Public Works News Release

Warren Street Construction Starts Next Week

City of Bishop water and sewer construction along Warren Street and intersecting streets is expected to start Monday, 20 October and last into early December. The construction of street improvements in the area is expected to start in January and last into May.

The water and sewer contractor plans to start work on a new waterline along South Street west of Main Street next Monday. Water line construction work on South Street is expected to take more than one week. After the water line on South Street is installed, the contractor plans to start construction on new sewer line on Academy Avenue near Main Street. Other water and sewer work in the Warren Street area will follow and will continue into December. The contractor on the \$500,000 water and sewer project is Marzano and Sons of June Lake. Funds for the water and sewer improvements come from monthly fees paid by City of Bishop water and sewer customers.

This construction in downtown Bishop will impact traffic on city streets west of Main Street. Traffic can be heavy so the work will cause inconvenience and delays. Equipment, workers, and uneven pavement will require attention. All efforts will be made to maintain access to businesses and to minimize the impacts and restrictions, but drivers and pedestrians should be cautious, take alternate routes, and be patient.
