Public Works News Release

Meeting to Discuss Road Project A

The City of Bishop will hold a meeting to discuss the street improvement project known as "Road Project A" on Thursday, 24 May 2007. The meeting will be at 7 pm in the City of Bishop Auditorium at the northeast corner of West Line Street and Fowler Street.

Road Project A will improve two sections of city street, the first on North Third Street from Pine to Elm and the other on Short Street from Second to Third Street.

The project will repave the street, add sidewalks, and improve drainage on Third and Short Streets much like the Home Street Improvements project did on Home Street in 2006. The project will impact street grades, parking, driveways, drainage, and trees.

Drainage pipes may be necessary across private property on Third Street and it is possible Short Street will be converted to a one-way street to improve parking. Water and sewer improvement work may be completed at the same time as the street work. The project is planned for construction in 2010.

All those interested in the project and its impacts should plan to attend the meeting.

Maps showing project improvements will be displayed and City of Bishop staff will be there to answer questions and to gather ideas. Work will be started soon on the plans for the project and it is much more likely that input received early in the project can be included than input received later, so get involved now. Some project information is available at <http://www.ca-bishop.us/PublicWorks/StreetProjects.htm>.
