## **Public Works News Release**

### **Warren Street Construction Update 8**

Placement of concrete continues to be the main activity this week on the City of Bishop Warren Street Improvements project. Storm drain construction may start again next week.

Concrete work is planned to finish on Warren between Church and Academy and is planned to start on Church Street between Main and Warren next week. Within a week or so after that, concrete work should also start on Academy Avenue between Main and Warren. The last storm drain construction from Academy north to near Pine will also be done about the same time.

Repaving and installing street lights will be some of the last construction operations probably happening in May. Concrete work is expected to continue until then.

Construction on and near Warren Street in downtown Bishop involves the closure of streets, intersections, sidewalks, and driveways. Access is still available to businesses in the area but, in most cases, it would be better to park nearby and walk a block to visit your favorite local business. Access to city parking lots is normally still available during construction, but entrances may be different and parts of the lots may be closed due to the construction.

Equipment, workers, excavations in the street, uneven pavement, and other hidden hazards require attention, even when work is not underway. The contractor on the project normally works 7 am to 5 pm Monday through Thursday and has Fridays off. Work is expected to continue into May.
