## **Public Works News Release**

### **Bishop Looking for Improvement Ideas**

Bishop has no shortage of need for improvements, from fixing potholed pavement, to draining the ponds that appear from time to time on our streets, to making our streets more attractive with trees, benches, and decorative fixtures, to building safe ways to walk or bike to school or to the stores. Fortunately, after several years of little or no funding, State transportation money is again becoming available to make these improvements.

Within the next few weeks, the City of Bishop, in cooperation with Inyo County and the Local Transportation Commission (LTC), will need to propose new transportation projects to the State. These new projects will follow the Home Street Improvement Project built last summer, and the MacIver Street Extension Project planned for construction this fall. To make sure Bishop brings the right projects forward for funding, community input is needed.

Just getting thoughtful input is more important than how it is received. Feel free to stop by, mail, call, fax, or email your input at the addresses and numbers shown above. Input received in the next week or so will be the most valuable, but input is always welcome.

New projects will be added to the City's existing list of future transportation projects. The top projects on this list will be proposed for funding. The list is available on the Public Works page of the City of Bishop web site.

**Help make Bishop even better – give us your ideas!**
