Public Works News Release

Warren Street Utilities Construction Update 6

Work on the City of Bishop water and sewer construction project in the Warren Street area continues along Academy Avenue and at intersections along Warren Street.

The contractor is expected to finish construction of new water lines on Academy west of Warren this week. Next week new water line will be constructed on Academy east of Warren. When the water line is in place, new sewer line will be constructed on Academy east of Warren. In addition to this work on Academy, the contractor plans work in the intersections of Lagoon and Warren, Church and Warren, Pine and Warren, Elm and Warren, and Elm and Main.

Road closures are required while work is underway and temporary water and sewer shutoffs are necessary for some construction operations. Notices of the water shutoffs will normally be distributed two days in advance. Patience with these shutoffs is appreciated.

All utility work is expected to be completed by the end of December. Construction of street improvements along Warren Street is expected to start as early as January and last into May 2015.

This construction in downtown Bishop impacts traffic on city streets west of Main Street and will cause inconvenience and delays. Closures include full intersection closures. Equipment, workers, excavations in the street, uneven pavement, and other hidden hazards will require attention, even when work is not underway. All efforts will be made to maintain access to businesses and to minimize the impacts and restrictions, but drivers, riders, and pedestrians should be cautious, take alternate routes, and be patient.
