## **Public Works News Release**

### **Spruce, Hanby, Yaney Sidewalks Construction Update 1**

Construction has begun this week on the City of Bishop Spruce, Hanby and Yaney Sidewalks Project. The project area includes the west side of Hanby Avenue from East Pine Street to Spruce Street, the south side of Spruce Street from Hanby to Bishop Creek and both sides of Spruce Street from Bishop Creek to Yaney Street.

Environmental and design work for this project started in 2016 and was completed in late June of 2020.

The nearly \$1 million project will include sidewalks, marked bike lanes, a pedestrian bridge over Bishop Creek and 63 new street trees. The project is funded from the State of California Active Transportation Program (ATP). Work started this week and is expected to continue into December.

Work this week included tree removal and grading for the curb on Hanby Avenue and Spruce Street. Work activities for the week of October 5<sup>th</sup> will include more curb placement and installation of drop inlets for storm drains. The work involves large equipment, falling trees, excavations, and other hidden hazards that make the project hazardous, especially to pedestrians.

To ensure safety, the project area will have traffic control and potential short term closures. Using a different route to avoid these areas while driving and walking will protect you and construction workers on the job site.
