Public Works News Release

Iris Street Water Line Construction Update

Work has begun on the City of Bishop Iris Street Water Improvements project. The \$46,000 project will replace small and deteriorated water line with new larger pipe on Iris Street. Water services to properties along the street will also be replaced. The contractor on the project is Conspec of Lee Vining. The project is funded from city water funds.

This week the contractor plans to install the new water line and services in trenches in the street. Next week the plan is to test the new lines and, if all goes well, switch water customers to the new lines and patch the street. The contractor hopes to complete the project next week, but it is likely work will continue at least into the following week.

Parking will be restricted during the day Monday through Friday while work is underway and at other times when necessary. Construction materials, equipment, workers, and trenches in the street will require attention and will impact pedestrian and vehicle traffic. There will be ongoing lane and street closures and vehicle access to properties will be restricted at times. All efforts will be made to minimize the impacts and restrictions, but residents, drivers, and pedestrians should be cautious, take alternate routes when available, be alert for hidden hazards, and be patient with some inconvenience and with short delays.
