Public Works News Release

Warren Street Construction Update 10

Next week, concrete work on the City of Bishop Warren Street Improvements project is expected to continue on Warren between Academy and Pine. In following weeks, concrete work is expected to move back to Academy between Main and Warren and then move to a parking lot on South Warren.

The relocation of an underground phone cable has interfered with the work on the north side of the Warren and Academy intersection. A delay in getting the new cable could push the completion of work in this intersection into early May. Before this delay came to light, the contractor was planning to have the entire project complete about the beginning of May. The intention is still to have the entire project complete before Mule Days.

Construction on and near Warren Street in downtown Bishop involves the closure of streets, intersections, sidewalks, and driveways. Access is still available to businesses in the area but, in most cases, it would be better to park nearby and walk a block to visit your favorite local business. Access to city parking lots is normally still available during construction, but entrances may be different and driveways and parts of the lots may be closed due to the construction.

Equipment, workers, excavations in the street, uneven pavement, and other hidden hazards require attention, even when work is not underway. When signs say a road is closed, please don't drive on it. There are probably hazards you are not aware of. The contractor on the project normally works 7 am to 5 pm Monday through Thursday and has Fridays off.
