Public Works News Release

Home Street Construction Update 7

Crews are expected to start repaving Home Street on Tuesday, 12 September and the paving work should be completed by Friday of that week. Once paving is complete, just a week or two of minor work will be left on the project.

Grinding operations to remove the existing pavement are underway and drivers on Home Street will find drop offs, dust, and perhaps mud until the first layer of new pavement is in place.

The contractor on the project, Sierra Nevada Construction, is filling in excavations around the new curb and sidewalk and property owners along the street are starting to plant the 84 new trees provided by the project. Property owners along Home Street received coupons for the new project trees. The coupons must be redeemed before the end of September. Construction of the Home Street Improvement project required the removal of 28 trees.

During the morning and afternoon school rushes, the contractor will keep at least two narrow lanes, probably on dirt, open on Home Street and on cross streets. Outside of rush periods, one way traffic control will be required and may cause traffic delay. Travel on Home Street should be avoided until construction is complete about the last week in September.
