivers for HCD funding on the 55-year lease requirement; (b) reconcile incompatible loan terms; and (c) share affordable housing credits with the City of Los Angeles on LADWP-owned properties that are used for affordable housing in Bishop.
	GRANT FUNDING	Maximize value of 2013 CDBG grant awards and seek additional funding for affordable housing and employment opportunities for Bishop residents.
	GENERAL PLAN UPDATES	As opportunities arise, Bishop will pursue and/or approve applications to implement land use modifications approved in the General Plan updates.
	MUNICIPAL CODE UPDATE	During 2017, the City will complete the Bishop Municipal Code update (if and as approved by City Council).
	PERSONS WITH DIABILITIES	Continue working with IMACA to strengthen programs that inform families in the City of Bishop about housing and services available for persons with developmental disabilities.
	DENSITY BONUSES	Continue to offer density bonuses to developers who construct infill projects, to optimize the availability of housing (despite significant limitations on available land) and facilitate the set-aside of affordable/senior/disabled housing units.
	MPROP	Continue to advertise the availability of this program to mobile home park residents, and continue to serve as co-applicant for resident organizations applying to HCD for funding in support of program objectives
	MONITOR HOUSING STOCK	Continue to maintain an inventory of trailer parks, mobile home parks and apartments provide housing for disadvantaged populations, and monitor this housing stock to ensure that it remains affordable to residents in need.
	AFFORDABLE HOUSING ASSISTANCE	Continue to (a) support IMACA and Mammoth Housing Authority in identifying grant opportunities and preparing grant applications for low- and extremely low-

	PROGRAM	income housing projects, (b) provide priority processing and waive or defer building and remodel permit fees for projects that provide assistance to extremely-low, very low, low & moderate income households, and (c) maintain outreach to developers to incentivize the development of housing for households earning 30% or less of Inyo County median family income.
	PUBLIC EDUCATION	Continue to assist IMACA in preparing and distributing literature about equal housing opportunities. Provide information about weatherization assistance and utility cost reduction programs.
	TRANSITIONAL & SUPPORTIVE HOUSING	Consider amending Ordinance 544 to reflect the revised definitions and requirements for Transitional Housing and Supportive Housing as adopted by the state in SB 745, and the requirements pursuant to SB 2
2018	CITY OF LOS ANGELES LANDS	Continue to negotiate with the City of Los Angeles for purchase, transfer or long-term lease of vacant lands within the city limits. Work with state and federal elected officials to develop support if appropriate.
	HCD	Work with HCD to (a) obtain case-by-case waivers for HCD funding on the 55-year lease requirement; (b) reconcile incompatible loan terms; and (c) share affordable housing credits with the City of Los Angeles on LADWP-owned properties that are used for affordable housing in Bishop.
	GRANT FUNDING	Maximize value of 2013 CDBG grant awards and seek additional funding for affordable housing and employment opportunities for Bishop residents.
	GENERAL PLAN UPDATES	As opportunities arise, Bishop will pursue and/or approve applications implementing land use modifications approved in the General Plan updates.
	PERSONS WITH DIABILITIES	Continue working with IMACA to strengthen programs that inform families in the City of Bishop about housing and services available for persons with developmental disabilities.
	DENSITY BONUSES	Continue to offer density bonuses to developers who construct infill projects, to optimize the availability of housing (despite significant limitations on available land) and facilitate the set-aside of affordable/senior/disabled housing units.
	MPROP	Continue to advertise the availability of this program to mobile home park residents, and continue to serve as co-applicant for resident organizations applying to HCD for funding in support of program objectives
	MONITOR HOUSING STOCK	Continue to maintain an inventory of trailer parks, mobile home parks and apartments provide housing for disadvantaged populations, and monitor this housing stock to ensure that it remains affordable to residents in need.
	AFFORDABLE HOUSING ASSISTANCE PROGRAM	Continue to (a) support IMACA and Mammoth Housing Authority in identifying grant opportunities and preparing grant applications for low- and extremely low-income housing projects, (b) provide priority processing and waive or defer building and remodel permit fees for projects that assist extremely-low, very low, low & moderate income households, and (c) maintain outreach to developers to incentivize the development of housing for households earning 30% or less of Inyo County median family income.
		PUBLIC EDUCATION
2019	CITY OF LOS ANGELES LANDS	Continue to negotiate with the City of Los Angeles for purchase, transfer or long-term lease of vacant lands within the city limits. Work with state and federal elected officials to develop support if appropriate.

