## **Public Works News Release**

### **Seibu to School Path Construction Update 1**

Construction will continue next week on the City of Bishop Seibu to School Path project. The project area, including the west end of Keough Street and the path between Keough and the elementary schools is closed to pedestrians.

The \$400,000 Seibu to School Path project will construct a 1,300 foot long 8 foot wide paved path from the west end of Keough Street to the west side of the Pine and Elm Street Elementary Schools. The improvements include sidewalk on a portion of the north side of Keough Street and will include a connection into the north side of the schools. The project is funded from the State of California using gas tax funds. Work started this week and is expected to continue into November.

Ongoing work includes tree removal and grading for the new sidewalk and path. Sidewalk construction is expected to begin next week. The work involves large equipment, falling trees, excavations, and other hidden hazards that make the project hazardous, especially to pedestrians.

To ensure safety, the project area including the west end of Keough Street and the dirt pathway that leads between Keough Street and the elementary schools is closed to pedestrians during construction. The many students and parents that normally use this route to and from school need to use a different route while the area is closed.
