## **Public Works News Release**

### **New Sketches of the Warren Street Project**

Final design of the City of Bishop Warren Street Improvements project is underway and construction of the first part of the project is planned for the fall of 2014. The design will largely be modeled after the renderings developed by the group of volunteers working to help shape the project to be the best possible improvement for the city. The Focus Group recently released their updated renderings of the project. The renderings are available in City Hall or on the city website.

The Warren Street project is generally planned to improve the full length of Warren Street with new pavement, curb, sidewalk, street trees, street lights, and other improvements. The project is planned to include pocket parks, seating areas, colored concrete with designs, landscaping, banners, bike racks, restrooms, and shade trees. Construction of the middle portion of the project is expected in the fall of 2014 with construction of the remainder of the project following 5 or so years later.

To meet the fall 2014 construction timeframe, design of the project will need to be complete by February or March. There is a lot of work to do so the Focus Group plans to meet monthly as the final design comes together. Keep an eye out for updates as the process moves along.

The Focus Group and the city welcome comment and questions about the Warren Street project. For more information contact City of Bishop Public Works at [publicworks@ca-bishop.us](mailto:publicworks@ca-bishop.us) or 760-873-8458.