PUBLIC EDUCATION	Continue to assist IMACA in preparing and distributing literature about equal housing opportunities. Provide information about weatherization assistance and utility cost reduction programs.

To: Planning Commissioners
From: David Grah, Director of Public Works
Subject: Parking Configuration on Church and Academy with Warren Street Project
Date: 15 January 2014

General:

Planning Commission review is requested of the parking configurations on Church Street and Academy Street proposed as a part of the Warren Street Improvements project.

Discussion:

The Warren Street project is generally planned to improve the full length of Warren Street with new pavement, curb, sidewalk, street trees, street lights, and other improvements. The project is planned to include pocket parks, seating areas, colored concrete with designs, landscaping, banners, bike racks, restrooms, and shade trees. The blocks of South, Lagoon, Church, Academy, Pine, and Elm streets between Warren and Main are also included in the overall project.

The total cost of the project is about \$4.2 million but only about \$2.4 is available now. As a result, the project will be split into two phases for construction. The first phase of the project is expected to improve Warren from Lagoon to Pine and on Lagoon, Church, Academy, and Pine between Warren and Main. Construction of this middle portion of the project is expected in the fall of 2014 with construction of the remainder of the project following about 5 years later. To avoid losing the \$2.4 million available for the project now, plans for the project need to be completed in about two months.

Although the parking standards applied to developments do not apply to city streets in a strict sense, it should be the city's duty to strive to comply with standards applied to private development whenever possible and, if standards can not be met, that a careful and considered process be used when varying from standards. The existing parking configuration on Church Street and Academy Street includes diagonal parking along both sides of both streets that falls far short of meeting the city standards that are applied to private developments.

As shown on the attached drawing, on Academy Street the isle width between the existing parking spaces on either side of the street (if standard 9 foot by 20 foot spaces are assumed) is only a 6 foot wide. The city standard for one way aisles in private parking lots is 12 feet. The paint markings for the existing spaces on Academy are substantially shorter than a 20 foot space would require and, fortunately, most vehicles are shorter than 20 feet so there have been no obvious or severe problems with the parking configuration there. Still, with the investment in the streets by the Warren Street project, effort should be made to improve the parking and bring it to, or closer to, standard.

Although the parking issues on Academy are worse than Church, Church has similar issues, especially near Warren Street. Although the minimum existing aisle width on Church Street is over 14 feet, there is no Americans with Disabilities Act (ADA) compliant sidewalk along Church Street in this area.

It is proposed to improve the parking configuration and sidewalk width and ADA compliance on Academy and Church Street as part of the Warren Street Improvements project. It is proposed to achieve this by widening both streets on their south sides. This widening would affect the parking lots at the southeast corners of the Church Street and Academy Street intersections with Warren Street. The new parking configuration on the streets would provide a minimum 10.74 foot wide aisles between 9 foot by 20 foot spaces on either side of the streets.

