Public Works News Release

Bishop Street Projects Meeting

There will be a meeting Thursday 3 January 2008 to discuss two City of Bishop street improvement projects. The projects are known as "Road Improvement Project A" and the "South Second Street Improvements Project". The meeting will be at 6:30 pm in the City of Bishop conference room. The conference room is in City Hall at 377 West Line Street. To get to this conference room, enter City Hall through the door on West Line near Fowler Street.

The projects propose to rehabilitate the pavement, replace and construct curb, gutter, and sidewalk, remove and replace trees, replace or improve water and sewer lines, and improve drainage. These improvements will be constructed on Third Street between Pine and Elm, Short Street between Second and Third, and South Second Street between South and Line. On the block of Short Street affected by this project, it is proposed to convert the street to one way with diagonal parking on one side. Environmental documents have been prepared and the public comment period for both documents ends 6 January 2008.

More information about the projects, including the environmental documents, is available in the City of Bishop Public Works Office or at the City of Bishop web site
