Public Works News Release

Hanby Pavement Work to Start

Work is planned to start Monday, 17 May on the Hanby Avenue Pavement Reconstruction project with the grinding-out of the existing pavement on Hanby Avenue. Work on the project is expected to last 2 to 4 weeks.

The \$300,000 Hanby Avenue Pavement Reconstruction project will reconstruct the pavement on Hanby Avenue between East Line Street and East Pine Street. The project will also construct concrete pedestrian ramps and replace concrete cross gutters in this area. The project includes no sidewalk construction. The project is funded primarily from federal economic stimulus funds. Construction is expected to start next week and be complete about the middle of June.

Grinding-out the existing pavement on Hanby is expected to take a couple of days. Once the pavement is removed, traffic will travel on graded gravel for 1 to 3 weeks while concrete work is done. When the concrete work is finished, the street will be repaved.

Parking is restricted during the day Monday through Friday while work is underway and at other times when necessary. Construction materials, equipment, workers, and trenches in the street will require attention and will impact pedestrian and vehicle traffic. There will be ongoing lane and street closures and vehicle access to properties will be restricted at times. All efforts will be made to minimize the impacts and restrictions, but residents, drivers, and pedestrians should be cautious, take alternate routes when available, be alert for hidden hazards, and be patient with some inconvenience and with short delays.