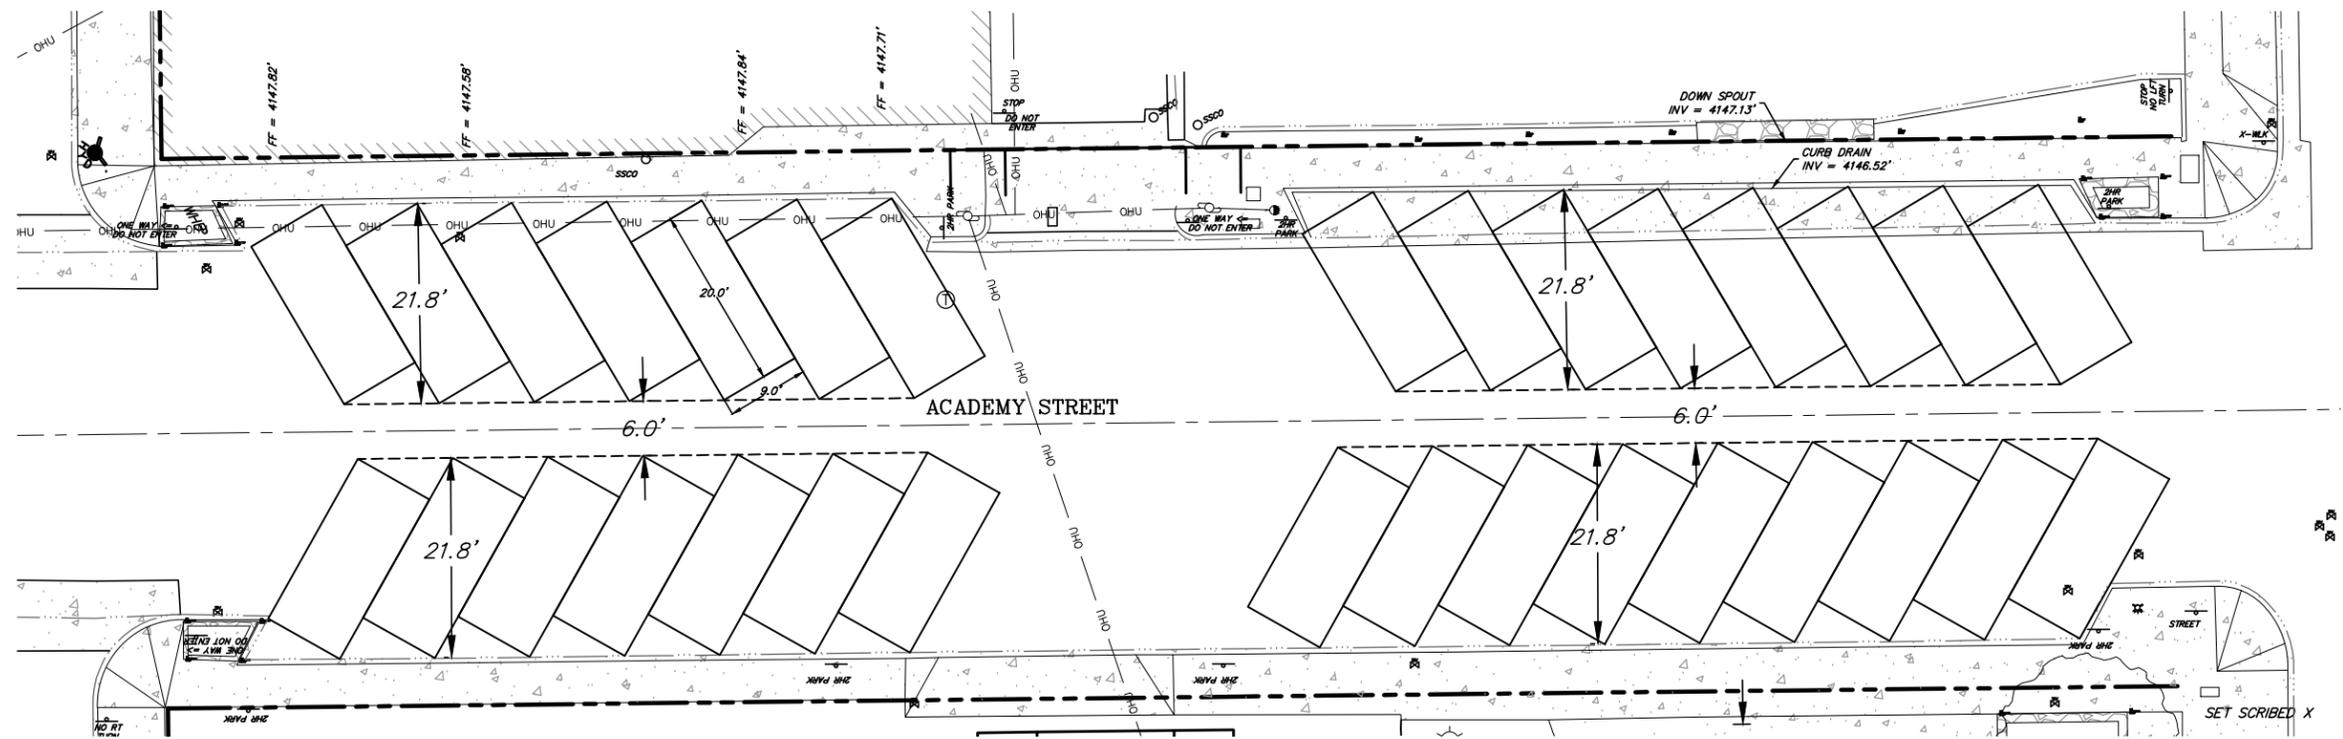

The widening would impact and require changes in the two parking lots. The one at Church would have its northern-most (one-way) aisle reduced from about 22 feet to about 17.8 feet. The one at Academy would have its spaces converted to diagonal and its aisles converted to one way with 9 foot by 20 foot spaces and about 18 foot wide aisles.

The existing and proposed configuration for the two streets and the parking lots are shown on the attached drawings.

