## **Public Works News Release**

### **Seibu to School Path Construction Update 2**

Construction continues on the City of Bishop Seibu to School Path project. The first concrete was placed on the project this week.

The \$400,000 Seibu to School Path project will construct a 1,300 foot long 8 foot wide paved path from the west end of Keough Street to the west side of the Pine and Elm Street Elementary Schools inside of the City of Bishop. The new city path will connect to existing and planned paths on the Bishop Paiute Reservation. Project improvements include sidewalk on a portion of the north side of Keough Street and include a connection into the north side of the schools. The project is funded by the State of California with gas tax funds. Work is expected to continue into November.

Ongoing work includes cleanup from tree removal and construction of new sidewalk on Keough Street. Next week construction of sidewalk and adjacent curb on Keough Street is expected to be completed. Also next week, grading for the new path next to the schools is expected to begin. Pouring concrete for the new path will follow in subsequent weeks.

Construction of the project involves large equipment, excavations, and other hidden hazards that make the project hazardous, especially to pedestrians. To ensure safety, the project area including the west end of Keough Street and the dirt pathway that leads between Keough Street and the elementary schools is closed to pedestrians during construction. The many students and parents that normally use this route to and from school need to use a different route while the area is closed. Everyone's patience during construction is appreciated.
