Public Works News Release

Bishop Restroom Construction Update

There will be a break for a few months in the construction of two new public restrooms in the City of Bishop. While there is a break in the work in Bishop, work will continue on building fabrication in Minden, Nevada. The buildings are expected to be delivered to Bishop by truck and installed this summer.

The city project will install a new two-user restroom in the back of Talmage Park on Academy Avenue at Main Street and install a new six-user restroom in the back of the City Park near the Senior Center. The new restrooms are to address the need for new restrooms in these two park areas.

All of the underground utility construction is complete at the City Park location. The rest of the work for the City Park location - such as building foundation and pad - will wait until shortly before building delivery. All of the utility and other construction at the Talmage location will wait until shortly before building delivery.

The contractor on the \$360,000 project is Doug Clair, Incorporated, of Bishop. The project is funded by the City of Bishop.
