## **Public Works News Release**

### **Warren Street Utility Work this Fall**

Water and sewer work is planned this fall in advance of the construction of the first phase of the City of Bishop Warren Street Improvements project next spring. The \$500,000 water and sewer project is intended to make needed underground improvements this fall prior to paving and improving the street next spring.

The water and sewer project will make water improvements at various locations along Warren Street and on West Elm Street near Main Street. In addition, new sewer will be constructed on Academy Avenue between Main and Warren and new waterlines will be constructed along South Street and Academy Avenue between Main and Fowler Streets.

Work is expected to begin in early October and last through November. The contractor is Marzano and Sons of June Lake.

This construction in downtown Bishop will impact traffic on city streets west of Main Street. Traffic can be heavy so the work will cause inconvenience and delays. Equipment, workers, and uneven pavement will require attention. All efforts will be made to maintain access to businesses and to minimize the impacts and restrictions, but drivers and pedestrians should be cautious, take alternate routes, and be patient.
