3-1.11, Payee Data Record,

Delete the numbered list in Section 3-1.18, Contract Execution

Delete the second and third paragraphs of Section 2-1.33A, Bid Document Completion - General.

Modify Section 5-1.23, Submittals, to identify each sheet by the project name.

Delete the column "Umbrella or excess liability" from Liability Limits table of Section 7-1.06D(2), Liability Limits / Additional Insureds.

4. PROPOSAL REQUIREMENTS

The bidder's attention is directed to the provisions in Section 2, Bidding, of the Standard Specifications and these special provisions for the requirements and conditions which the bidder must observe in the preparation and the submission of the bid. Subcontracting Request forms are not required but each proposal shall list the portion of work that will be done by each subcontractor. A sheet for listing the subcontractors is included in the Proposal.

The contractor or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract.

5. BONDS

Neither a payment bond or performance bond are required for this project.

6. SCOPE OF WORK

The scope of the work shall consist of construction of curb, curb ramp, and sidewalk improvements described in the contract documents for the Fowler / Church Ramp project and as provided in the improvement plans.

7. PRE-CONSTRUCTION CONFERENCE

Prior to issuance to the Notice to Proceed, the City will hold a pre-construction conference for the purpose of discussing essential matters pertaining to the pursuit of the satisfactory completion of the project. The Contractor's representatives at this conference shall include all major superintendents for the work and may include subcontractors.

8. CONSTRUCTION STAKES

Contractor shall be responsible for staking.

9. SUBMITTALS

In addition to submittals required in the Standard Specifications and elsewhere in these Special Provisions, the Contractor shall submit the following information to the City 7 working days prior to beginning of work for review and approval.

- a) A schedule of work conforming to Section 8-1.02B, Level 1 Critical Path Model Schedule, of the Standard Specifications except that a time-scaled network diagram is not required.
- b) A health and safety plan.

10. PERMITS AND LICENSES

The following permits and licenses are known to be required for the work:

- a) City of Bishop Business License and
- b) California Contractors License Classification A or Classification C8

11. TIME OF COMPLETION

The Contractor shall have 15 working days to complete the work, excluding delivery time for parts and materials.

12. LIQUIDATED DAMAGES

Liquidated damages shall be \$1000 per day.

13. MEASUREMENT AND PAYMENT

All work will be measured and paid for as shown on the bid form and the contract documents.

Item quantities shall be measured by planned, actual, or lump sum in accordance with these special provisions. Item quantities to be measured for payment by planned quantities shall be based on theoretical or calculated quantities of completed work based on the plans. Item quantities to be measured for payment by actual quantities shall be determined by measurement of completed work.

The price paid for bid items shall include full compensation for furnishing all labor, materials, tools, equipment, and incidentals, and for doing all the work involved in completing those items of work complete in place in accordance with the contract documents.

When the contract does not include a contract pay item for work required by the contract, full compensation for that work is included in the prices paid for the contract pay items included in the contract.

The Contractor, with assistance from the City shall, at the completion of work cause an estimate in writing to be made of the value of the work completed. A request for payment based on the estimate shall be submitted by the Contractor for approval and payment by the City.

14. RESOLUTION OF CLAIMS

All public works claims between the Contractor and City relating to this contract where the total claims of both parties are equal or less than \$375,000 shall be resolved in accordance with Public Contract Sections 20104 et seq., which are incorporated herein by reference. There shall be no claims for labor compliance issues.

15. TRAFFIC CONTROL

The contractor's traffic control plan shall include, but not be limited to, the following:

- Construction signing
- Types and location of traffic control devices

The plan shall conform to the California Manual of Uniform Traffic Control Devices.

The City Engineer will review the submittal and provide written comments on the proposed plan. Upon resolution of issues the Engineer shall accept the plan in writing.

Acceptance by the Engineer of a traffic control plan shall in no way relieve the Contractor of his responsibility for safety. Acceptance of the traffic control plan by the City Engineer indicates that the plan generally appears to conform to the contract requirements. Such acceptance shall in no way be construed as confirmation of the technical accuracy or adequacy of the contents of the plan and shall not relieve the Contractor of the obligation to institute traffic control measures in full compliance with contract requirements, and which function safely and correctly, and are in conformance with applicable statutes, ordinances, and regulations.

