## **Public Works News Release**

### **Warren Street Utilities Construction Update 1**

City of Bishop water and sewer construction along Warren Street and intersecting streets will continue next week and is still expected to last into early December. The construction of street improvements in the area is expected to start in January and last into May.

The water and sewer contractor plans to complete work on a new waterline along South Street west of Main Street next week. After the water line on South Street is done, the contractor plans to continue with spot improvements along South Warren Street the remainder of next week. Following that, the contractor will move operations to the North Warren Street area including the full length of Academy Avenue. All utility work is expected to be completed in early December.

The contractor on the \$500,000 water and sewer project is Marzano and Sons of June Lake. Funds for the water and sewer improvements come from monthly fees paid by City of Bishop water and sewer customers.

This construction in downtown Bishop impacts traffic on city streets west of Main Street and will cause inconvenience and delays. Equipment, workers, excavations in the street, and uneven pavement will require attention. All efforts will be made to maintain access to businesses and to minimize the impacts and restrictions, but drivers and pedestrians should be cautious, take alternate routes, and be patient.
