Public Works News Release

Warren Street Construction Update 6

Glimpses of the how Warren Street will look when the City of Bishop Warren Street Improvements project is complete about 3 months from now are visible on Warren Street.

Several sections of new sidewalk are now complete on Warren Street between Line Street and Academy Avenue. The new sidewalk includes colors, patterns, and stamps. Next week work is expected to continue on sidewalk, driveways, and pocket parks on Warren Street near Church Street and near the Bishop Library.

At the same time, electrical conduits for new street lights and irrigation pipes for landscaping and hanging baskets are being constructed ahead of the sidewalk work. Construction of the conduits and pipes includes digging deep and wide trenches along and across streets. Digging these trenches can result in large piles of dirt on the street while work is underway.

Construction on and near Warren Street in downtown Bishop causes inconvenience and delays. Drivers, riders, and pedestrians should be cautious, take alternate routes, and be patient. Construction of the project requires full street and intersection closures. Equipment, workers, excavations in the street, uneven pavement, and other hidden hazards require attention, even when work is not underway. The contractor on the project normally works 7 am to 5 pm Monday through Thursday and has Fridays off. Work is expected to continue into May.

Remember your local businesses are open to serve you during regular business hours even when active construction activity is underway.