Flagging: Flagging shall be paid entirely by the contractor. Assigned flaggers must control traffic and warn public of any dangerous conditions results from work activities. All flaggers must maintain flagging apparel. Flaggers shall be used during active construction operations whenever one-way traffic control is used on a two-way street.

Drop Offs: All longitudinal drop-offs shall be delineated and signed. Where public traffic is exposed to longitudinal drop-offs greater than 4 inches during non-working hours temporary durable safety slopes 4 horizontal to every 1 vertical or flatter shall be constructed and maintained.

Open Trenches and Excavation: Except for the minimum area needed to resume construction the following day, trenches and excavation shall be plated or backfilled and compacted to at least the bottom of the pavement section by the end of each work day.

Traffic on Fowler: Two smooth and compacted lanes, each at least 11 feet wide and one in each direction shall be maintained at all times on North Fowler Street.

16. GENERAL SAFETY

Contractor shall transmit to the City copies of reports and other documents related to accidents and injuries encountered during this work. Where there is conflict between applicable safety orders, laws and regulations and policies, the more stringent measures shall apply.

17. CHEMICALS

The Contractor shall provide two copies of Material Safety Data Sheets to the City for all chemicals used during this project at least three days prior to bringing them on site. Use of all such chemicals and disposal of residues shall be in strict accordance with the printed instructions of the manufacturer.

If the Contractor encounters hazardous substances during this work, he shall immediately notify the City and the County Environmental Services Office. Hazardous substances shall be disposed of in accordance with the requirements of Inyo County Department of Environmental Health.

B. BID ITEMS

1. Remove Tree

Remove Tree shall include removing all roots larger than 3 inches in diameter to 18 inches below finish grade. Remove Tree shall be measured actual.

2. Relocate Irrigation Equipment

Relocate Irrigation Equipment shall include relocating valve and “T” in plastic irrigation vault and above ground backflow device to behind back of sidewalk and reconnecting relocated equipment to existing piping. Relocate Irrigation Equipment shall be paid lump sum.

3. Curb

Curb shall include removal of the existing curb, subgrade preparation, placement and compaction of 6 inch aggregate base, and patching and matching to existing grades where constructed adjacent to pavement to remain. Expansion joints in curb shall be placed at ends of construction. Curb shall exclude curb ramp and spandrel. Curb shall be measured actual.

4. Curb Ramp

The price paid for Curb Ramp shall include removal of existing concrete, subgrade preparation and compaction, placement and compaction of 6 inches of aggregate base, gutter, and other concrete necessary to construct curb ramps, matching existing grades behind and adjacent to curb ramp that may require either cutting or filling to provide a smooth transition. Curb ramp shall be poured monolithically with curb. Curb ramps shall be measured from beginning of curb return (BCR) to end of curb return (ECR). Spandrel shall be measured as curb ramp. Curb ramps shall be measured actual.

5. Sidewalk

Sidewalk shall include removal of existing sidewalk, 4 inches of aggregate base, and matching existing grades behind sidewalk that may require either cutting or filling to provide a smooth transition. Sidewalk shall be 1.5% slope plus or minus 0.5%. Sidewalk shall be poured monolithically with curb where they are adjacent. Expansion joints in curb shall be placed at ends of construction. Curb ramps shall not be included in the measurement of sidewalk. Sidewalk shall be measured actual.

MATERIALS

1. Portland Cement Concrete

Concrete shall be 711 Materials, Mix 650016F4, or equal.

2. Synthetic Fiber Reinforcement

The synthetic fibers specified shall conform to the requirements of ASTM C1116, Section 4.1.3 and Note 3, as well as International Conference of Building Officials Evaluation Service (ICBO ES) Acceptance Criteria 32, Sections 4.1.1 and 4.1.2. Both of these specifications apply to the use of synthetic fibers as secondary reinforcement in concrete. At the request of the project engineer the synthetic fiber vendor shall furnish a Letter of Certification stating compliance with these specifications and signed by a registered Professional Engineer.

