Public Works News Release

Mac Iver Street Construction Meeting

Construction of the MacIver Street Improvements project will start the beginning of October. There will be a meeting at 7:00 pm 1 October 2007 in the City of Bishop Auditorium to discuss the construction project. The Auditorium is at the northeast corner of Fowler and West Line Streets. Anyone interested in Mac Iver Street should attend this meeting.

Meeting topics will include:

- Project details
- Construction schedule
- Closures and traffic impacts

The Mac Iver Street project will extend the street, including sidewalks, planter strips, and utilities, through to Spruce Street. On the existing street, sidewalk, driveways, and ramps will be constructed and replaced so there is continuous disabled-accessible sidewalk from North Main Street to Spruce Street. Drainage and water quality is also to be improved.

Because of funding constraints, the Mac Iver Street Improvements project is broken into two phases. The phases are expected to be constructed in rapid succession so, if all goes as planned, work should appear to progress uninterrupted from start to finish on the whole project.

It is important to note the funding for the second phase is not secured yet. The second phase of the project includes most of the sidewalk, driveway, and ramp construction. If a problem were to arise with the funding for the second phase, the street could be left without continuous disabled-accessible sidewalk.
