Public Works News Release

You May Be A Water Waster If...

1. Your lawn makes squishing noises when you walk on it.
2. You water your yard during the heat of the day.
3. You leave irrigation water running while you go to work for the day or out shopping.
4. You water the same area more than 3 times a week.
5. You water with a sprinkler on a hose.
6. Your irrigation system isn't on a timer.
7. You have varieties of lawn and plants that require a lot of water.
8. Your faucets and toilets have leaked for years.
9. Your sprinklers put as much water on your walk, the sidewalk, or on the street as on your plants and lawn.
10. Irrigation water runs off your property, down the street, and even forms a pond in front of your neighbor's house.

Water is precious and expensive to provide. Bishop residents use a lot of water and that drives costs up. Don't waste water. Contact the City of Bishop Public Works at 873-8458 for more information on water conservation and the City's water system.
