Public Works News Release

Warren Street Construction Starts Early October

Water and sewer construction work along Warren Street and intersection streets is expected to start in early October and last into early December. The construction of street improvements along Warren Street from Line to Pine and on Church, Academy, and Pine is expected to start in January and last into May. This construction work will be completed as part of two separate, but related, City of Bishop construction projects.

The first project is a \$500,000 project to construct needed water and sewer improvements in advance of the Warren Street Improvements project. The idea is to get the underground water and sewer work done before the street is improved in the spring. This way the new street won't have to be dug up later. This water and sewer project is funded by Bishop water and sewer customers. The contractor is Marzano and Sons of June Lake. Marzano expects to start work the first or second week of October.

The \$2.1 million Warren Street Improvements project is expected to go out to bid next week. Funding for this project is from state gas tax funds. The winning contractor on this project is expected to start work in mid January and complete work in May 2015.

The construction of these two projects in downtown Bishop will impact traffic on city streets west of Main Street. Traffic can be heavy so the work will cause inconvenience and delays. Equipment, workers, and uneven pavement will require attention. All efforts will be made to maintain access to businesses and to minimize the impacts and restrictions, but drivers and pedestrians should be cautious, take alternate routes, and be patient.
