Public Works News Release

Home Street Construction Update 4

Concrete curb, gutter, and sidewalk is almost complete on the east side of Home Street and work is progressing rapidly west side. The contractor plans to pour concrete in front of the Home Street school soon, and may be able to complete all curb, gutter, and sidewalk on the project August 25, the Friday before school starts. Paving may start Tuesday September 5, the day after the Labor Day holiday, and continue for one or two weeks. A number of factors could cause the contractor to vary from this anticipated schedule.

In any event, significant work including concrete and paving will continue on Home Street after the start of school. This work will also be underway during the Tri County Fair. Even though major construction work will be suspended during the morning and afternoon school rush, and during evening fair activities, travel on Home Street should be avoided whenever possible until construction is complete. The construction project is expected to be complete about the middle of September.

Bishop Police, Fire, and Public Works, the schools, and the fair met recently with the hope of coordinating efforts and minimizing the impacts of the Home Street project. In the coming days the schools and the fair are expected to issue information on suggested routes and other things to minimize the adverse impacts of the construction project.
