Public Works News Release

Construction of the Next Bishop Street Project Starts Soon

At their regular meeting Monday night, the Bishop City Council awarded the \$1 million project known as Road Improvement Project A to Qualcon Contractors of Minden, Nevada.

Construction of the project is expected to start mid February and last about two and a half months.

Project A has two locations, one on North Third Street and one on Short Street. On North Third Street the project is from East Pine Street to East Elm Street. On Short Street the project is from South Second Street to South Third Street. The Third Street location also includes a small portion of East Elm Street. The streets included in the project are of the Bishop streets in most need of improvement.

The project will replace the pavement and construct curb, gutter, and sidewalk at both locations. At the North Third Street location the project also includes water, sewer, and drainage improvements. At the Short Street location the project includes converting the street to one way with diagonal parking on one side. The project will remove about 20 large trees and will provide about 60 replacement trees.

The project's street and drainage improvements are funded from gas tax funds provided by the state. The project's water and sewer improvements are funded from city water and sewer funds.

There will be a public meeting in early February to provide project and construction details.

More information on this meeting will be provided as it becomes available.
