Public Works News Release

Warren Street Construction Update 5

Construction of the City of Bishop Warren Street Improvements project is in full swing with the center of activity moving north toward Academy Avenue.

The first new sidewalk constructed for the project is opened today and more is expected to open next week. Next week the contractor is expected to continue sidewalk construction along the west side of Warren Street to Academy Avenue and the Bishop library. Depending on City of Los Angeles Department of Water and Power (DWP) power crews work in the area, sidewalk construction may also happen on the east side of Warren near Line Street.

Next week storm drain construction is expected to continue north along the east side of Warren Street across Academy Avenue to near Pine Street. Storm drain construction includes the placement of underground pipes and inlets in intersections. Storm drain construction includes digging deep and wide trenches along and across streets. Digging these trenches results in large piles of dirt on the street

Construction on and near Warren Street in downtown Bishop causes inconvenience and delays. Drivers, riders, and pedestrians should be cautious, take alternate routes, and be patient. Construction of the project requires full street and intersection closures. Equipment, workers, excavations in the street, uneven pavement, and other hidden hazards require attention, even when work is not underway. The contractor on the project normally works 7 am to 5 pm Monday through Thursday and has Fridays off.

Remember your local businesses are open to serve you during regular business hours even when active construction activity is underway.
