## **Public Works News Release**

### **Home Street Construction Update 2**

Construction of the City of Bishop Home Street Improvements is progressing toward completion in September. Work is underway on concrete curb, gutter, and sidewalks. Concrete crews are working on the east side of Home Street starting near West Line Street and working north. Concrete work on the west side of the street will follow construction on the east side. Concrete construction is planned to continue for several weeks and, once it is complete, work on the street pavement will follow.

A total of 28 trees have been removed for the construction of the project. To partially mitigate the loss of these mature trees, 84 small trees will be distributed to property owners along Home Street at no cost. In the next few weeks, the City will distribute coupons for the small trees to property owners on Home Street. Owners can redeem the coupons for trees at a Bishop business location that will be arranged by the project construction contractor. Each owner will receive at least one coupon. In addition, owners that had trees removed in front of their properties will receive an additional coupon for each tree that was removed.

As many residents have discovered, Home Street work significantly impacts traffic and access and includes frequent closures. In addition, those that venture into the construction area expose themselves to a number of potentially hidden hazards. Alternate routes are strongly suggested and if you must enter the construction area, be sure to follow the direction of flaggers or other workers. It is for your safety as well as the safety of the workers.
