Public Works News Release

Warren Street Construction Update 11

Next week the focus of work on the City of Bishop Warren Street Improvements project is expected to continue on concrete but the following week the focus of work is expected to shift to pavement rehabilitation.

Concrete work is expected to be complete on Academy Avenue next week. When concrete on Academy is done, the concrete operation is expected to move to the east side of South Warren between Line and Lagoon at the city parking lot there. At the same time, curbs around new planters in other parking lots may be constructed.

Starting as early as the week of 20 April, grinding of the existing pavement and grading in preparation for paving is expected. Paving is expected the week following grading. The streets affected by the pavement rehabilitation are Warren from Line to Pine, Church and Academy from Main to Warren, and Pine between Main and the alley half way between Warren and Hammond.

Pavement work will be very disruptive to traffic on the affected streets, so driving on these streets during this time should be avoided. The new sidewalks will be open to pedestrians, however, so you still can easily get to your favorite local businesses. All work on the project is expected to be complete in mid May.

Equipment, workers, excavations in the street, uneven pavement, and other hidden hazards require attention, even when work is not underway. When signs say a road is closed, please don't drive on it. The contractor on the project normally works 7 am to 5 pm Monday through Thursday and has Fridays off.
