Public Works News Release

Warren Street Utilities Construction Update 3

Work on the City of Bishop water and sewer construction along Warren Street is expected to continue in the intersection of Lagoon and Warren the rest of this week and possibly into next.

Difficult water system improvements are continuing this week in the intersection of Warren and Lagoon streets. This water work and additional sewer work in the intersection is expected to be complete by early next week with the holes in the pavement from the work being patched in the next few weeks. The work in the intersection of Lagoon and Warren requires closure of the intersection during the work day. Temporary water shutoffs will be necessary for some operations. Notices of the shutoffs will normally be distributed two days in advance.

Following the completion of work in the intersection of Lagoon and Warren Street, the contractor is expected to move operations to North Warren. Work in this area includes the construction of water line the full length of Academy Avenue. All utility work is expected to be completed in December. Construction of street improvements along Warren Street is expected to start as early as January and last into May 2015.

This construction in downtown Bishop impacts traffic on city streets west of Main Street and will cause inconvenience and delays. Closures include full intersection closures. When intersections are closed, you will not be able to get through the intersections. Equipment, workers, excavations in the street, uneven pavement, and other hidden hazards will require attention, even when work is not underway. All efforts will be made to maintain access to businesses and to minimize the impacts and restrictions, but drivers, riders, and pedestrians should be cautious, take alternate routes, and be patient.

For more information contact City of Bishop Public Works at publicworks@ca-bishop.us or 760-873-8458.