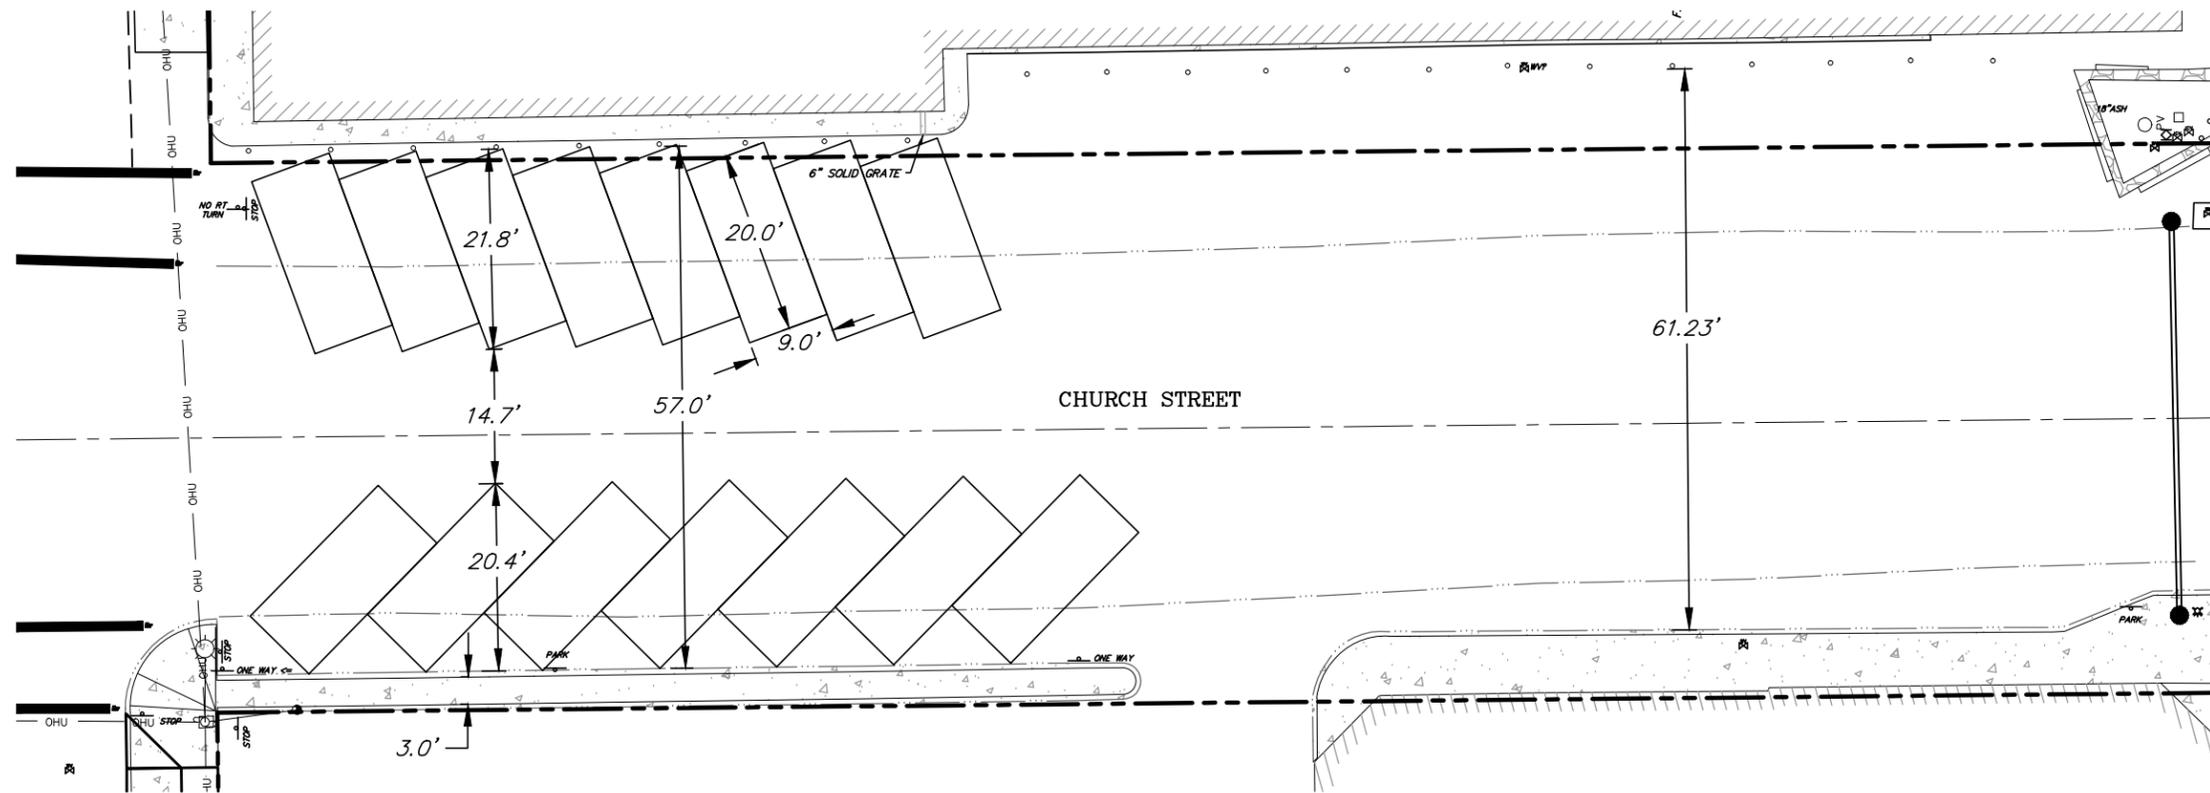

On street projects, city and consultant engineering staff are responsible for decisions regarding design standards but, because of the Planning Commission's expertise and role in most decisions regarding parking and parking standards, review and input by the commission would be extremely helpful in the decision making process on the Warren Street Improvements project.

Request:

Review and comment on the parking configurations proposed for Church Street and Academy Street as parts of the Warren Street Improvements project.
