Public Works News Release

Grove Street Sidewalks Meeting

There will be a meeting Wednesday, 19 November 2008, to discuss the City of Bishop Grove Street Sidewalks project. The purpose of this meeting is to present the basic design of the project and to gather public input. Everyone interested in the project should attend this meeting.

The Grove Street Sidewalks project is intended to provide a safe route for children on their way to and from Bishop schools. The project will improve the sidewalks on Grove Street from Main Street to Home Street. In addition to providing disabled-accessible sidewalk, the project includes reconstructing shoulders, curbs, gutters, sidewalks, ramps, and driveways on both sides of Grove Street. The project includes various water main and sewer upgrades between Main Street and the Pine Street School. Pavement work is also included.

The project is anticipated to require the removal of several large trees along the street right of way and to include 2 to 3 new replacement trees for every large tree removed. In many respects the project will be similar to the Home Street Improvements project constructed about 2 years ago. Construction of the Grove Street Sidewalks project is planned for the summer of 2009.

The meeting will be held in the City of Bishop auditorium at the northeast corner of West Line Street and Fowler Street. The meeting will consist of a 30 minute presentation describing the project. After the presentation, staff from the City of Bishop and the engineering consultant will be available to answer questions and take input.
