Public Works News Release

South Second Street Construction Update 2

Progress continues on the construction of the South Second Street Improvements project. Most work this week has been underground on water and sewer improvements. Next week, this underground work will continue. In addition, there is a possibility the contractor, V and C Construction, will place the first new curb, gutter, and sidewalk next week. The project is expected to be complete about 1 May.

Most of the work done so far on the project has been demolition of existing improvements or has been underground. Soon, the new features on the street will start to be constructed and the street will finally start to look better.

The \$700,000 project will remove trees, replace some water and sewer lines, construct new curb, gutter, and sidewalk, reconstruct the pavement, and provide replacement trees on South Second Street between South Street and Line Street. The project also includes portions of Clarke Street and Short Street near Second Street.

Parking will be restricted during the day Monday through Friday while work is underway. Equipment, workers, and trenches in the street will require attention and could impact traffic. All efforts will be made to minimize the impacts and restrictions. Residents, drivers, and pedestrians should be cautious in and near the construction site. They should take alternate routes when available, should be alert for hidden hazards, and should be patient with short delays. Water and sewer work will require occasional shut offs.
