Public Works News Release

Sneden and Short Street Work This Week

Sneden Street and a portion of Short Street will be closed Wednesday and Thursday of this week, 14 and 15 September, for the placement of pavement seal. Parking restrictions are expected to last into Friday, 16 September.

The pavement fiber seal will be placed the full width of the street pavement along the full length of Sneden Street and the portion of Short Street between Sneden and Main. The streets will need to be closed to traffic the few hours during the placement of the seal and while it hardens. In addition, depending on how quickly the seal hardens, parking may need to be restricted through Friday or even into Saturday even though the streets will be open to traffic.

The contractor on the project plans to place the seal in two operations, one the morning of Wednesday, 14 September and one the morning of Thursday, 15 September. It is expected the streets will need to be completely closed for several hours starting about 7 am these days. It is hoped the streets can reopen from these closures by mid-day or early afternoon. The work will also affect Clarke Street in the intersection with Sneden, so traffic on Clarke will also be affected.

Residents and businesses in the area should be prepared for these street and parking closures and should plan to park outside of the area and to walk to and from locations within the closures when they are in affect. Look for updates in news releases posted at the work location and on the city web site.

About \$90,000 of work is planned for Sneden and Short Streets. The contractor on the joint city / county project is Environmental Concepts out of Tehachapi.