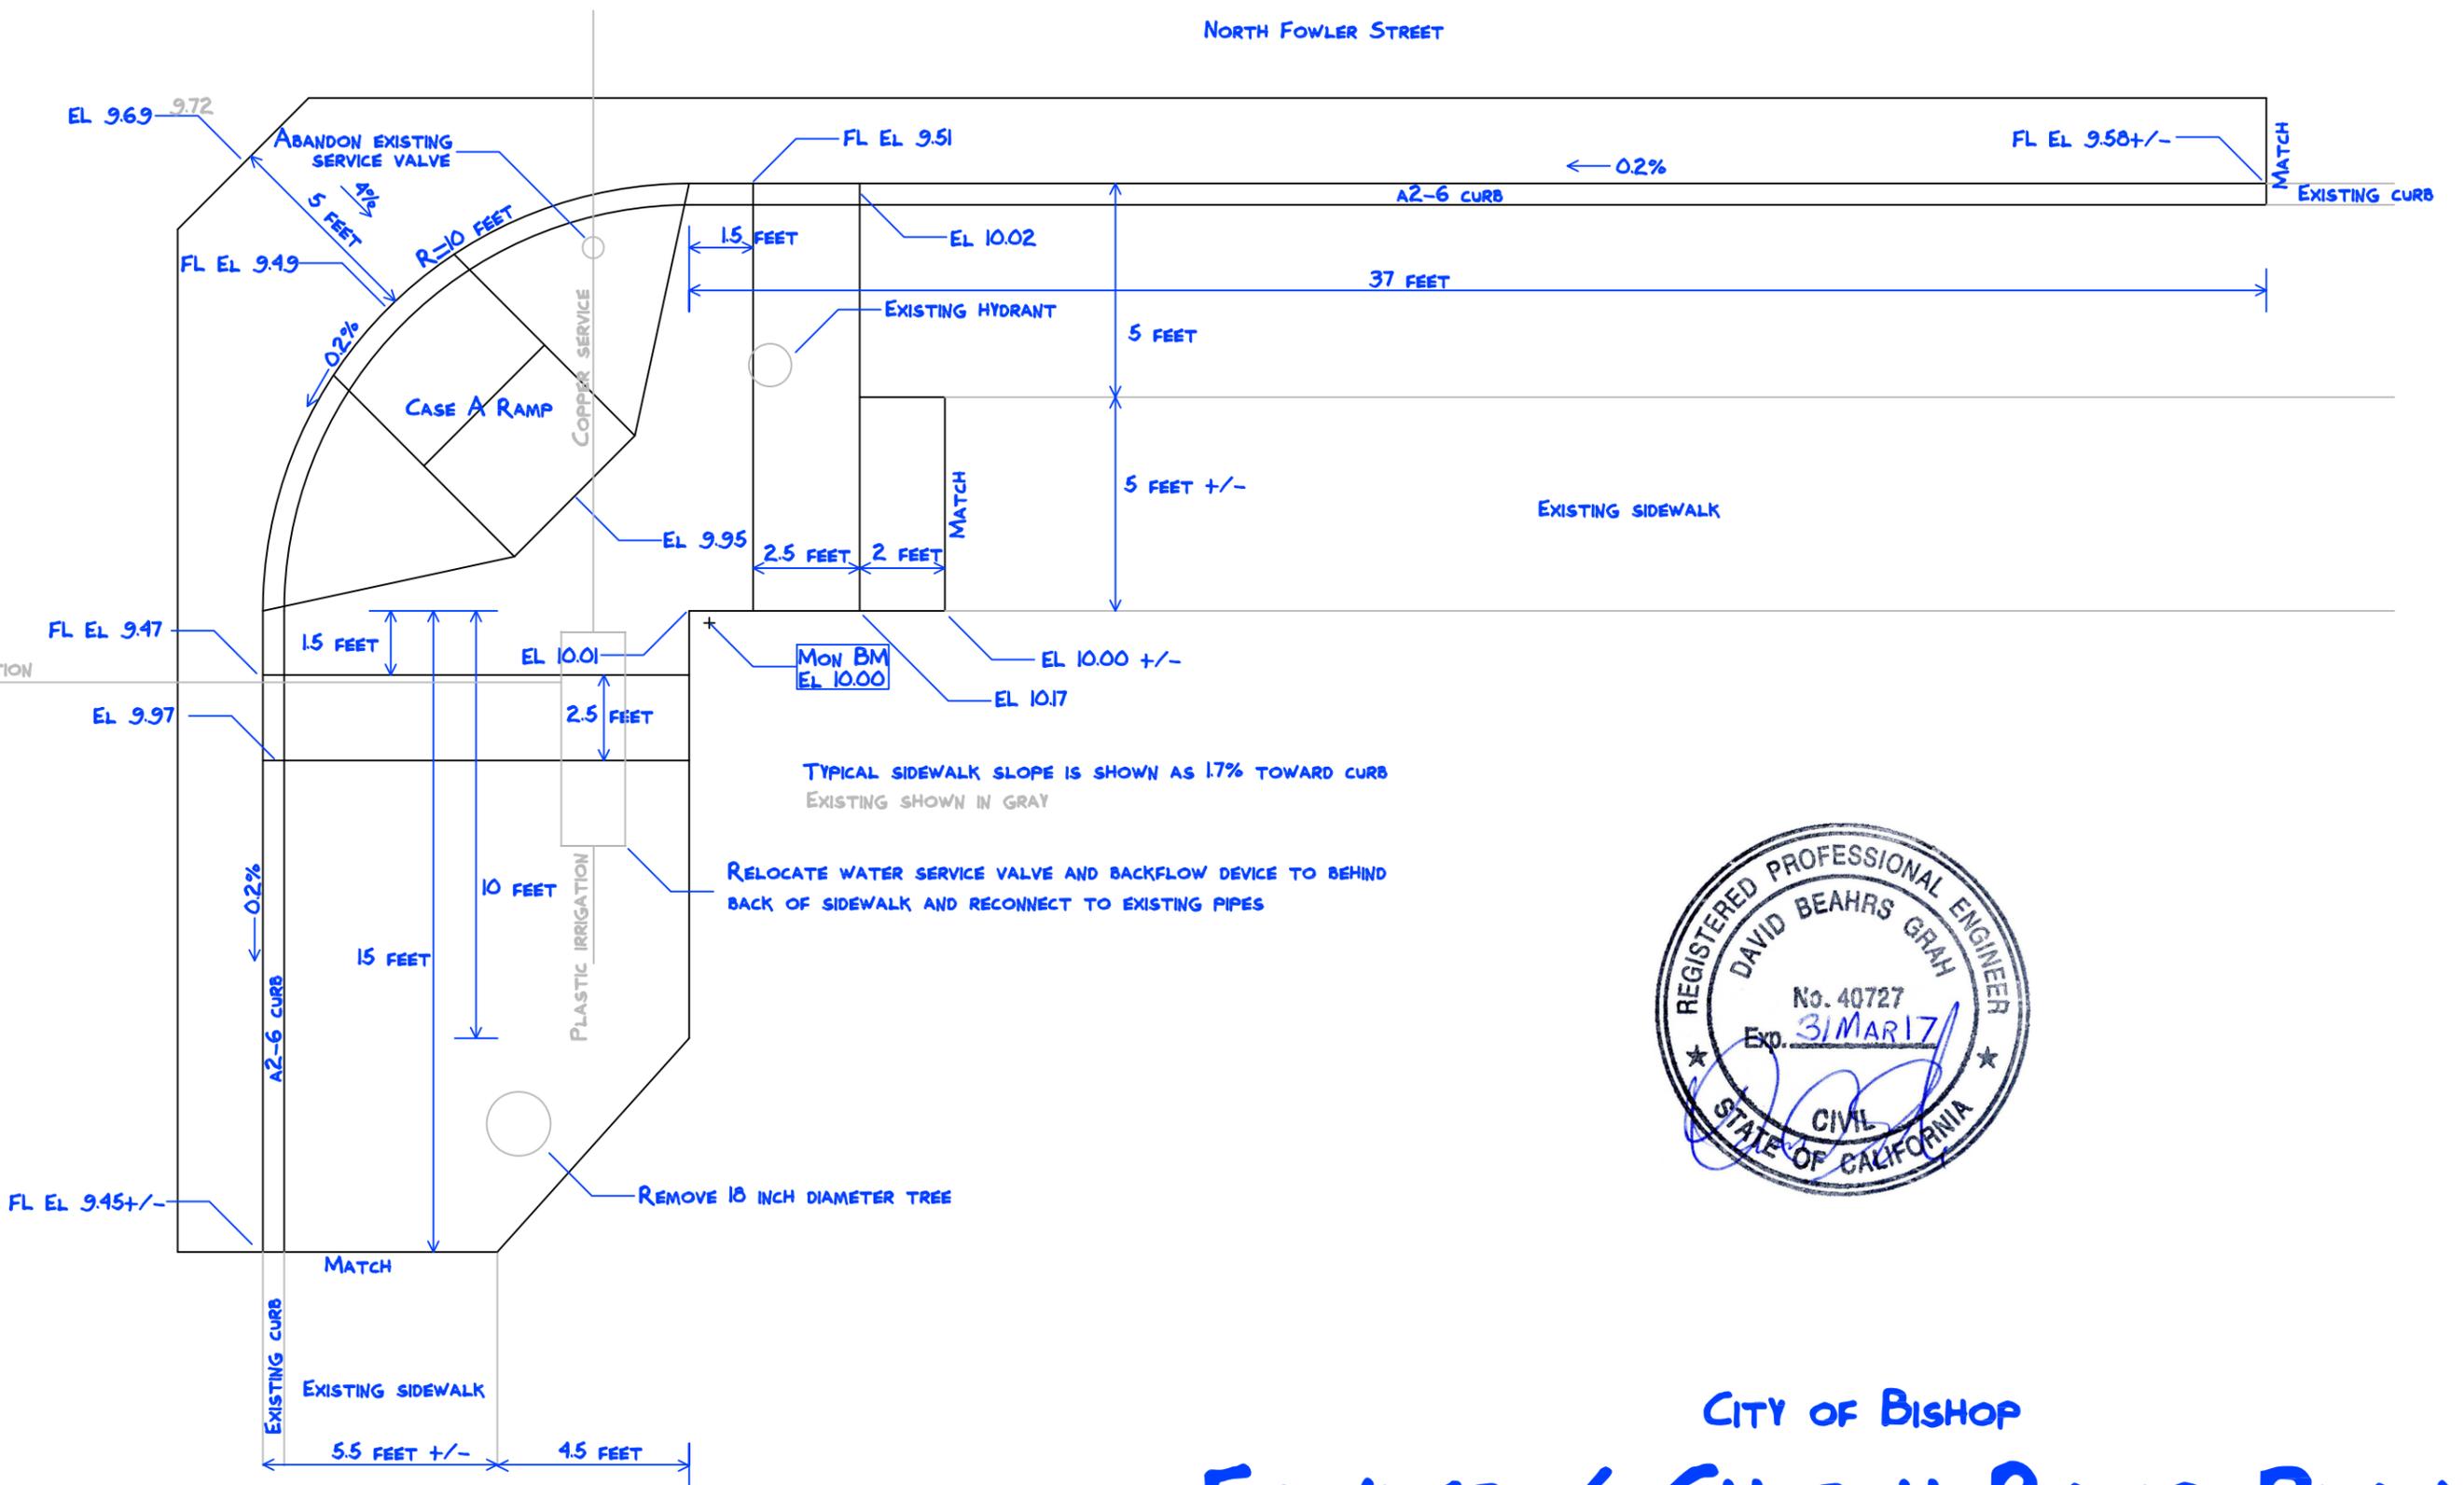

Synthetic fibers shall be either nylon multifilament fiber or polypropylene collated fibrillated fiber or monofilament fiber.

Nylon multifilament or polypropylene monofilament fibers shall be introduced at the rate of 1 pound per cubic yard at the standard length of $\frac{3}{4}$ inch.

Polypropylene collated fibrillated fiber shall be introduced at the rate of 1.5 pounds per cubic yard at the standard length of $\frac{3}{4}$ inch.

Synthetic fibers shall be added at the concrete batch plant and mixed with the other ingredients for 3 to 5 minutes. The concrete producer shall list the type and quantity of synthetic fiber added on each delivery ticket.
